PREAMBLE

This Annual Operating Plan is pursuant to the "Plan for Cooperative Wildfire Protection in Weld County" dated April 30, 2004, also known as the State to County Plan. This AOP is also a component of the Statewide AOP and the "Statewide Cooperative Wildland Fire and Stafford Act Plan".

PURPOSE

This Annual Operating Plan is applicable to all signatories and will address how the signatories will implement the State to County Plan. The County may create specific fire district AOP's or Plans to further define the roles and responsibilities within the County. This plan is not intended to force or suggest that any signatory operate outside of their legal authority, policies, mission or business practices. This plan outlines common approaches in wildland fire management as well as agency specific approaches

AUTHORITIES

- Colorado Statewide Cooperative Wildland Fire Management and Stafford Act Response Plan Between:
 - BUREAU OF LAND MANAGEMENT – COLORADO Plan Number BLM-MOU-CO-538
 - NATIONAL PARK SERVICE – INTERMOUNTAIN REGION Plan Number F1249110016
 - BUREAU OF INDIAN AFFAIRS – SOUTHWEST REGION (no plan number)
 - UNITED STATES FISH AND WILDLIFE SERVICE – MOUNTAIN PRAIRIE REGION
 - UNITED STATES DEPARTMENT OF AGRICULTURE FOREST SERVICE – ROCKY MOUNTAIN REGION Plan Number 11-FI-11020000-017
- Agreement for Cooperative Wildfire Protection in Weld County, CSFS #109 Dated April 30, 2004
- Colorado Revised Statue, CRS 29-22.5-103, Wildland Fires – General Authority and Responsibilities
- Colorado Revised Statue CRS 40-30-103 Liability of Railroad Company

RECITALS

National Response Framework activities will be accomplished utilizing engaged partnerships, tiered response, scalable, flexible and adaptable operational capabilities, unity of effort through unified command and readiness to act. Situation and damage assessment information will be transmitted through established fire suppression intelligence channels.

Jurisdictional agencies are responsible for all planning documents (i.e., land use, fire management plans, mitigation plans) for a unit's wildland fire and fuels management program per their agency's policy.

Jurisdictional agencies will provide the supervision and support including operational oversight, direction and logistical support to incident management teams as outlined in the delegation of authority.

INTERAGENCY COOPERATION

Interagency Dispatch Centers

The designated Interagency Dispatch Center for the Weld County area is, Fort Collins Interagency Dispatch Center. (970) 295-6800. This center should be utilized for wildland fire resource requests that cannot be met by the local dispatch center.

Interagency Resources

The USFS may maintain minimal firefighting resources within Weld County. The USFS does maintain firefighting resources across the Front Range of Colorado that may be requested for utilization in Weld County as needed. There is no guarantee that USFS resources will be available.

Colorado Division of Fire Prevention and Control (DFPC) does not have initial attack responsibility within Weld County. However, DFPC may provide state resources under either mutual aid or reimbursable conditions. The availability of state resources for firefighting will vary and is not guaranteed.

Interagency resources must be requested through the Fort Collins Interagency Dispatch Center (FTC).

FTC can:

- Provide tactical firefighting resources through the interagency mobilization system, including Engines, Hand Crews and Incident Management Teams.
- Provide support resources including commercial and charter aircraft, heavy equipment, lowboy transport, miscellaneous mechanized equipment, and fire supplies.
- Provide logistical support including food, lodging, transportation, and facilities.

- Coordinate aircraft requests and tactical aviation resources: air patrol, helicopters, large and single engine air tankers, temporary flight restrictions and air space closures.
- Provide interagency frequency and communications coordination and portable VHF radio systems.
- Provide daily fire information reports & intelligence: National, regional, local situation reports, resource availability.
- Provide prescribed fire support as needed.
- Provide support for private land fires as requested.

Standards

Signatory agencies to this plan will operate under the concepts defined in the Department of Homeland Security's National Incident Management System (NIMS) and National Wildfire Coordinating Group (NWCG) guidance.

The agency having jurisdiction has the overall responsibility for that incident. Under State statute, the County Sheriff and the State may enter into a plan for the State to take management responsibility.

The standard for wildland fire training and qualifications within Colorado is the NWCG 301-1. State and Federal employees engaged in firefighting activities will meet the current NWCG qualification standards at a minimum.

Signatories to this plan may not obligate nor encumber the finances of the other without express written permission.

Agency Roles and Missions

Weld County Sheriff's Office

The Sheriff is the fire warden of the county and is responsible for the planning, and coordination of efforts to suppress wildfires occurring in the unincorporated area of the county outside the boundaries of a fire protection district, or that exceed the capabilities of the fire protection district to control or extinguish in accordance with the provisions of CRS sections 30-10-513.

Arapaho & Roosevelt National Forest (ARF) and Pawnee National Grassland (PNG)

The ARF is responsible for all management activities on the Pawnee National Grassland. For this plan, the primary role of the ARF is wildland fire management, where the protection of human life is the overriding priority. Setting subsequent priorities will be based on the values to be protected, human health and safety, and the cost of protection. The ARF can serve in a support role during structural fire protection operations and may assist in exterior structure protection measures where wildfires threaten improvements or where structure fires threaten natural resources.

The USFS ARF maintains minimal firefighting resources within Weld County. The USFS ARF does maintain firefighting resources in Larimer and Boulder Counties that may be requested for

utilization in Weld County as needed on the PNG. USFS/ARF resources may also be available on State, County and Private land, subject to reimbursement.

Colorado Division of Fire Prevention and Control

The DFPC is the lead state agency for wildfire. The DFPC will, upon request, aid, support, and assist the Weld County Sheriff and/or federal agencies on wildland fires within Weld County.

Please note that on July 1, 2012, that all fire functions performed by the Colorado State Forest Service, were migrated to the Colorado Division of Fire Prevention and Control as mandated by Colorado HB12-1283. As such, all agreements and authorities held by the CSFS also transferred at this time to DFPC. Any written agreements by and between any other entity and the CSFS may still be considered to be in effect as written until updated, changed or withdrawn.

PREPAREDNESS

Protection Planning

DFPC – Operates in the role of ESF4 at the State level as outlined in the Colorado Emergency Operating Plan

DFPC – Develops a Colorado State Preparedness Plan annually

DFPC – Maintains Cooperative Resource Rate Forms (CRRF), provides Cooperator access to the Incident Qualification System (IQS) and the Resource Ordering and Status System (ROSS)

DFPC – Maintains Cooperative Wildfire Plans with each County

DFPC – Assists with provision of wildland fire training to Counties and Cooperating Agencies

DFPC – Administers grants specific to wildland fire suppression

DFPC, USFS and the County – Update the AOP each year

County Sheriff's Office, Office of Emergency Management and the Fire Districts will coordinate and provides for wildland fire suppression planning

County Sheriff – Enters into plans and AOP's with local fire districts as needed

County Office of Emergency Management will assists with the maintenance of records in ROSS and WebEOC

Protection Areas and Boundaries

The area described by this plan include all lands within the jurisdictional boundaries of Weld County, and includes Federal and State lands. A current map of fire protection district boundaries and response zones will be kept in Weld County Regional Communications Center, Weld County OEM, Weld County Sheriff's Office and Fort Collins Interagency Dispatch.

Methods of Fire Protection and Suppression

Weld County has 25 Fire Protection Districts and 2 Municipal Fire Departments that provide response to most areas of the county. The County does not maintain a regular firefighting force, but has the ability to provide heavy equipment in support of suppression efforts.

Surrounding Counties have a similar capacity and often provide mutual aid resources to fires within the county.

Reciprocal (Mutual Aid) Fire Assistance

Mutual aid is defined as assistance provided by a supporting agency or fire protection district at no cost to the jurisdictional agency. Supporting agencies will voluntarily, or upon request, take initial attack action in support of the jurisdictional agency. It shall be the responsibility of the agency performing initial attack to notify jurisdictional agencies if those lands are involved or threatened. The jurisdictional agency will not be required to reimburse the supporting agency for costs incurred for the duration of the mutual aid period, unless other arrangements are agreed upon per CRS 29-5-105 through 29-5-110

Generally, most fire agencies within Weld County have established mutual aid plans. With the exception of USFS lands, the mutual aid period for wildland fires in Weld County will be twelve (12) hours from the first notification of the fire to Weld County Communications and will end at midnight (2400) on the first day. The mutual aid period may be extended or decreased by the agency having jurisdiction to meet incident objectives. Any change to the mutual aid period must be agreed upon by all participants at the incident. At the end of the mutual aid period, the agency having jurisdiction may be responsible for any and all costs occurring after the period.

The Pawnee National Grasslands are not under the mutual aid agreement. All suppression actions taken by the County or by Fire Departments on the PNG are reimbursable from the start of the incident under the following conditions:

- The Incident Commander will notify Weld Communications or FTC.
- The IC or responding units will seek a signature from a USFS / PNG representative on a Crew Time Report or any comparable Fire Department document to verify the response and resources on scene.

Acquisition of Services

Signatories to this plan agree to utilize established ordering procedures for the acquisition of services during a wildland fire. This may include the Interagency Dispatch System, or the State EOC.

In some cases, services may be acquired locally. In such instances, the County will be responsible for the acquisition and establishment of vendor financial documents. If ordered at

the request of the State or USFS, the County may be reimbursed for the cost of the services provided.

Joint Projects and Project Plans

Nothing in this plan shall prohibit agencies from entering into joint project plans. There are no joint wildland fire project plans within Weld County currently for this plan cycle. Standard project planning and written plans will be utilized when entering into joint projects.

Fire Prevention

Education efforts will be coordinated with partner agencies. Each cooperating agency may release fire danger information as deemed necessary to enhance public awareness and safety with regard to the current fire conditions. News releases will be coordinated between cooperators to lend a unified approach to the current conditions when periods of High to Extreme fire danger or when red flag warnings are issued. Weld OEM will send notification to Fire Agencies when a Red Flag Warning is issued.

Public Use Restrictions

The purpose of fire restrictions and closures is to reduce the risk of human-caused fires during high fire danger and/or burning conditions, and for the protection of human life and property. Fire restrictions and closures are invoked on federal, state, county, and private lands under federal, state and local laws. Public information about restrictions must be broad-based, clear and coordinated.

When contemplating a closure to open burning or lifting of fire bans, all agencies or fire departments will advise its cooperators of the situation and consider joint action(s) as needed.

In the case of any restrictions on burning or public movements because of extreme fire danger, either by Governor's proclamation or by local issue, the County Sheriff will be responsible for enforcement on all non-federal lands, and may assist on other lands at the request of the appropriate agency.

Burning Permits

Local fire departments may require burn permits. Agricultural and ditch burns may be exempt from such permitting. The Weld County Department of Public Health and Environment issues and manages burn permits in Weld County. Federal land management agencies are exempt from these standards.

Prescribed Fire (Planned Ignitions) and Fuels Management

Senate Bill 13-083 directed the Colorado Division of Fire Prevention and Control to implement a prescribed burn program in Colorado, including creating minimum standards for conducting prescribed burns on any area in the state, except for prescribed burning conducted by an agency of the federal government, pursuant to Section 24-33.5-1217. To be exempt from these standards, other users of prescribed fire, including local governments and non-governmental organizations must adopt or have already adopted guidelines or standards that are in

substantial compliance with the intent of section 24-33.5-1217.5 for prescribed burning under their control.

Agricultural and ditch burning are exempt from these rules.

Signatory agencies to this plan agree to abide by current laws, rules and standards when performing prescribed fire activities. The agencies may assist each other in all aspects of prescribed fire projects.

Smoke Management

The Colorado Air Pollution Prevention and Control Act (CRS 25-7-102) requires every prescribed fire project to have a smoke permit. Due to changes in policy, procedures, technology and State air quality standards, the smoke permitting process is subject to change. For the most up-to-date process and policy refer to the Colorado Department of Public Health and Environment, Air Pollution Control Division (CDPHE-APCD) website at: <http://www.colorado.gov/cs/Satellite/CDPHE-AP/CBON/1251594943171>.

Agricultural and ditch burning are exempt from these rules.

OPERATIONS

Fire Notifications

Generally, reports of wildland fires within Weld County come from the public, through the 911 system into the Weld County Regional Communications Center. The communications center will then notify the Weld County Sheriff's Office and the appropriate response authority.

For fires occurring on or near the Pawnee National Grasslands, the communication center will dispatch the closest fire protection district, Weld County Sheriff's Office and, notify the Fort Collins Interagency Dispatch Center.

The County Sheriff will notify DFPC of any fire with the potential to escape initial attack operations or that may require State assistance. This notification will be made through the Denver CSP Dispatch Center (303) 279-8855.

Boundary Line Fires

When a fire occurs adjacent to, or on both sides of a protection boundary, or threatens another jurisdiction,, the first arriving unit should establish command. The Jurisdictional authority will be established as soon as practical.

Response to Wildland Fire

Fires within Weld County will initially be suppressed by the Fire Protection District or Fire Department having jurisdictional authority. If the fire escapes initial attack, and, with concurrence of the Fire Chief (or his/her designee) and the County Sheriff (or his/her designee), the fire exceeds the ability of the local district to suppress; the fire may be transitioned to the County Sheriff for control.

If the fire, with concurrence of the County Sheriff (or his/her designee) and a Division of Fire Prevention and Control, Fire Management Officer, is beyond the ability of the County to suppress, may transition the fire in part or whole, to the state for management.

All agencies within Weld County will utilize the Incident Command System for wildland firefighting operations.

Fires occurring on the Pawnee National Grasslands should be responded to by the closest, most appropriate resource. Suppression actions should be initiated by the first agency to arrive at the fire. The Incident Commander will ensure that the USFS is notified.

Fire agencies responding to fires within their own jurisdiction may follow their policies on qualifications and Personal Protective Equipment. Fire Agencies responding outside of the County in response to a fire managed by the State or Federal Government will comply with NWCG standards on qualifications and Personal Protective Equipment.

Special Management Considerations

There are many active, oil and gas well sites within Weld County. While not usually at risk of becoming involved from a grass fire, they do pose a potential health risk to responders. When operating near these sites, it is advisable to request a representative from the oil or gas company to provide technical assistance as needed.

Use of roads on federal lands presently closed to vehicular travel is hereby authorized to all parties to this AOP, when said parties are on a fire detection, prevention, or suppression mission. The Pawnee National Grassland or Fort Collins Dispatch should be notified of any closed roads used during fire suppression.

Aerial application of fire retardant will be restricted within 300 feet distance of all lakes or watersays (containing water) on Federal jurisdiction lands.

Repair and Rehabilitation

Repair of impacts caused by suppression actions is normally conducted during suppression operations and is considered part of the suppression cost.

Rehabilitation of natural resources impacted by fire effects is the responsibility of the jurisdictional agency. Rehabilitation of the fire area is not covered under suppression; it may be authorized by the DFPC Line Officer only when part of the Incident Action Plan.

Decision Process

The USFS utilizes the Wildland Fire Decision Support System (WFDSS) on extended attack fires to assist with guiding its fire management decisions for fires occurring on its lands. The signatory agencies to this AOP agree to participate in the WFDSS process, when assisting with fires occurring completely or partially on USFS lands.

For fires that are managed by the State, a documented decision process is required. The WFDSS information may be utilized for jointly managed fires.

Cooperation

All of the fire protection districts within Weld County should have current mutual aid plans in place and have agreed to cooperate to the extent possible to bring rapid stabilization of wildland fires occurring in, near, and around Weld County.

The County, the State and the USFS agree to cooperate to the extent possible to plan for and respond to fire incidents within the County.

Communication

All parties agree that a common communications plan is essential during a wildland fire event. As such, a common "Command" talk group will be established that all responders can operate on, and that can be monitored by dispatch.

Separate "Tactical" talk groups should be established for each division of the fire. These need to be accessible to all responders assigned to that division as well as the Incident Commander.

To accomplish this, a radio "bridge" may be required to link different radio systems together.

Communications with wildland fire aviation assets will occur on VHF channels as outlined in the aviation section of this AOP.

Cost efficiency

It is a goal of all signatories to this AOP to provide cost efficient services. Agency administrators will make every effort to ensure cost effectiveness during firefighting operations. However, cost efficiencies will not take priority over firefighter or public safety. Additionally, the potential long term financial impacts of the fire should be considered and balanced against the short term costs savings of not ordering needed resources.

Delegation of Authority

Parties to this operational plan agree that in the event of a multijurisdictional wildland fire which goes beyond the mutual aid period, a delegation of authority should be utilized by agencies involved to establish Incident Command, objectives, strategies, and financial considerations.

A written delegation of authority may be used whenever an agency, IMT or individual from other than the jurisdictional authority assumes command of an incident. The delegated individual or IMT has the authority and power to act on behalf of the jurisdictional agency, but **does not absolve the jurisdictional authority from any legally owed responsibility.**

A delegation of authority should include the following items;

- Authority having jurisdiction who is delegating authority
- Agency or individual accepting authority
- Specific authorities delegated
- Specific limits to the authority

- End terms of the authority

Preservation of Evidence

All parties agree to participate, to the extent legally possible, to assist each other in the investigational process. This includes the preservation of evidence.

The USFS maintains its authority to investigate fires occurring on the PNG. The County Sheriff agrees to work with the USFS as needed assist with any fire investigation on the PNG within Weld County.

The State requires that any fire for which DFPC has assumed responsibility, the County Sheriff shall conduct an investigation into the cause of said fire. All of the investigational materials will be reviewed in cooperation with DFPC to include evidence, notes, interviews, and the final investigation package. DFPC will not directly be responsible for criminal prosecution. This remains the responsibility of the law enforcement agency having jurisdiction

STATE EMERGENCY FIRE FUND (EFF)

Weld County is not a participant in the State Emergency Fire Fund program.

USE AND REIMBURSEMENT OF INTERAGENCY FIRE RESOURCES

Cost Share Plan (Cost Share Methodologies)

Cost-share agreements should be prepared when an incident burns across or threatens jurisdictional boundaries. The intent is to distribute the financial burden based on a method agreed upon by a representative from each affected jurisdiction. A cost-share agreement should be negotiated as soon as practical. The distribution of costs should be commensurate with the values protected.

For fires where the State has taken management/financial responsibilities, the County will maintain a reasonable minimum resource commitment as part of a cost share methodology. The minimum commitment will be documented and will be on an incident by incident basis.

Training

The Colorado Division of Fire Prevention and Control (DFPC) will serve as the representative to the Fort Collins Interagency Dispatch Zone Training Committee for County and Cooperator agencies. This Training Committee uses input from all agencies with wildland fire responsibilities including the County, Fire Protection Districts, and Volunteer Fire Departments to determine the training needs for the zone.

The USFS and DFPC have the ability to assist with the provision of wildland fire training within the County. The USFS and DFPC will assist agencies as available with requested trainings. With the exception of custom courses designed for specific objectives, all training provided by the USFS and DFPC will follow the current National Wildfire Coordinating Group standards as

outlined in PMS 901-1 "Field Managers Course Guide". The costs for these courses will be negotiated on a case by case basis.

USFS and DFPC will provide training to Weld County Regional Dispatch personnel on an annual basis. This may include new information or a refresher course on communication with Ft Collins Interagency Dispatch.

Communication Systems

For the purposes of conducting business authorized by this plan, all parties to this operating plan agree that assisting agencies may use the jurisdictional agency's radio frequencies as needed to conduct emergency communications on fires of the jurisdictional agency. No party to this operating plan will use, or authorize others to use, another agency's radio frequencies for routine day to day operations.

Weld County currently utilizes an 700/800Mhz Digital Trunked Radio System for its daily operations and is part of FRCC. A State or County mutual aid talk group will be assigned by Weld County Regional Communications Center for out of area resources responding within the County.

VHF Radio frequencies will be needed for certain Federal and State resources. Generally, the VFIRE frequencies will be available for this purpose. A radio bridge may need to be established to ensure consistent incident communications.

Fire Weather Systems

Information on Fire Weather Stations, Fire Danger, Current Fire Situation, Current Fire Restrictions, and other information can be seen at the FTC website:

http://gacc.nifc.gov/rmcc/dispatch_centers/r2ftc/

Red Flag/Fire Weather Announcements - The National Weather Service in Boulder periodically issues "FIRE WEATHER" watch and "RED FLAG" warning bulletins. Fire Weather Forecast information can be seen at the National Weather Service's Fire Weather Index Page: <http://www.crh.noaa.gov/bou/awebphp/fireindx.php>

Critical fire weather should be broadcast to all fire agencies within the County by Weld County Regional Communications Center.. Incident Commanders should request a "Spot Weather Forecast" for wildland fire incidents to ensure up to date information on weather conditions.

Aviation Operations

Weld County and the Fire Districts and departments within the county may contract with local aviation resources for fire suppression. The benefiting agency will be responsible for establishing ordering, use, and reimbursement guidelines for the utilization of said aircraft.

Other firefighting aircraft may be ordered through the Fort Collins Interagency Dispatch Center. The requesting agency may be wholly responsible for any and all costs associated with such resource.

Fire suppression aviation resources will be authorized by the Weld County Sheriff (or his/her designee) and or the Weld County OEM Director. Authorized orders for aircraft will be sent to the Weld County Regional Communications Center, who will then contact Fort Collins Interagency Dispatch. A list of current personnel designated by the Sheriff to order aircraft will be given to Fort Collins Interagency Dispatch.

Aircraft ordered from Fort Collins Interagency Dispatch will operate on VHF Radio frequencies and not the DTRS. The incident MUST have VHF communications in place when ordering aircraft. All Air-to-Ground communications will be on the assigned A-G frequency for North East Colorado **Air/Ground 9; 166.9125**. Aircraft that cannot communicate with ground forces will not engage in suppression operations.

National Guard helicopters with water buckets may be available for use. These resources MUST be ordered through the State EOC process and may take several hours to mobilize. These resources will utilize VHF radios for communications. The requesting agency may be wholly responsible for any and all costs associated with National Guard resources.

The following information will be included in all aircraft requests:

- ✓ Incident Name
- ✓ Location (legal description and/or latitude and longitude)
- ✓ Jurisdiction
- ✓ Air Contact with air to air radio frequency
- ✓ Ground Contact with air to ground radio frequency
- ✓ any other aircraft in the area
- ✓ Weather conditions on the fire

Billing Procedures

The procedure for reimbursement through the USFS or State will occur via the Cooperative Resource Rate Form (CRRF). Billing may be made for equipment and/or personnel listed on the CRRF with the corresponding documentation. Current procedures and forms can be found at the DFPC website <http://dfs.state.co.us/>

Wildfire Emergency Response Fund (WERF) is a mechanism for County and local agencies to offset the costs of resources through State funds. Generally, aviation and handcrew resources may be reimbursed, within guidelines, back to the benefiting agency. Current WERF guidelines can be found at <http://dfs.state.co.us>

Cost Recovery

All signatories to this AOP reserve the right to pursue reasonable cost recovery efforts for equipment, personnel, and supplies utilized in response to a wildland fire that extends beyond

the mutual aid period. This includes the facilities and administrative fee, also known as indirect rate. This includes pursuing legal action against any party determined to be responsible for the cause of the fire

GENERAL PROVISIONS

This AOP is the framework for cooperation between the State, Weld County and the Arapaho Roosevelt National Forest / Pawnee National Grassland. It does not supersede any other lawful policy, rule, or procedure. This AOP may be utilized as part of the County's master emergency operations plan. The County is encouraged to create AOP's, MOU's and Plans with their local response agencies.

Personnel Policy

All government employees shall be employed at their regular salary rate. All non-government employees will be paid at agency department/Office rates. If no agency department rates have been set, then DFPC established rates will be used. These can be found at the DFPC website <http://dfs.state.co.us/>

Modification

Changes may be made to this plan at anytime during the plan cycle as needed. These changes must have the concurrence of all parties before being placed into the plan document.

Annual Review

This plan requires annual review and will require re-authorization by all parties prior to April 1.

Duration of Plan

This plan is to be considered in full effect upon the date of the signatures. This plan will remain in effect until rescinded by the parties, or until April 1, 2015, whichever occurs first.

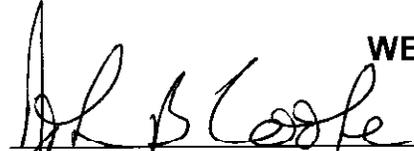

Previous Plans Superseded

Any and all previously dated Annual Operating Plans pertaining to wildland fire within Weld County are hereby null and void upon the date of the signatures on this current plan.
