

NORTHWEST COLORADO FIRE MANAGEMENT UNIT  
OFF UNIT ASSIGNMENT ROTATION/LOTTERY  
2011

RESOURCE	DATE	ASSIGNMENT (# of rolls)
E-1613 (crew on E-1419)	5/15-5/30	FY 2011 Pecos District Severity (1)
E-1644	6/04-6/22	West Texas I.A. (1)
E-1610	6/04-6/21	2011 Large Fire Preposition
E-1419	6/12-6/27	FY 2011 Pecos District Severity (1)
E-1642 (crew on E-1419)	6/26-7/11	FY 2011 Pecos District Severity (1)
Sqd 1-1 (crew on E-1419)	6/26-7/11	FY 2011 Pecos District Severity (1)
E-683 (crew on E-681)	7/08-7/24	Honey Prairie
E-1614 (crew on E-1419)	5/29-6/13	FY 2011 Pecos District Severity (1)
E-681	7/30-8/19	Chickasaw NRA Severity
E-1614	7/19-8/2	Dead Horse Creek (2)
E-1613	8/22-9/5	Warm Springs (2)
E-1644	8/17-8/29	Brooks (2)
E-1610		Single Resource Assignments instead of Engine Assignment
E-1419	8/17-8/20	Brooks (2)
E-1642	9/8-Current	Southeast Texas (2)
Sqd 1-1 (crew on E-1419)	9/10-Current	Northeast Texas (2)
E-683	Not avail	
E-1614	Not avail	
E-681	Not avail	
E-1613 (crew on E-1419)	9/24	Northeast Texas (3)
E-1644 (crew on E-1642)	9/24	Southeast Texas (3)

-The rotation was established by drawing names out of a hat and will be updated as off unit assignments occur.

-Rotation is for both engine and Green River Crew assignments. Obviously, squads are only Green River Crew assignments.

-If an engine captain, squad boss or assistant is called to be Green River Crew boss during their crew boss rotation, all people on the engine or squad may go regardless of their position in this assignment rotation. That module will then go to the bottom of the rotation.

-By agreement, each fire management unit provides a certain amount of people to the Green River Crew. Some units may have to send a module that is low on this rotation list. If this occurs, that module then goes to the bottom of the rotation.

Last updated 9/22/2011 2:08 PM

-As a result of module leaders going off unit as a single resource, their crew members will either be assigned to a different module or a replacement module leader found. Either way, the module's position in rotation is what counts.

-If a module is unavailable for off unit assignment, the next in rotation goes out instead, but the unavailable module retains its position in rotation when it becomes available.

-Resource orders specify the type of engine, so (for example) a type 4 engine may get the call ahead of a type 6 higher on the rotation list if the order is for a type 4 engine.

Other situations not addressed here will be handled on a case by case basis.
