

Pueblo Interagency Dispatch Center

2014

MOB GUIDE

Pueblo Interagency Fire Board has reviewed and accepts this MOB Guide for the PIDC Zone.

This document will remain in effect and can be amended as needed with the changes being approved by the current PIFB chair or acting.

Chapter 10

Objectives, Policy, and Scope of Operation

10. Mission

The principal mission of the Pueblo Interagency Dispatch Center (PIDC) is to provide Initial Attack services and Resource Mobilization in a cost effective and timely fashion using resources identified in the PIDC CAD system and local cooperator's resources.

In addition, PIDC provides resource coordination, dispatching support to incidents in and outside of the PIDC boundary, intelligence gathering and dissemination.

The PIDC Mobilization Guide is intended to facilitate interagency dispatch coordination ensuring the timeliest and most cost effective incident support.

11. Scope of Operation

Initial Attack, extended Attack, and resource mobilization will be done by the PIDC for the PSICC, RGD and SLVI-FMU.

PIDC will assist DFPC, Colorado Counties (29), Fire Departments located in identified Counties (200+-) , USFWS, NPS, BIA, KFS, DOD and Kansas Counties (105) as needed or requested with a proper fire code applied for billing purposes.

For a non-wildfire incident the jurisdictional agency will need to supply a valid billing code for reimbursement with a valid agreement in place before services can be rendered.

Chapter 20

Administration Procedures

A. All local initial attack resources will be dispatched using the WildCAD system that PIDC has primary jurisdictional responsibility for (PSICC, RGD, and SLVI-FMU).

1. PIDC STAFFING

Normal staffing hours are 0800-1630 Monday through Friday, and can be adjusted as needed to meet workload.

PIDC will staff seven (7) days a week from when activity warrants until at least October 15th.

During non-staffed hours, PIDC can be reached through the 24-hour answering service by dialing 719-553-1600.

2. PIDC PRIORITIES

Initial Attack jurisdictional responsibility (PSICC, RGD and SLVI-FMU)

Initial Attack Cooperating agencies

Extended Attack jurisdictional responsibility (PSICC, RGD and SLVI-FMU)

Extended Attack Cooperating agencies

Resource Orders Regionally

Resource Orders Nationally

3. RESOURCE MOBILIZATION

PIDC will honor and process orders for initial attack 24 hours per day.

PIDC will only mobilize resources for non-initial attack during the hours of 0500-2200.

Resource requests will be filled by jurisdictional agency first.

Non-Federal Agencies will follow the established guidelines set forth in each respective Counties AOP.

PIDC understands that if a Resource Order is received, the proper authorization and approval has been met.

PIDC will initiate Article 28.2 of the National Federation of Federal Employees (NFFE) Master Agreement “When a staffing level 300 individuals on a Forest Service incident or 300 Forest Service employees on other than a Forest Service incident is reached and a command post has been established, the Council Vice-President (CVP) or designee will be notified within 24 hours after the staffing reaches 300. That notification will inform the CVP or designee of the location of the incident and the name of the Incident Commander (IC). The IC will be notified of the name and contact information of the CVP or designee.”

Region 2 Dispatch Centers will provide the CVP with names and contact information for the Incident Commander, Human Resources Specialist (HRSP), and Agency Administrator.

Region 2 CVP contact information is available through PIDC.

4. FILL or UTF

PIDC will give the resource 30 minutes to contact PIDC to fill the order

PIDC will move on to the next resource if confirmation is not received at the end of the 30 minutes.

5. BILLING/REIMBURSEMENT

Resource Orders are used for billing documentation between agencies, ordered resources need to maintain copies. If at any time a resource order is needed, one can be requested from PIDC.

6. PROCUREMENT

Each jurisdictional agency has the responsibility to supply procurement support.

PIDC personnel are not able to purchase supplies for incidents.

7. TEAM ORDERING

PIDC will process orders for Type 1, 2, 3, and NIMO teams as requested.

For Type 1 and 2 teams, a long team configuration will be the normal response, unless the requesting unit specifically requests a short team. (Total of 9 positions, C&G, Refer to NMG 60).

B. ROSS AVAILABILITY AND DEFINITIONS

ROSS will be used to fill requested orders.
Agencies are responsible for updating their availability in ROSS.

ROSS is swept on the first Monday of every month, Cooperator resources availability will be set to **unavailable**.

PIDC ROSS availability is defined as:

Federal resources –

- Available Locally – to be used for statusing of team members and priority trainees
- Available Regionally – to be used for mobilization within the RMA
- Available Nationally – to be used for mobilization throughout the Nation

State and County resources –

- Available Locally – to be used for statusing of team members, priority trainees and within the PIDC Zone
- Available Regionally – to be used for mobilization within the RMA
- Available Nationally – to be used for mobilization throughout the Nation

1. STATUSING AVAILABILITY

PIDC will post a Twitter message “ROSS Status has been swept; please set your availability accordingly, thank you”.

Resources will need a NAP User Account to manage their availability in ROSS.

2. PASSWORDS

Due to security requirements PIDC can no longer reset passwords:

To reset passwords go to: NAP Password Policy at: – <https://nap.nwcg.gov/NAP/>

- Standard Account Passwords expire after 60 days.
- Accounts are locked after five (5) failed login attempts per session. There will be a 15 minute lockout before the user may attempt to log on again.
- Users must establish security challenge questions to reset a forgotten password.

C. AIRCRAFT

1. Generally, all aviation resources are considered I.A. resources and are subject to diversion at any time for higher priority incidents based on consideration of safety and values at risk.

PIDC will follow agency guidelines and procedures for ordering additional air support needed or required (Air Attack, Lead or ASM).

2. AIR-TO-GROUND FREQUENCY

PIDC will issue Air-to-Ground frequencies. The jurisdictional agency is responsible to insure they have the needed frequency to communicate to any aircraft ordered.

If a communication liaison person is needed, one can be requested through PIDC.

Communications with aircraft must be in place in order to mix aircraft.

3. TFR

At the request of the jurisdictional agency, PIDC will process TFR's for any incident requiring one. The jurisdictional agency and PIDC will work together to gather the information needed for the TFR.

A. INTELLIGENCE

1. SPOT WEATHER REQUESTS

Each jurisdiction has the ability to submit a spot weather forecast to the appropriate NWS office. Websites are listed below.

PIDC will provide this service for the PSICC, RGD and the SLVI-FMU as needed.

PIDC will submit the spot weather forecast to the appropriate NWS office by website for incident personnel to be able to view. In the event of internet loss, PIDC will submit by fax or phone

When requesting your spot weather request, please identify your local NWS office, and if you would like the spot to be returned to you by email, fax, radio, or phone. NWS offices are listed below:

Boulder, CO. - <http://www.crh.noaa.gov/bou/>
Pueblo, CO. - <http://www.crh.noaa.gov/pub/>
Dodge City, KS. - <http://www.crh.noaa.gov/ddc/>
Goodland, KS - <http://www.crh.noaa.gov/gld/>
Topeka, KS. - <http://www.crh.noaa.gov/top/>
Wichita, KS. - <http://www.crh.noaa.gov/ict/>
Hastings, NE. - <http://www.crh.noaa.gov/gid/>
Pleasant Hill, MO. - <http://www.crh.noaa.gov/eax/>
Springfield, MO. - <http://www.crh.noaa.gov/sgf/>

2. SITUATION REPORTING

PIDC will report incidents that have been officially reported to PIDC by phone, e-mail or through the ICS-209 system.

3. RX ADVANCE NOTIFICATION

PSICC, RGD and the SLVI-FMU agree to use the advance notification reporting form located on the PIDC web page.

All agencies may use the advance notification reporting form if they would like to be added to the situation report

B. RED FLAG WARNINGS

Red Flag Warnings are read over the radio only to the PSF, RGD and the SLVI-FMU. Red flag information is available through the NWS office web pages.

C. PIDC ANNUAL REPORT

PIDC annual report will be completed by January 31st, and posted on the PIDC web page.

D. PIDC ZONE MAC

Consist of members from the Pueblo Interagency Fire Board (PIFB). PIDC Center Manager will coordinate with the PIFB Chairperson to activate as needed or requested..

E. PIDC ZONE PREPAREDNESS LEVELS

Each Agency is responsible for reporting their local preparedness levels to PIDC, if not reported PIDC will show a one (1) until reported.

1. PREPAREDNESS LEVEL 1

DESCRIPTION: Little or no fire activity in the zone.

- Few resources are committed in or out of zone.
- Conditions exist for normal prescribed fire operations.

MANAGEMENT ACTIONS: Unit(s) will determine appropriate actions

- **PIDC Normal Staffing**

2. PREPAREDNESS LEVEL 2

DESCRIPTION: Wildfire activity has increased with most fires remaining at low to moderate complexity.

- One or more units experiencing moderate to high fire intensity with A, B, and C fires occurring, local units and adjacent cooperators handling situation with little support through PIDC. Potential exists for mobilizing resources through PIDC.
- Resources are adequate for prescribed fire activity.

MANAGEMENT ACTIONS: Unit(s) will determine appropriate actions.

- **PIDC staffing will be extended to meet the demand.**

3. PREPAREDNESS LEVEL 3

DESCRIPTION: High potential exists for fires to be moderate to high complexity.

- A number of fires having potential of becoming class C or larger.
- ERC's and BI's from four or more weather stations in the zone are in the very high to extreme range.
- One or more units 9 experiencing incidents requiring commitment of zone resources.
- Additional resources are being ordered or a majority of zone resources are committed to zone and / or regional incidents.

MANAGEMENT ACTIONS: PIDC will monitor commitment of resources for competition between units or shortages and notify Unit Managers and PIFB of possible shortages.

- **PIDC staffing will be extended to meet the demand.**
- **An Intelligence, Initial Attack or Support Dispatcher will be ordered as needed.**

4. PREPAREDNESS LEVEL 4

DESCRIPTION: High complex large fire activity is occurring.

Fires are escaping initial attack as evident by the number of C or larger fires.

- Fire severity is very high to extreme as reported by three or more units.
- One or more PIDC units are experiencing an incident requiring Type 1 or 2 team.
- Majority of zone resources are committed.
- Priority setting is needed for critical resources.
- Additional resources are being ordered from the neighborhood and RMC.

MANAGEMENT ACTIONS: Activate PIFB MAC as per PIDC Mob Guide.

- The group will determine fire priorities within the zone.
- Request preposition of critical resources.
- Expand PIDC dispatch organization to meet current and anticipated needs.
- Extend hours to meet the demand.
- Regional and National Guidelines will determine if Prescribed Fire activity will be permitted.

- May require staffing of PIDC 24 hours/day- 7 days per week

5. PREPAREDNESS LEVEL 5

DESCRIPTION: High complex large fire activity is occurring.
Multiple large fires in Zone.

- Fire severity is extreme.
- PIDC open 24 hours/day-7 days per week.

MANAGEMENT ACTIONS: PIDC staffed to meet demand or orders placed for the demand.

CHAPTER 40

Cooperation

40 AOP, PIDC follows the established AOP's for each County that has one.

41 Colorado Interagency Cooperative Fire Management Agreement.
(Refer to RMCG 42.1)

42 Statewide AOP that tiers to the Agreement

43 Colorado National Guard and USDA, Forest Service, Region 2 Agreement.
(Refer to RMG 42.3)

44 Neighborhood Resource Ordering

The following list defines the approved neighborhood for PIDC

FTC – Fort Collins Interagency Dispatch Center

GPC – Great Plains Interagency Dispatch Center

DRC – Durango Interagency Dispatch Center

MTC – Montrose Interagency Dispatch Center

1. Boundary Resource Ordering

The follow list defines the neighborhood boundary region/states for PIDC

Region 3 Dispatch Centers

TAZ – Taos Interagency Dispatch Center

ABZ – Albuquerque Interagency Dispatch Center

Region 8

AOICC – Arkansas/Oklahoma Interagency Coordination Center

Region 9

MICC – Missouri/Iowa Coordination Center

CHAPTER 50

NOT LISTED

CHAPTER 60

Overhead / Crews

60 OVERHEAD

PIDC will fill overhead for assignments outside of the zone based on availability that is statused in ROSS.

PIDC does not generally fish (look for resources not statused as available).

PIDC will use a 30 minute fill or UTF guideline.

1. PIDC will fill orders based on the Jurisdictional agency requesting the resources.
2. PIDC can only fill overhead orders with personnel listed in ROSS and showed as available.
3. Name Request/Suggest

If a resource is aware that a name request/suggest is coming they need to notify PIDC so that PIDC can notify RMACC.

NOTE: A name request/suggest may not be honored.

3. a. Priority Trainee's

When PIDC receives a name request for a priority trainee, even if status in ROSS is unavailable, PIDC will make contact with that trainee to confirm with them that they are waiting for the order, if so; PIDC will make them available in ROSS and will fill the order.

If the priority trainee is not available, PIDC will UTF the order.

4. Supplemental Resources

Overhead personnel that are listed as available in ROSS and that live within the established boundary will be dispatched first and resources that live outside the established boundary that are listed as available will be dispatched after.

61 CREWS

1. PIDC CREW LISTING

Type 1 Crews

Pike IHC- Monument, Co.

Type 2 I.A.

San Isabel Regulars – Canon City, CO.

Rio Grande Regulars – Monte Vista, CO.

Mid Plains – Kansas mobilize out of Denver, CO.

Type 2

Juniper Valley – Canon City, Co.

Juniper Valley – Buena Vista, Co.

2. Minimum crew standards

(Refer to NMG 62.2)

3. CREW STATUS

For Type 2 I.A. and Type 2 crews after they have been statused as available.

The Crew boss will send PIDC a roster for the crew.

When the crew has received an order the crew boss will send an updated roster to PIDC in case there are any changes in the original.

4. PIDC Crew Dispatch Guideline

Initial Attack

Closest crew or as requested by jurisdictional agency

Extended Attack – resource orders

First by jurisdictional agency

(Federal incident federal resources, State/County incident State/County resources)

Second by Availability date

Third (if needed) by location

*All CRWB-trainees must be approved by the ordering agency

Chapter 70 Equipment/Supplies

70 ENGINES

1. Initial Attack

PIDC will dispatch resources using the closest forces concept.

2. MOBILIZATION

Engines need to be available in ROSS along with the crew members that will be on the unit.

If the personnel are not statused in ROSS the engine cannot be mobilized.

3. Non-Federal Engine Mobilization -

See Appendix A - (NON-FEDERAL LIST OPERATING GUIDELINES)

71 SUPPLIES

1. It is up to each jurisdiction to order supplies as needed.

CHAPTER 80

AIRCRAFT

70 AIRCRAFT

1. PIDC will fill orders from within zone and then go out of zone as needed through the RMACC for assistance. It will be up to PIDC following guidelines and procedures to order any additional air support needed or required (Air Attack, Lead or ASM). It will always be up to the pilot to accept or decline any mission.

2. AIR TO GROUND FREQUENCY

Will be issued by PIDC, it is the jurisdictional agency responsibility to insure they have the needed frequency to communicate to any aircraft ordered or make arrangements with PIDC to send a liaison communication person. Without an established form of communication there could be a delay in using the requested resource or the aircraft may not be mobilized. PIDC cannot mix aircraft that cannot communicate with each other on standard frequencies assigned by PIDC.

If an Aircraft cannot communicate with the incident, the aircraft will be advised to return or orbit while PIDC attempts to establish communication with the incident. If PIDC or the aircraft cannot establish communication PIDC will recommend that the aircraft return to base. It will be the pilot's discretion if they choose to continue without established communications.

3. TFR

PIDC will process requests for TFR's as needed..

4. FLIGHT FOLLOWING

PIDC will follow Region 2 Mobilization Guide Chapter 20.

5. WHO CAN ORDER AIRCRAFT

Non-Federal Agencies will follow the established guidelines set forth in each respective Counties AOP.. It is understood that when PIDC receives an Aircraft Order that the proper authorization and approval has been met.

6. **Ordering Aircraft** – PIDC will need the following to place order

1. Name of incident
2. Descriptive location
3. LATITUDE.
4. LONGITUDE (degree/minutes)
5. Ground Contact
6. What is being ordered (SEAT, Heavy, Helicopter)
7. Values at risk (how many structures, power lines etc...)
8. Date and Time needed
9. Ability to communicate on assigned radio frequency given by PIDC

NOTE: Without an identified location (Lat/Long, or T, S and R) PIDC cannot dispatch aircraft which can cause a delay in processing the order.

A. Filling an Aircraft Order

1. Once order is filled, PIDC will relay the following information to the ordering agency:
 - a. Air to Ground Frequency assigned
 - b. Request number
 - c. Resources requested
 - d. Resource assigned
 - e. Resource ETD and ETA

7. PRIORITIZING AIRCRAFT

PIDC jurisdictional agencies prioritize aircraft for their incidents.

County Responsibility - County authorities are responsible for prioritizing incidents with-in their jurisdiction.

Appendix A

2014 Pueblo Zone Non-Federal Engine Mobilization List Application

The Pueblo Interagency Zone Fire Board is soliciting applications for the annual *Pueblo Interagency Dispatch Zone Non-Federal Engine Mobilization List*. The purpose of this list is to document the interest of State and local government agency participation in extended attack wildland fire response outside of the Pueblo Zone.

REQUIREMENTS

- Interested agencies must complete the annual *Pueblo Zone Non-Federal Engine Mobilization List Application* to formally document interest and necessary preparation for deployment outside the Pueblo Zone.
- Agencies that status engines as “Available” in ROSS will accept the assignment. Repeated refusals of assignments when statused as “Available” may result in temporary removal from the list.
- Manage the availability of equipment and personnel through the agency ROSS Duty Officer web status account.
- Document personnel qualifications, experience, and training records in IQSweb in a manner acceptable to the responsible state agency.
- Complete an agreement through the state in which agency is located to establish equipment rates and equipment ROSS entry (i.e. Cooperative Resource Rate Form, or CRRF, for Colorado agencies).
- Agencies will follow this timeline for mobilization:

0 minutes	Call from PIDC to agency requesting engine for deployment.
0-20 minutes	Agency accepts assignment from PIDC for deployment.
0-30 minutes	Agency provides names of personnel to PIDC for resource order.
0-120 minutes	Agency departs from Home Unit to incident.

PARTICIPANTS

Any state or local government agency in the Pueblo Zone that is available for fire assignments at the GACC or NATIONAL level may participate on this list:

Colorado local governments

Kansas local governments

Colorado Division of Fire Prevention and Control

Kansas Forest Service

NON-FEDERAL ENGINE LIST ESTABLISHMENT

A Colorado Division of Fire Prevention and Control representative, Colorado State Fire Chiefs-Wildland Section representative, and a Kansas representative will meet and develop a list from the applicants annually. This list will be generated using the random list generator in Microsoft Excel. Any agency that fails to meet the application deadline will be placed at the bottom of the list. Once the list is approved by the Board the list is final. Each agency's position on the list will be applied to all equipment from that agency. The final, approved list will be provided to the PIDC Center Manager for use in dispatching engines outside the Pueblo Zone.

NON-FEDERAL LIST OPERATING GUIDELINES

BACKGROUND

Engines are typically dispatched based upon jurisdiction, i.e. - federal engines are utilized first to fill resource orders on federal incidents, state engines are utilized first to fill resource orders on state incidents, and local government agency engines are utilized first to fill resource orders on private/non-federal/non-state incidents. Available federal and state engines are often exhausted early in the process. Local government agency engines are then utilized to fill outstanding resource orders regardless of jurisdiction.

PROCESS

PIDC will facilitate the use of the Non-Federal Engine Mobilization List in a rotational manner. The first agency on the list is the first considered for assignment, if the agency is available in ROSS and able to meet the reporting timelines. As PIDC progresses through the list, PIDC shall indicate which agency was last given the opportunity for an assignment. The next agency on the list is first considered for the next assignment, as indicated on the rotation list by a magnet or marker. For example, PIDC receives resource orders for six engines. Assuming that all are available in ROSS and accept the assignments, agency number 7 would be the first considered for the next assignment. Agencies that are not available in ROSS will be bypassed, and will not be considered for assignment until the next rotation through the entire list. Agencies that are listed as available in ROSS but decline the assignment will be bypassed, and will not be considered for assignment until the next rotation through the entire list. Agencies with multiple resources of the same type will be only considered once per rotation, i.e. - the agency is listed on the rotation, not each individual resource.

IMPORTANT DATES

1 st week in January	Annual <i>Pueblo Zone Non-Federal Engine Mobilization List Application</i> distributed to State and local gov't.
1 st Friday in February	Deadline for emailed applications with original signatures to State agency reps
2 nd Monday in February	Official application review
3 rd Wednesday in February Pueblo Interagency Fire Board Spring meeting	Proposed final draft of annual Non-Federal Engine Mobilization List presented to Board for approval
End of March	PIDC publishes Board-approved annual Non-Federal Engine Mobilization List to annual PIDC Mob Guide
Calendar year	PIDC Center Manager utilizes annual Non-Federal Engine Mobilization List for the calendar year

CONTACTS

Direct any questions to your State agency fire representative:

Colorado Division of Fire Prevention and Control, Regional FMOs:

North Central FMO Kirk Will, 720-556-5100

South Central FMO Brenda Wasielewski, 719-963-7838

South FMO Joe LoBiondo, 719-466-3341

San Luis Valley FMO Phil Daniels, 720-315-4240

Kansas Forest Service:

Fire Management Coordinator, Ross Hauck, 785-313-3538

**2014 Pueblo Zone
Non-Federal Engine Mobilization List
Application**

Agency: _____

Unit Identifier: _____

Pueblo Interagency Dispatch Center (PIDC) staff will utilize the contact information listed in ROSS to fill resource orders. Participation on this list requires that both equipment and personnel are in the *Resource Order Status System* (ROSS). Identify the type of equipment available for dispatch outside the Pueblo Zone.

Type 3 or 4 Engine

Type 6 Engine

PIDC may utilize the established rotation list as a reference in the event of requests for other types of equipment, though resources other than the above referenced engines are managed by PIDC on a case-by-case basis and are not specifically included in this rotation.

This agency has NWCG-qualified personnel uploaded into ROSS. This agency has equipment in ROSS through a valid agreement with their state (i.e. Cooperative Resource Rate Form, or CRRF, for Colorado agencies).

I support the goals, commitment, and participation of this agency in the Pueblo Zone Non-federal Engine Mobilization List and Operating Guidelines.
