

2021 End of Year Report

PUEBLO INTERAGENCY DISPATCH
CENTER

Narrative

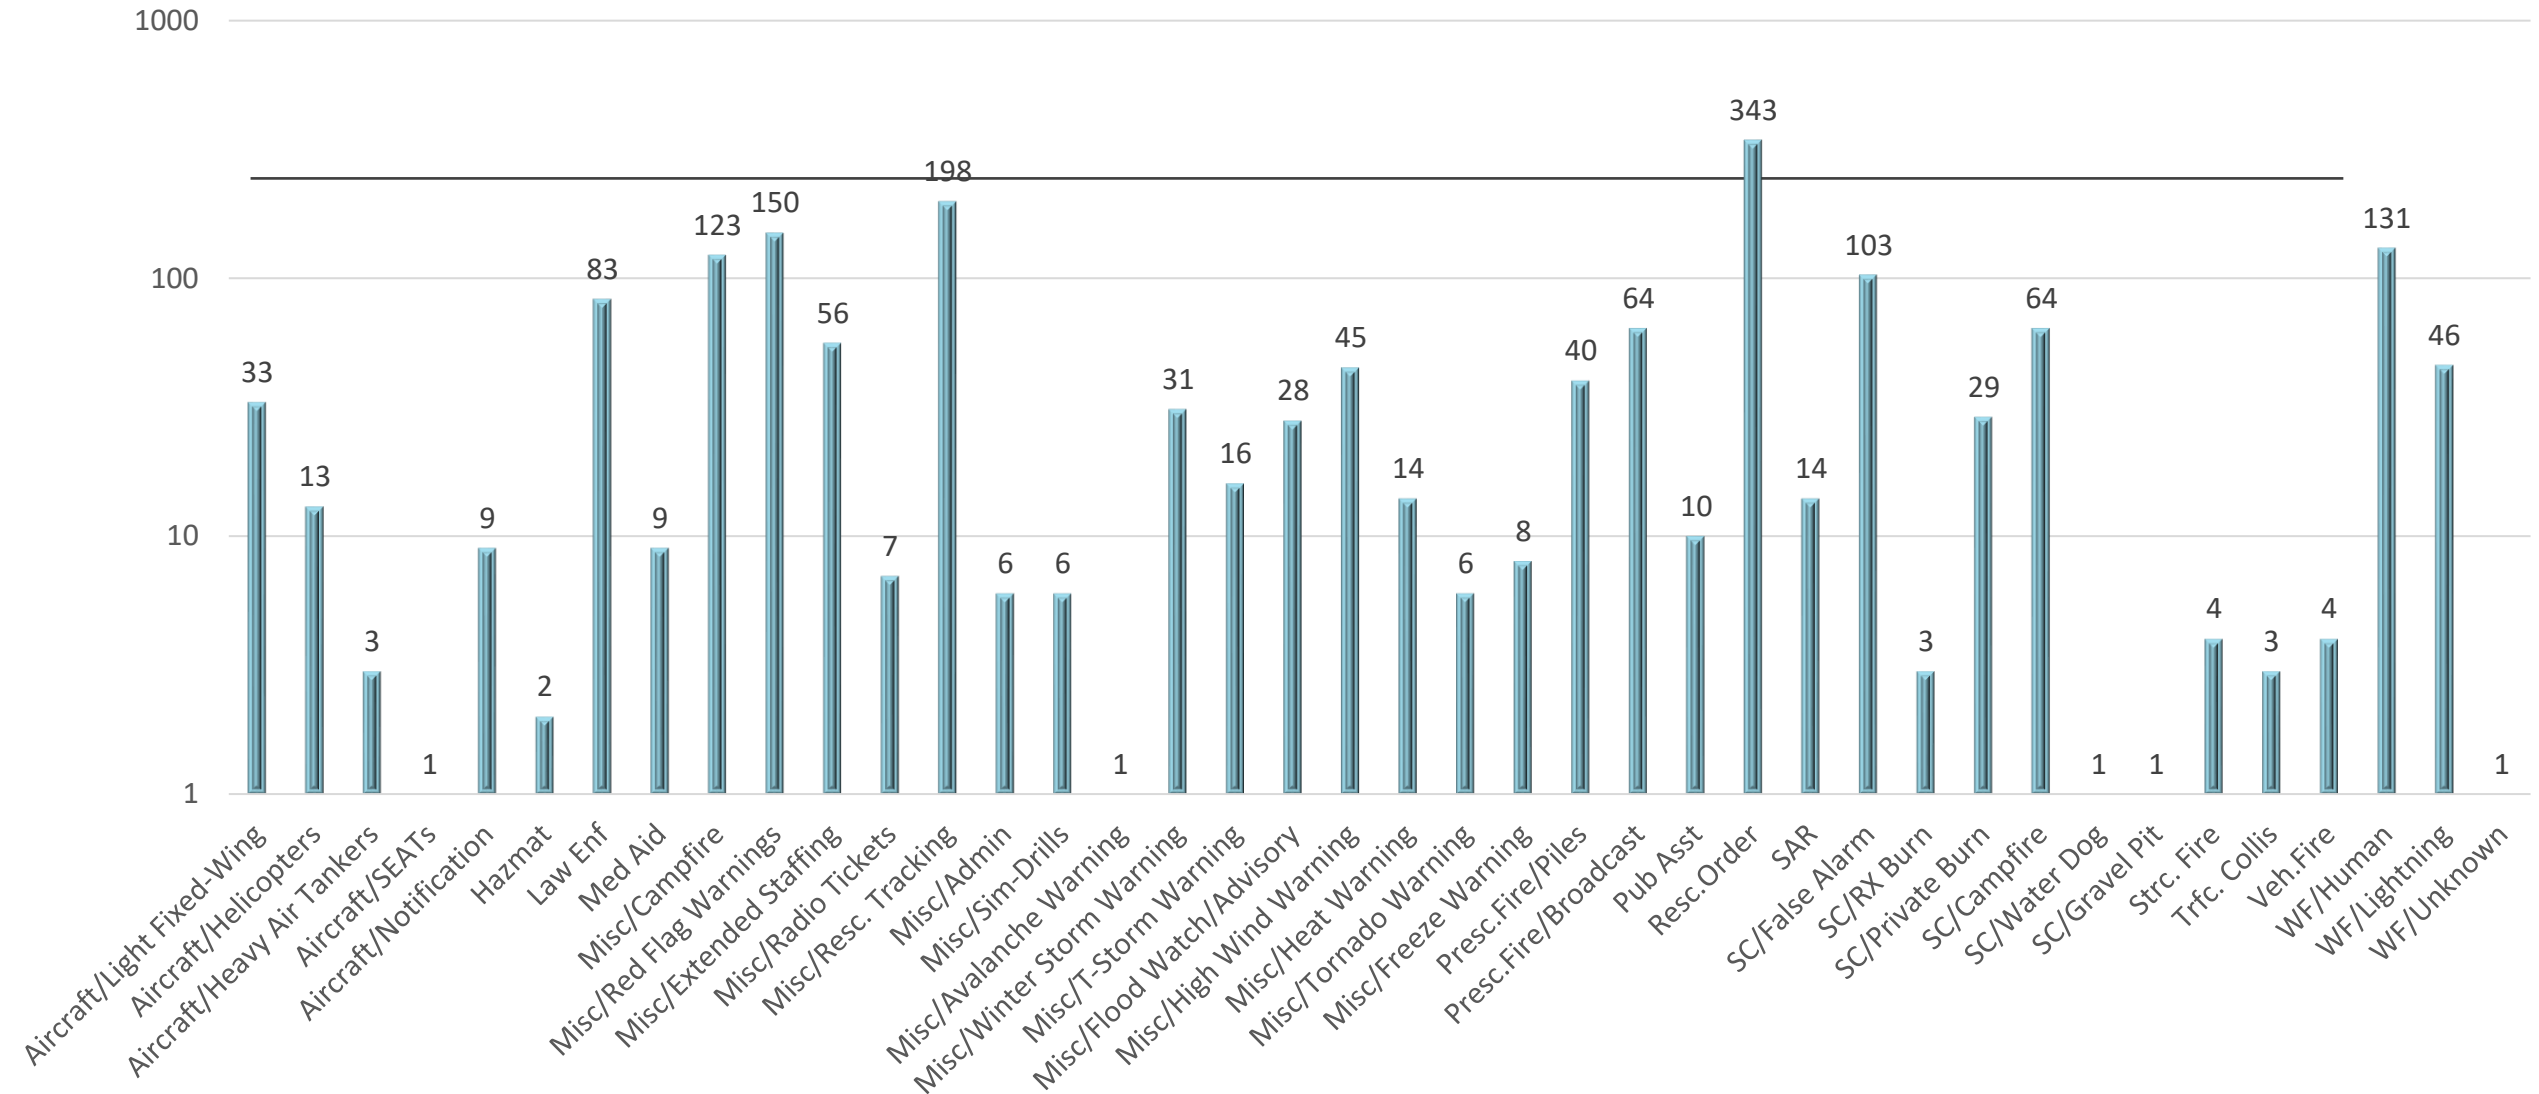

The 2021 fire season activity was the lowest on recorded in five years. The first wildland fire began on January 15th (800 acres) in Lane County, KS, and the last occurred on December 27th (152 acres) Jefferson County, CO. December ended the year with 3 large fires in Kansas for 12,1622 acres. A total of 167,054.46 acres burned within the dispatch zone, and the dispatch center supported one type 3 incident management team.

The year started with drier and above normal temperatures. Throughout the year fuel conditions still reflected years of drought and trends in fire indices in the 90-95 percentiles. Effective and aggressive initial attack reduced increase of fire size and control issues.

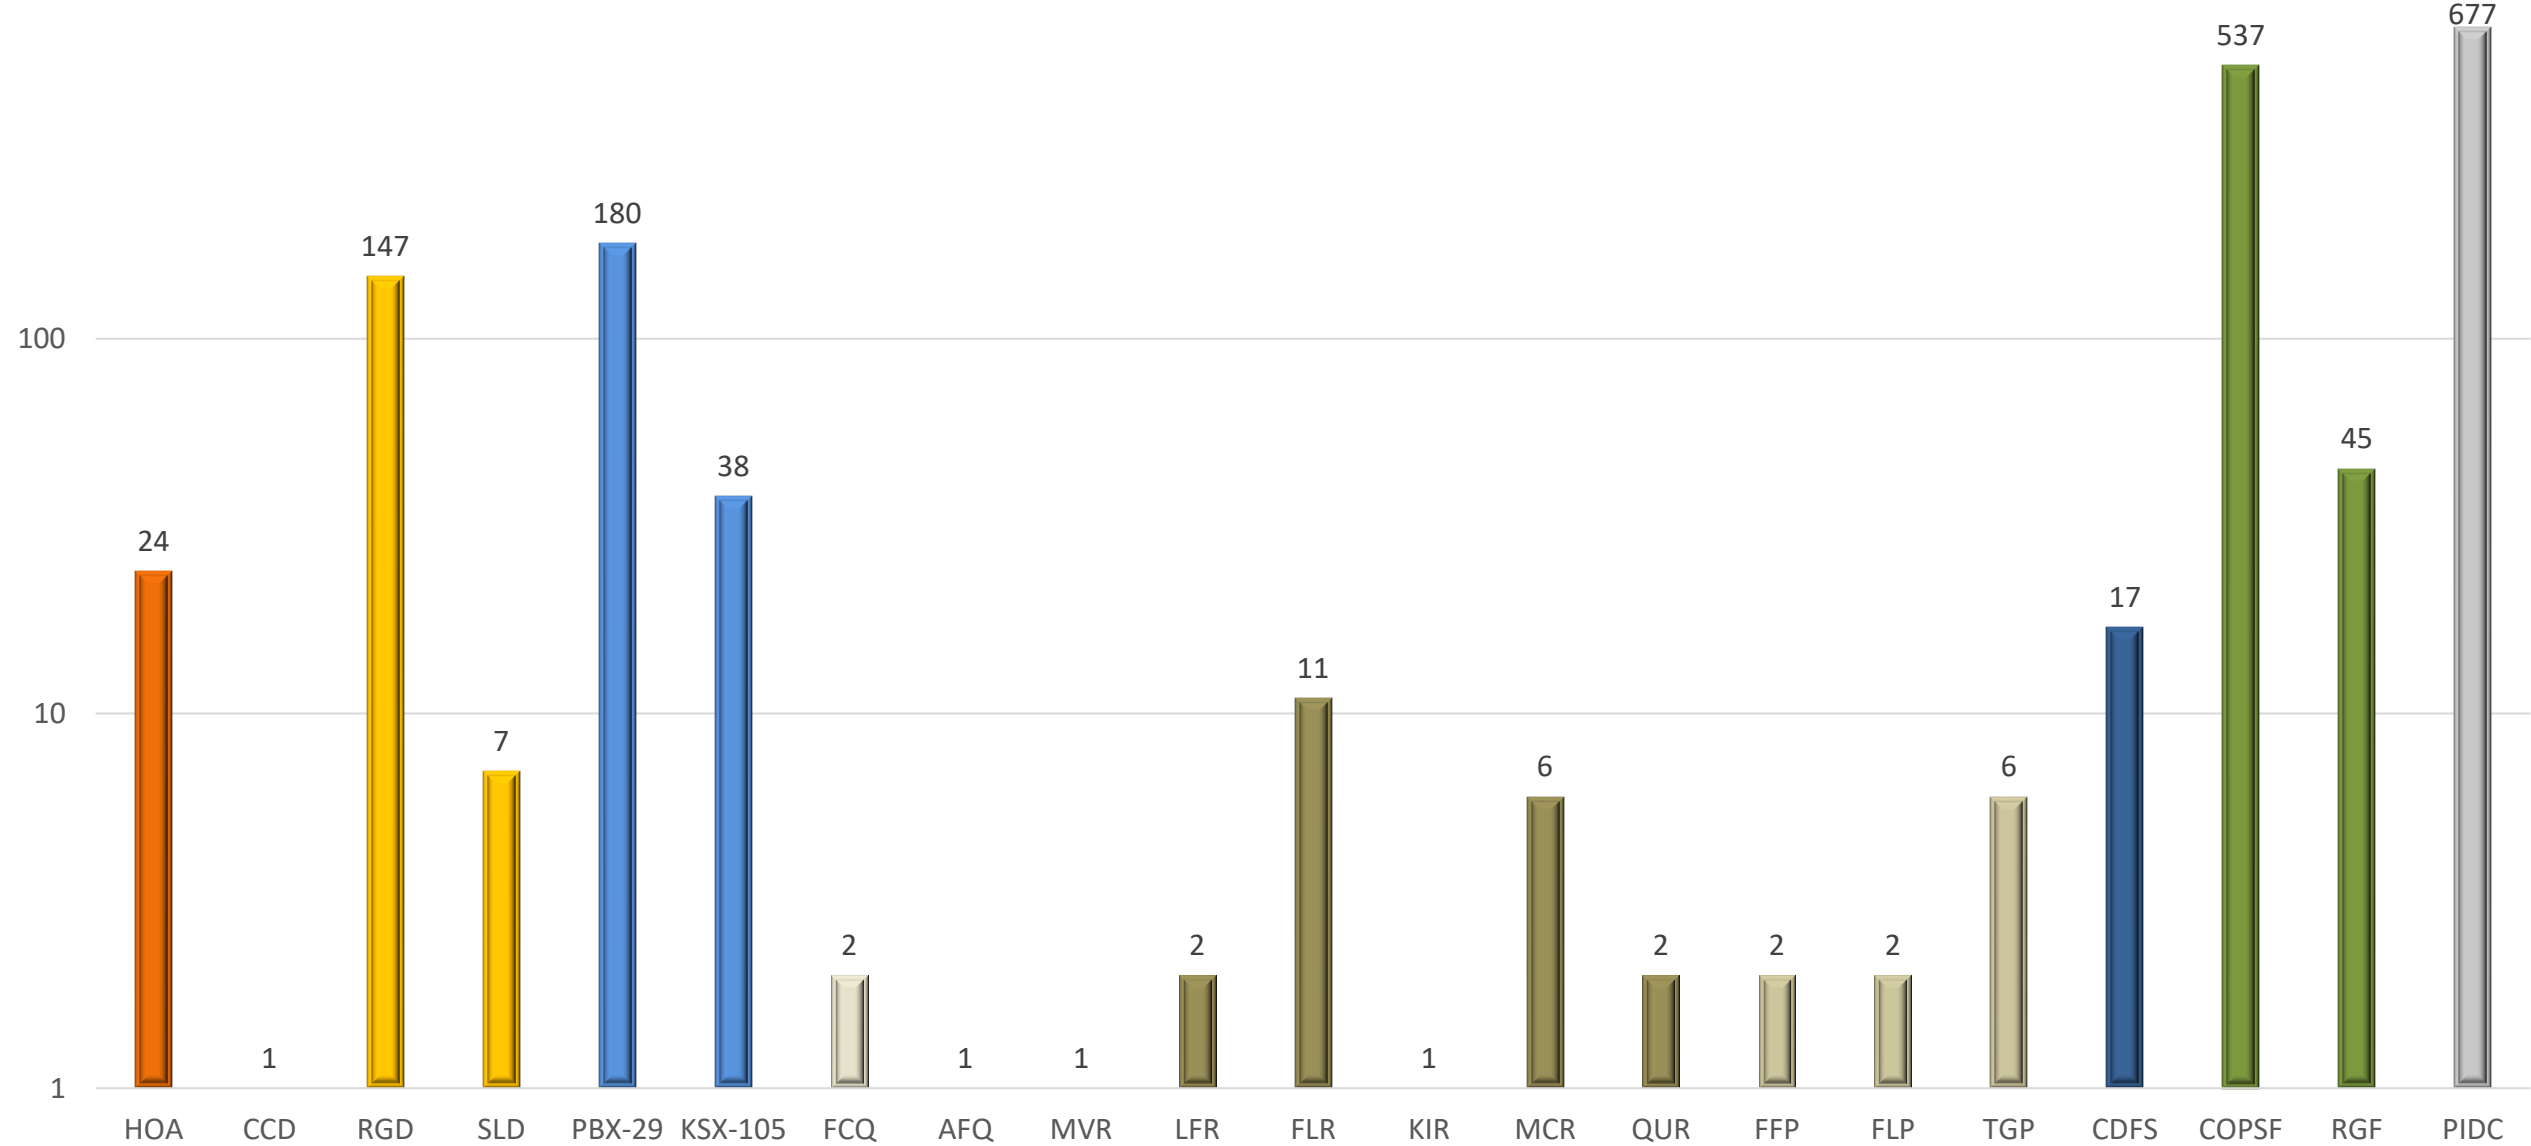

Expanded Dispatch was staffed for 7 months; mobilization of resources out of zone began in January with national requests in the assistance at COVID vaccination sites on the coastal states and continued with wildland fire support throughout the nation. The center mobilized over 2,000 resources this year in support of local and national efforts.

Pueblo Dispatch maintains a level of excellence in supporting all agencies within its zone.
