

2011

**WILDLAND FIRE MANAGEMENT ANNUAL OPERATING PLAN**

**CARBON COUNTY, WYOMING**

SIGNATURE AUTHORIZATION: By my signature below, I authorize my signature to be photocopied into each and all of the Annual Operating Fire Plans for the Wyoming Interagency Cooperative Fire Management Agreement, Carbon County, Wyoming. I understand that my agency will be provided a copy of the agreement with a photocopied signature page when the required signatures are obtained.

---

Arapahoe Complex Refuge Supervisor - USFWS Date

**This Plan is between the USDI Bureau of Land Management (BLM) High Desert District, Wyoming State Forestry Division (WSFD), USDA Forest Service (USFS) Medicine Bow/Routt National Forest and Thunder Basin National Grasslands, USDI Fish and Wildlife Service, and Carbon County.**

**All Federal Agencies, State, and County may hereinafter be jointly referred to as the “Agencies.”**

A. AUTHORITY:

Wyoming Interagency Cooperative Fire Management Agreement, NUMBERS 07-FI-11020000-018, 07-FI-11046000-017, USDI Bureau of Land Management #KAA020003, USDI National Park Service #H1249070030, USDI Bureau of Indian Affairs #AG7C500699 and the USDI Fish and Wildlife Service #14-48-60139-07-K001.

B. PURPOSE:

To outline details of implementing the Wyoming Interagency Cooperative Fire Management Agreement.

C. FIRE PROTECTION RESPONSIBILITIES & PRIORITIES:

**1. Wildland Urban Interface**

- On fires that threaten, or involve, the Wildland Urban Interface, the respective County’s Community Wildfire Protection Plan **and the Federal Agency Fire Management Plans** shall be referred to for suppression priorities and other information that could prove beneficial to the suppression efforts.
- Each agency will retain initial attack responsibility for lands under their protection responsibility.

**2. Reimbursable Fire Protection Services**

- Any fire which may occur where the Bureau of Land Management and Carbon County, State and USFS fire units, are operating together will be considered a reciprocal fire. On reciprocal fires, no matter what the ownership of the land, the first eight hours of fire fighting operations will be on a non-reimbursable basis. After the first eight hours, the agency responsible for the protection of the land will be billed for any ongoing fire fighting assistance. Only equipment requested through normal dispatch channels to remain on the fire after the mutual aid time period will be billed to the responsible agency.
- The entire county is considered as a reimbursable fire protection zone after the maximum (8) hours of protection.

**3. Reciprocal Fire Protection Services (Mutual Aid)**

- Description of reciprocal fire protection zone:
- **The entire** county is considered a reciprocal fire protection zone.
- Upon initial dispatch, within the reciprocal fire protection zone, each agency/county shall assume its own full cost of expenditures for a maximum of eight (8) hours per unit, from the time of dispatch. Costs incurred after the reciprocal fire protection period ends will be reimbursed by the protecting agency. The protecting agency will be determined as soon as possible. All fires will be reported to the protecting agency.
- Reciprocal protection is not construed as an automatic eight (8) hour dispatch. Therefore, priority will be given to the release of a supporting agency when it is mutually agreed upon by the initial attack forces that the fire situation is such that the protecting agency's forces on the scene can adequately control the incident. Furthermore, within its capabilities, the protecting agency will render support to the supporting agency to include but not limited to

food, water, and additional forces to expedite release of the supporting agency in advance of the maximum hour reciprocal fire protection.

4. STATE LAND

Initial suppression action on State Land will be taken by the County within their capability. This initial action will be reported promptly to the Wyoming State Forestry Division (see directory).

**Initial Attack on State Land in-holdings within the National Forest will be handled cooperatively by the USDA Forest Service and local resources with initial action reported to the State Forester as soon as possible for further instructions.**

5. OFFSET OR EXCHANGE:

There are no offsets or exchanges identified.

6. PROTECTION AREA MAPS

See Exhibit A.

D. SPECIAL MANAGEMENT CONSIDERATIONS:

**Heavy equipment will not be used on any lands without authorization and approval by the Land Use Owner/Agency.**

E. WILDLAND FIRE SUPPRESSION PROCEDURES:

1. NOTIFICATION AND REPORTING

- All wildfires and initial action will be reported promptly to the protecting agency and further instructions agreed upon. Upon notification, if the protecting agency fails to properly recognize and claim ownership, suppression costs for the protecting agency's proportionate share will be assessed them upon discovering and proof of ownership by the supporting agency.
- For list of contacts for notification or requests of assistance see the directory.
- A fire report shall be submitted to the protecting agency within 15 days after the fire is declared out.
- **All fires, initial action, and fires which may threaten BLM Lands will be reported immediately to the Rawlins Dispatch Center. Effective and continuous coordination will take place between Carbon County 911 Dispatch and Rawlins Dispatch Center.**
- **For all wildland fires on or threatening State land, or on private lands, please call Rawlins Dispatch Center:  
Rawlins Dispatch Center 800-295-9953  
(Fires within one mile of BLM land are considered a threat to BLM.)**

2. INITIAL ATTACK

**If a party to this agreement is the first to arrive on scene, they will assume command of the incident and remain in command until: (1) they are relieved of command by an IC from the jurisdictional agency, (2) they turn over command to a higher qualified IC, (3) Unified Command is put into place if a multi-jurisdictional fire, or (4) the fire is determined to be out.**

3. ESCAPED FIRES

Fires that Escape/Threaten to Escape Initial Attack: Field personnel involved in fire suppression action will contact the other protecting agencies as soon as possible after a fire escapes or threatens to escape initial attack near intermingled ownership (defined as different ownership within 1 mile of the fire or it is anticipated that other ownerships may be involved) and a Unit Administrator Group will be assembled to represent the protecting agencies involved with that fire.

Resources needed for extended attack **using closest forces concept** should be requested through the appropriate Interagency Dispatch Center (Rawlins Interagency Dispatch Center or Casper Interagency Dispatch Center) to ensure proper documentation necessary for reimbursement. The Dispatch Center used will be determined by the protecting agency, as long as communications can be established with the appropriate center.

Unit Administrator Group Guidelines

a. **Unit Administrator Group may be assembled under the following circumstances.**

- A wildland fire escapes initial attack and cannot be successfully managed and threatens another jurisdiction.
- The fire is determined to be at the Type III or higher **complexity level**
- Control is not anticipated before the next burning period.

b. The Unit Administrator Group's function is:

- After eight hours, initiate a written cost share agreement for Line Officer(s) approval with signatures (Example – Exhibit H in the **Mini Fire Mobilization Plan**) prior to end of the fire.
- **To participate in the development and approval of a Wildland Fire Situation Analysis (WFSA) for State and Private, or a DAR (Decision Analysis Report) from WFDSS (Wildfire Decision Support System) for Federal agencies.)**
- **To participate in development and approval of the wildland fire decision documents developed for managing a fire incident.**
- **To recommend to the Line Officer(s), the management level (Type 1, 2, or 3) and command structure (Unified or single IC) appropriate for the incident. This recommendation will be based upon complexity, ownership, values to be protected, and qualifications of personnel.**
- To prepare a Delegation of Authority for Line Officer signature.
- To prepare an IMT in-briefing if an IMT has been ordered.
- To act as the agency representative for the respective agency.
- To determine the organizational management actions and command structure needed for the incident.
- To agree to all expenditures whenever the suppression plan must be modified including mop-up, rehab and patrol after demobilization of the fire.

- (1) The Incident Commander/Unified Command will provide the Unit Administrator Group with an estimated fire cost daily.
- (2) The Incident Commander/Unified Command and the Unit Administrator Group will reach mutual agreement when the fire situation is such that the group can be demobilized. **On fires involving lands of more than one ownership or jurisdiction, the Incident Commander/Unified Command will be recommended by the Unit Administrator Group to the line officers based upon complexity, ownership, values to be protected and qualifications of personnel.**

For list of the designated representatives for purposes of a Unit Administrator Group see the directory.

#### 4. FIREFIGHTER QUALIFICATIONS

Three levels of expertise are recognized.

- a. Within jurisdiction the qualifications for local resources utilized for fire suppression will meet local standards.
- b. **Outside of a protection agency's jurisdiction engine dispatches will consist of a minimum of one NWCG 310-1 qualified Engine Boss (ENGB) and a minimum of one NWCG 310-1 qualified Fire Fighter Type 2 (FFT2) or Engine Operator (ENOP) per engine or meet agency policy if agency policy exceeds this Certification will be the responsibility of the sending agency/county.**
- c. All county and state Unit Leader positions and above will be NWCG 310-1 qualified. Certification is the responsibility of Wyoming State Forestry Division/agency.

#### F. AVIATION PROCEDURES

##### RETARDANT

1. Aerial retardants may be used with prior approval of the protecting agency unless otherwise specified under "Special Managements Considerations" of this plan. For list of contacts for retardant usage approval see the directory.
2. During initial attack aerial retardants may be paid by the requesting agency/county if prior approval has not been obtained through a cost share agreement
3. Air to air and air to ground frequencies with designated ground contacts need to be established with dispatch.
4. Aircraft under contract with Wyoming State Forestry Division must be ordered through the appropriate interagency dispatch center. Dispatch will call WSFD duty officer as soon as the aircraft is ordered.

#### G. ENFORCEMENT

##### RESTRICTIONS AND CLOSURES

Fire Restrictions and/or Closures will be coordinated between the parties to this agreement to include initiating, implementing, and lifting. Reference Wyoming Interagency Fire Restriction Plan

## PRESERVATION OF EVIDENCE, FIRE INVESTIGATIONS, AND FIRE TRESPASS

### FIRE INVESTIGATIONS

Each agency\county is responsible for investigating and taking appropriate law enforcement action for all fires which appear to have been **human**-caused on lands under their jurisdiction. The initial attack Incident Commander will take all responsible precautions to preserve evidence found.

### BLM INVESTIGATIONS

**BLM is required to ensure trespass actions are initiated and documented to recover cost of suppression activities, land rehabilitation, and damages to the resource and improvements for all human-caused fires that ignite on BLM jurisdiction where liability can be determined. All suspected human caused BLM fires will be investigated by a qualified NWCG Fire Investigator (INVF).**

## H. FUEL MANAGEMENT AND PRESCRIBED FIRE CONSIDERATIONS

1. Unplanned and prescribed fire projects will be coordinated with the parties to this agreement.

Wildland fire (unplanned fire), resulting from an escaped prescribed fire or a fire being managed for multiple resource objectives, at the direction or under the supervision of one of the agencies/counties signatory to this agreement, shall be the responsibility of that agency/county.

2. All suppression costs exclusive of reciprocal periods shall be borne by the responsible agency/county. The responsible agency on federal lands shall be the jurisdictional agency. An agency/county may take appropriate suppression action when lands under its protection responsibility are involved in or threatened by the fire. Such suppression action may be taken on its own initiative or at the request of the responsible agency/county. An agency/county may take appropriate suppression action, at the request of the responsible agency/county, when lands under its protection are not involved in or threatened by the fire. The responsible agency/county shall reimburse the other agency/county for all suppression costs incurred in accordance with this clause.
3. Escaped prescribed fires ignited by individual(s) not party to this agreement will be considered as wildland fires requiring suppression action under the terms and conditions of this agreement.
4. Agencies/counties agree to share and reimburse, according to the rates established in Exhibits C, D, E and F in the **Wyoming Mini Mobilization Guide** for resources used on prescribed fire projects, based on availability, qualifications, and need.

## I. REIMBURSEMENTS BY PROTECTING AGENCY

1. An itemized bill (for example see exhibit B **in the Wyoming Mini Mobilization Guide**) for reimbursable services will be provided to the protecting agency within 60 days after the fire is declared controlled. If the total cost is not known at the time of initial billing, a partial bill, so identified, may be submitted. A final bill, so identified, will be issued within six months after the fire is declared controlled. Bills will contain the protecting agency's fire number and name, resource order number, **the number of hours, cost per hour**, and inclusive dates. Billing for incidents within the State of Wyoming will be submitted to the local protecting host unit. Send bill to the Identified Agency Administrator as outlined in this agreement. **The lead agency will be responsible for the final fire financial packet and coordination of payments. Only original invoices will be utilized for payments.**
2. In situations where a burn area encompasses land under the protection or jurisdictional responsibility of more than one agency/county, a cost share agreement will be implemented **and signed** before billing.

3. Nothing herein shall prohibit any agency or county, on its own initiative and without notifying the protecting agency and without reimbursement, from going upon lands known to be protected by another agency or county to engage in suppression of wildland fires, when such fires are a threat to lands within that agency's or county's protection responsibility.
4. Salaries for Agency/County employees will be paid at the established rate in effect at the time of the fire.
5. Salaries for other than Agency/County employees will be applicable FF rate established annually for Wyoming. (Exhibit D in **the Wyoming Mini Fire Mobilization Plan**)
6. All Agency and County equipment will be reimbursed at the rates established in Exhibits C **in the Wyoming Mini Fire Mobilization Plan.**
7. All supporting agencies/counties shall be subject to examination and audit for three (3) years after final payment.

J. GENERAL PROCEDURES

1. This plan becomes effective on the date signed by each agency/county. It may be terminated upon 20 days written notice from one party to the other.
2. This plan will remain in effect until updated or terminated. Target date for annual update is April 15. Wyoming State Forestry Division will take the lead in getting this Plan prepared annually.
3. Interagency Dispatch Centers

The agency/county agrees to participate in the neighborhood dispatch system. The agency/county gives authority to the dispatch center to provide the services required in support of the centers charter and operating plan. For specifics, see the dispatch center plan.

K. OTHER CONSIDERATIONS

1. Frequencies – When responding or assigned to an incident, the County is authorized to operate on Agency Net...radio frequencies assigned to the Agency. See attachment A.
1. Items you have already received with previous AOP's that you should attach to the Current Annual Operating Plan:

Rawlins Dispatch Plan  
Protection Area Map

Wyoming Interagency Fire Restriction Plan  
Exhibits received at meeting

GLOSSARY

**ACEC:**

Area of Critical Environmental Concern (ACEC):

An area of public lands where special management attention is required to protect and prevent irreparable damage to important historic, cultural, or scenic values, fish and wildlife resources, or other natural system or processes, or to protect life or provide safety from natural hazards.

*Agency:*

State and federal cooperators.

**BLM:**

**Bureau of Land Administration**

**BOR:**

**Bureau of Reclamation**

*County:*

County and local fire service entities.

*County and local fire service entities:*

County Fire Organizations, City Fire Organizations, Joint Powers Boards, or Fire Protection Districts.

*Initial Attack:*

The control efforts taken by resources which are the first to arrive at the incident.

*Jurisdictional Agency:*

The Agency or county which has overall land and resource management and/or protection responsibility as provided by Federal or State law.

*Line Officer:*

Individual who has been delegated full authority to make decisions on all matters affecting that agency\county's participation at the incident.

*Prescribed Fire (Planned Ignition):*

The planned and/or permitted use of fire to accomplish specific land management objectives.

*Protecting Agency:*

The Agency or county responsible for providing direct wildland fire protection to a given area pursuant to the Wyoming Interagency Fire Management Agreement.

*Protection Area Maps:*

Official maps of the annual operating plans. Example: Maps showing protection area responsibilities.

*Reciprocal Fire Protection:*

A Supporting Agency will take initial attack in support of the Protecting Agency. The Protecting Agency will not be required to reimburse the Supporting Agency for costs incurred following the initial dispatch of any ground resources to the fire for the duration of the reciprocal period as defined in this plan, not to exceed 24 hours.

*Reimbursable Fire Protection:*

Fire suppression resources will be paid for by the requesting Protecting Agency per the conditions in the Wyoming Interagency Fire Management Agreement, Wyoming Interagency Cooperative Fire Management and this Annual Operating Plan.

*Suppression:*

All the work of confining and extinguishing a fire beginning with its discovery through the conclusion of the incident.

*Supporting Agency:*

An Agency or county providing fire suppression or other support and resources to the Protecting Agency.

*Unit Administrator Group:*

A group consisting of two or more individuals assigned administrative responsibilities to make coordinating decisions and recommendations within the framework of the Annual Operating Plan.

*Wildland Fire (Unplanned Ignition):*

Any non-structure fire, other than prescribed fire, that occurs in the wildland.

**Wildland Fire Decision Support System (WFDSS):**

**This system assists fire managers and analysts in making strategic and tactical decisions for fire incidents. It has replaced the WFSA (Wildland Fire Situation Analysis), Wildland Fire Implementation Plan (WFIP), and Long-Term Implementation Plan (LTIP) processes with a single process that is easier to use, more intuitive, linear, scalable, and progressively responsive to changing fire complexity. The end product of WFDSS is a DAR (Decision Analysis Report).**

**Wilderness Study Area (WSA):**

A roadless area which has been found to have wilderness characteristics.

**CARBON COUNTY AOP DIRECTORY**

Listed below are the Agency and County positions in order of authority for decisions within each Agency. For purpose of notification, request of assistance, approval of retardant or equipment use, and for representatives for the Unit Administrator Group use the call list which is arranged according to the order each Agency and County wants their representatives called. Each Agency and County representative will be responsible to follow the proper procedure for their Agency:

*BLM Lands* – District Fire Management Officer or their designated representative.

*State Lands* – **Fire Management Officer** - District Forester/or their designated representative.

*National Forest Lands* - District Ranger/Forest Fire Management Officer or their designated representative.

*BIA Lands* - Fire Management Officer or their designated representative.

*National Park Service Lands* - Fire Management Officer/Chief Ranger/ or their designated representative.

*U.S. Fish & Wildlife Service Lands* - Manager or their designated representative.

*Private Lands* - County Commissioner: County Fire Warden or their designated representative.
