MedBow	4/22/2026	27.3	42.5	46.5	2	2	1	1	No	CPC Zone Staffing Level 2			
<p>Fields highlighted in PURPLE require direct coordination with Dispatch to ensure accurate selections. Fire Management Officers and Duty Officers must work closely with Dispatch to update the "critical fuels" toggle as conditions change. Dispatch is solely responsible for determining when more than 50 percent of initial attack resources within the zone are committed. Effective coordination between Dispatch and units is essential for the spreadsheet to function correctly and for staffing and PL decisions to remain accurate and consistent.</p>										<p>The status page on the Dispatch website must be updated daily by field units from May 1 through October 31. From November 1 through April 30, it must be updated only when the staffing level is Level 3 or higher. All updates must be completed before 10:00 a.m.</p>
