PREFACE

Statistics used in the RMA report are gathered from the Fire and Aviation Management Integrated National Application Portal, <https://nap.nwcg.gov/NAP/>, which includes the Situation Report and Incident Status Summary (ICS-209) programs. Other sources also used in this document are previous Rocky Mountain Area Coordination Center (RMACC) annual reports, unit dispatch center annual reports, and agency specific local fire reports. The statistics given are intended to provide a Rocky Mountain Area wide perspective of annual fire activity but may not reflect official figures for a specific agency or represented dispatch office. Resource mobilization statistics used in this report were gathered from the Interagency Resource Ordering Capability System (IROC), which tracks tactical, logistical, service and support resources mobilized by the Rocky Mountain and National incident dispatch coordination system.

For agency-specific details or official numbers contact the individual agency or represented dispatch office.

## SEASONAL NARRATIVE

In 2022, the Rocky Mountain Area saw an increase in fires and acres over 2021. A total of 21,022 fires burned 660,523 acres, which was higher than the 15,113 fires and 446,865 acres from the previous year. The majority of the year's wildfire activity occurred in Kansas, which recorded 40 percent of the total fires (8,454) and 33 percent of the total acres (220,642). Colorado, which also had about 40 percent of the total fires, had only 9 percent of the overall acres. By contrast, Nebraska's 2,076 fires represented just 10 percent of the RMA total, but accounted for 41 percent of the total acreage with 269,658 acres burned. The 21,022 fires in the RMA were about 141 percent of the 10-year average (2012-2021), but acres were below the 10-year average at 90 percent.

The winter of 2021-2022 was an extension of the dry and windy fall that preceded it, bringing historic, December wind storms and fires in Osborne County, Kansas and Boulder County, Colorado. The 6,080-acre Marshall Fire in Boulder County began on December 30 and destroyed 1,058 structures before it was fully contained on January 7. Overall, it was the second year of a La Nina climate cycle and precipitation was well-below average. However, temperatures were warmer than average and dormant, carry-over fuels were available through the winter.

During the spring months, National Weather Service offices across the Rocky Mountain Geographic Area issued record numbers of high wind warnings, and Red Flag Warnings were more common than usual for the season. Another uptick in wildfire activity emerged in spring, even in the heavier forested areas west of the Continental Divide. Major incidents in May included the 721-acre Plumtaw Fire near Pagosa Springs, Colorado, and the 1,572-acre High Park Fire near Cripple Creek, Colorado. A late-season snowstorm prior to the Memorial Day holiday weekend eased the overall fire potential, but the exceptional, long-term drought east of the Divide in southeast Colorado and western Kansas continued. As a result of these drought conditions, the annual forage was minimal in these areas and fuel loading was not a contributing factor to fire danger despite the dryness and windy fire weather conditions.

Through spring and early summer, normal green-up and curing took place with above-average fire potential, but average activity. An early onset of the southwest monsoon in June provided lingering benefits for the western half of Colorado that persisted well into August. Further north and east into Wyoming, South Dakota and the Plains, the pattern was drier, but not excessively warm. However, a heat wave that peaked in late August and early September lowered fuel moisture and produced a two-to-three-week period of enhanced fire activity. A breakdown of the high-pressure ridge even resulted in rare lightning ignitions in the Sandhills of Nebraska. From that point until early fall, there were several large fires, including the Bovee Fire in Nebraska's Halsey National Forest that began on October 2. This wind-driven blaze destroyed 21 structures and burned 18,930 acres.

Despite an increase in fires and acres, the RMA Preparedness Level never reached PL 3 in 2022. PL 2 began on May 14, continued for 140 days into summer and early fall, and ended on October 12. By contrast, the National Preparedness Level hit PL 2 on March 29, increased to PL 3 on July 12, and peaked at PL 4 during 10 days from September 6 to 15. By September 27, it had decreased to PL 2 and was finally lowered to PL 1 on October 28.

While continuing to meet its own needs, the RMACC was able to provide resources to support other geographic areas. On May 19, RMA Team 3 (Waln) took command of New Mexico's Cerro Pelado Fire for 13 days, which burned over 45,000 acres in the Sante Fe National Forest. On October 22, the RMA Team 3 (Waln, Pearson) began an 8-day assignment on the Siouxon Fire, which burned over 2,300 acres in Washington's Gifford Pinchot National Forest. In 2022, RMA incident management teams served 58 days on 10 area incidents and 21 days on two national assignments. RMA Type 1 crews worked 175 days on 43 area fires and 404 days on 57 national incidents. RMA Type 2 and Type 2IA crews worked 304 days on 64 area incidents and 221 days on 29 national incidents.

In the last months of 2022, the onset of late fall and winter snow gradually diminished the fire potential over most areas, but the wildland urban interface along the Front Range didn't see significant snow cover until December with the onset of an Arctic outbreak.

## INTERAGENCY FIRE STATISTICS: 2022 WILDLAND FIRE ACTIVITY BY CAUSE

The following table shows, by cause, the number of fires and acres burned for each of the agencies within the RMA. Federal and Non-federal are listed individually, and within each Federal agency the fire and acres are further broken down by the state in which the federal fire occurred. What this means is that a fire that occurred on BIA land in Colorado will **only** be listed in the BIA-CO row below; it will **not** be included in the States-CO row. State figures represent all Non-federal fires and acres in the respective states as reported to the USFS Regional Office's State and Private Forestry staff.

### 2022 WILDLAND FIRE ACTIVITY BY CAUSE AND BY INDIVIDUAL AGENCY WITHIN THE RMA

The following table shows, by cause, the number of fires and acres burned for each of the agencies within the RMA. Federal and Non-federal fires and acres are listed individually. What this means is that a fire that occurred on BIA land in Colorado will **only** be represented in the BIA row below; it will **not** be included in the Colorado row. The State figures represent all Non-federal fires and acres in the respective state as reported to the USFS Regional Office's State and Private Forestry staff.

The two following pie charts illustrate the percent of fires and percent of acreage burned for each of the agencies within the RMA. Federal and Non-federal fires and acres are represented individually. What this means is that a fire that occurred on BIA land in Colorado will only be represented in the BIA pie slice below; it will not be included in the Colorado pie slice. The State percentages represent all Non-federal fires and acres in the respective state.

**2022 WILDLAND FIRE ACTIVITY BY CAUSE AND BY CAUSE WITHIN EACH RMA AGENCY**

The two following pie charts illustrate, by cause, the percentage of fires and the percentage of acres burned within the entire RMA. The pie charts include both Federal and Non-federal fires and acres in the cause percentages.

The two following bar graphs illustrate, by cause, the number of fires and acres burned for each of the agencies within the RMA. Federal and Non-federal fires and acres are represented individually. What this means is that a fire that occurred on BIA land in Colorado will **only** be represented in the BIA bar below; it will **not** be included in the Colorado bar. The State fires and acres represent all Non-federal fires and acres in the respective state as reported to the USFS Regional Office’s State and Private Forestry staff.

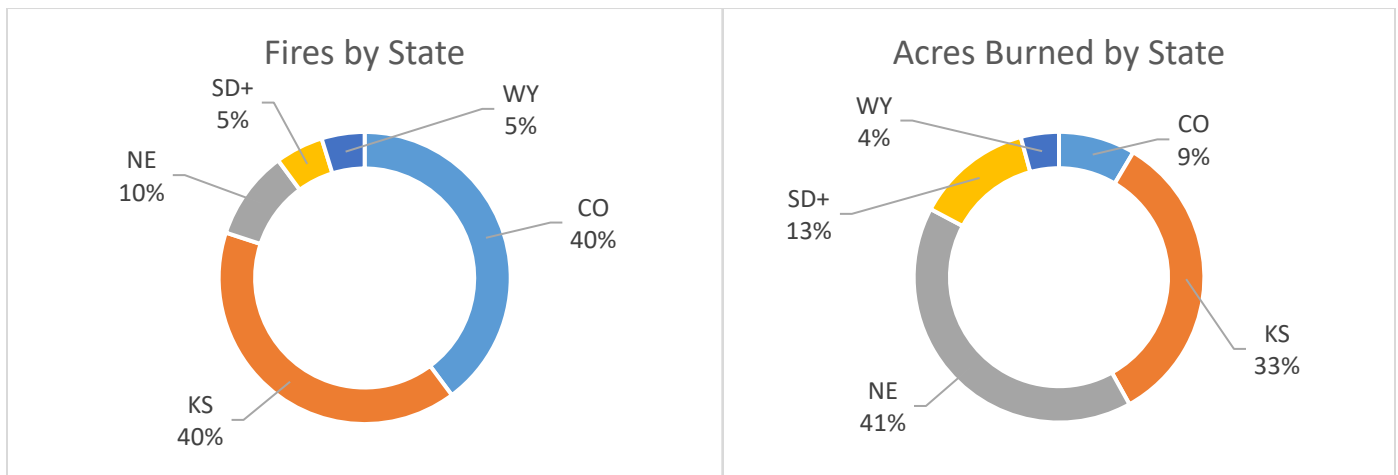

**2022 WILDLAND FIRE ACTIVITY BY CAUSE  
COMBINED FEDERAL AND NON-FEDERAL AGENCIES WITHIN EACH STATE**

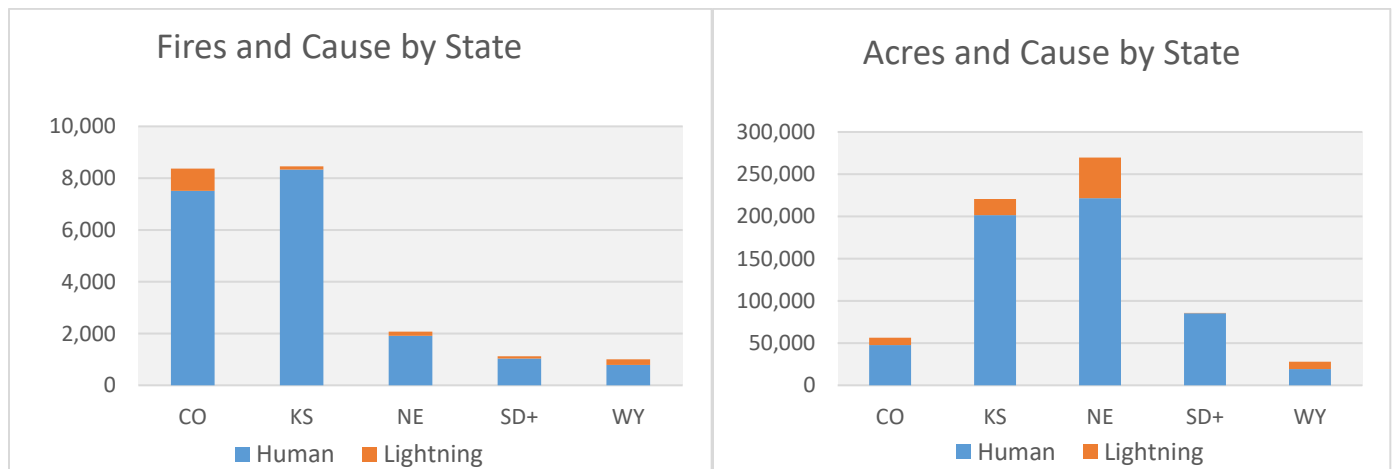

The following table shows, by cause, the number of fires and acres burned within each of the five states of the RMA. Both Federal and Non-federal fires and acres are included in state totals.

RMA FIRES AND ACRES SINCE 1996

The following timeline shows the total fires and acres across the RMA since 1996. These figures were gathered from past RMACC annual reports. In the following chart, the **BLUE** bars on the graph represent the total **FIRES** based on the scale on the **LEFT**. The **ORANGE** lines represent the total **ACRES** based on the scale on the **RIGHT**.

## RMA LARGE INCIDENT SUMMARY BY MONTH FOR 2022

The following table shows by start date all large fires that were reported and submitted as final electronically in the ICS-209 system. A large fire is defined as 100 acres or more in timber fuel types, 300 acres or more in grass fuel types, or a fire that has a Type 1 or Type 2 IMT assigned. The "Unit" and "Agency" listed in the table are not necessarily the only unit or agency that was affected by the incident; what is listed is typically the jurisdictional agency for the incident. In the "Kind" column, WF=Full Suppression/Perimeter Control, MON=Monitor, CON=Contain and PZP=Point or Zone Protection/Limited Perimeter Control. In the "Cause" column, H = Human caused, L/N = Lightning or Natural caused, U = Undetermined. The acres shown are the acres reported on the last electronic ICS 209 submitted and are not necessarily the official acres for that incident. In the same vein, the number of structures shown as destroyed is the number reported on the last electronic ICS-209 and is not necessarily the official number of structures destroyed by that incident. The "Structures Destroyed" column includes residences, commercial buildings and outbuildings. A Type is listed in the "IMT Type" column only if a Type 1 IMT, Type 2 IMT, AC or NIMO was assigned.

2022 RMA LARGE FIRE SUMMARY BY AGENCY

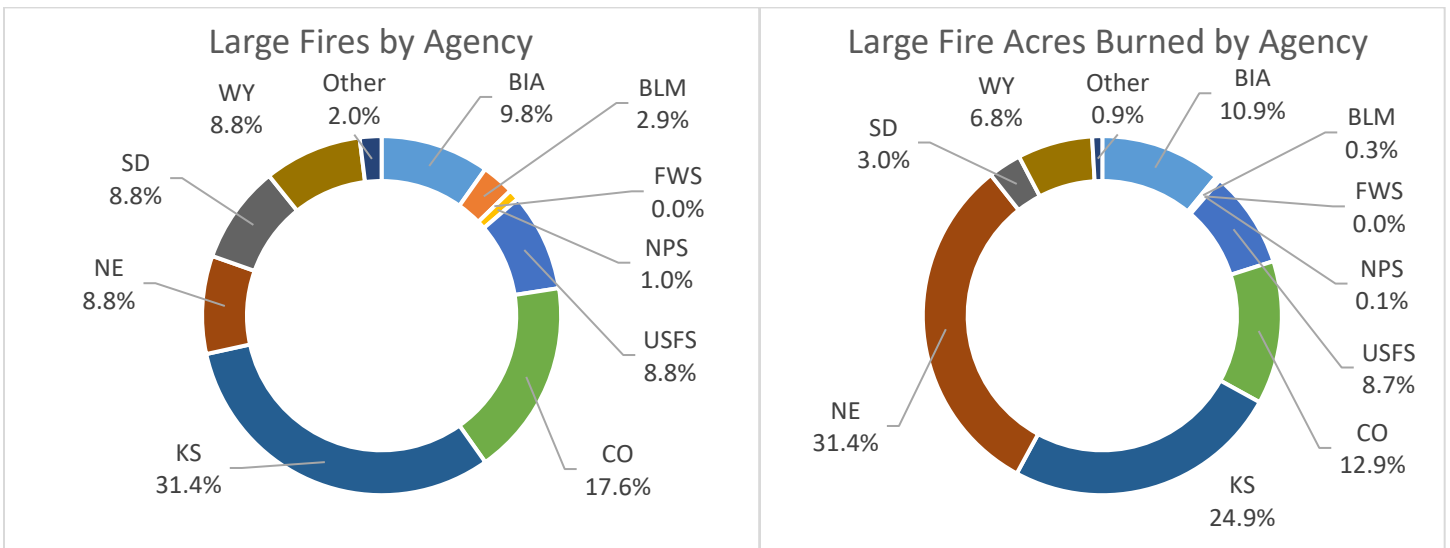

The following table shows the number of large fires and acres burned by large fires in the RMA. The data in the table is based on the last ICS-209 report submitted electronically and are not necessarily the official acres of the incident. The “Agency” listed is the jurisdictional agency listed on the ICS-209 and is not necessarily the only agency that was affected by the incident. Large fires reported under a county’s jurisdiction are included in the corresponding state’s figures.

**2022 RMA LARGE FIRE SUMMARY BY AGENCY**

The following table and two pie charts illustrate the percent of large fires and percent of large fire acreage burned for each of the agencies within the RMA. Federal and Non-federal fires and acres are represented individually. What this means is that a fire that occurred on BIA land in Colorado will only be represented in the BIA pie slice below; it will not be included in the Colorado pie slice. The State percentages represent all Non-federal fires and acres in the respective state. Other includes other Federal Agencies not listed.

**RMA 2022 LARGE FIRE SUMMARY  
COMBINING FEDERAL AND NON-FEDERAL AGENCIES WITHIN EACH STATE**

The following table and pie charts show the number of large fire and acres burned by large fires within each of the five states of the RMA. Both Federal and Non-federal fires and acres are included in these state totals. This information is from the last electronically submitted ICS-209 for an incident, which are not necessarily the official acres for the incident.

**VISITING IMTs TO THE RMA IN 2022**

The following table shows the Incident Management Teams (IMTs), Area Command Teams (AC) and National Incident Management Organization(s) (NIMO) ordered into the Rocky Mountain Area and the assignments those IMTs/s/ACs/NIMOs had in 2021. The "Start Date" is the date the fire started, not necessarily the date the IMT/Organization was assigned to the incident. Other "home" RMA IMTs/ACs/s may have also been assigned to fires listed below, see the proceeding section entitled "RMA Large Incident Summary By Month for 2022" for a complete listing of all large fires in the RMA and teams assigned to those fires.

**RMA AIRTANKER BASE AND RELOAD BASE OPERATIONS IN 2022**

The following table and pie charts show the Airtanker and Reload Bases within the RMA. The Gallons Pumped and Missions Flown columns reflect all gallons and Airtanker missions flown out of that Base, however those missions are not necessarily just RMA missions, as an RMA base could be used as a reload facility for other geographic areas.

South Dakota Wildland Fire (SDWF) brought one SEAT (T-830) on contract for 94 days in 2022 (6-22 to 9-23) and operated the Hot Springs SEAT Base for approximately 214 days. SDWF supported 30 separate fires with 29,967 gallons of retardant and 2,850 gallons of water out of the Hot Springs SEAT Base and 7,500 gallons of retardant out of Spearfish SEAT Base.

**HANDCREWS  
RMA TYPE 1 HANDCREW SUMMARY FOR 2022**

The following table shows the Type 1 Handcrews hosted in the RMA and the total incidents, in area and out-of-area that each crew was assigned to during the 2022 fire season. These figures come directly from each crew and represent all incidents, not just incidents for which RMC processed an order. Days listed represent days working on an incident and do not include travel or R&R.

## 10 YEARS OF RMA INTERAGENCY FIRE STATISTICS

Appendix - 1

This section includes a table of RMA fires and acres over the last 10 years by individual year and agency.

## RMA LARGE INCIDENT SUMMARY BY STATE

Appendix - 2

This section includes tables of all large incidents reported to the Rocky Mountain Coordination Center on an ICS-209 sorted by State.

## RMA RESOURCE BREAKDOWN

Appendix - 3

This section includes a table of resources that were processed by Rocky Mountain Area dispatch centers. These figures include incoming and outgoing resources, and are listed by their ROSS catalog item.

## 10 YEARS OF RMA INTERAGENCY FIRE STATISTICS

The following table shows the number of fires and acres burned for each of the agencies within the RMA over the past 10 years, not including the 2022 data. Federal and Non-federal fires and acres are listed individually. What this means is that a fire that occurred on BIA land in Colorado will only be represented in the BIA row below; it will not be included in the Colorado row. The State figures represent all Non-federal fires and acres in the respective state as reported to the USFS Regional Office's State and Private Forestry staff.
