## PREFACE

Statistics used in the RMA report are gathered from the Fire and Aviation Management Integrated National Application Portal, <https://famauth.wildfire.gov>, which includes the Situation Report and Incident Status Summary (ICS-209) programs. Other sources also used in this document are previous Rocky Mountain Area Coordination Center (RMACC) annual reports, unit dispatch center annual reports, and agency specific local fire reports. The statistics given are intended to provide a Rocky Mountain Area wide perspective of annual fire activity but may not reflect official figures for a specific agency or represented dispatch office. Resource mobilization statistics used in this report were gathered from the Interagency Resource Ordering Capability System (IROC), which tracks tactical, logistical, service and support resources mobilized by the Rocky Mountain and National incident dispatch coordination system.

For agency-specific details or official numbers contact the individual agency or represented dispatch office.

## SEASONAL NARRATIVE

In 2024, the Rocky Mountain Area (RMA) saw an increase in fires and acres over 2023. A total of 18,358 fires burned 968,697 acres, doubling the totals from the previous year. The majority of fire occurrence was in Colorado, accounting for 50% of total fires (9,170), but only 8% of acreage burned (80,958). By contrast, Wyoming's 12% of fires (2,150) accounted for 55% of the total acreage (531,033). The 18,358 fires were 27% higher than the RMA's 10-year average (2014-2023), and acreage burned was 58% higher than the 10-year average.

The winter of 2023-2024 was warmer, but wetter than normal outside of Wyoming. While the above normal temperatures decreased going into the spring, the precipitation remained below normal across Wyoming and was also below normal in southeast Colorado into Kansas. This dryness early in the spring during the pre-green up in an area that had above normal fuel carry-over from the previous year resulted in an active shoulder season during strong wind events. 2024 started out in a strong El Niño, which resulted in the dryness during the winter. This El Niño faded going into the summer.

The 2024 season followed seasonal trends around the RMA. Fire occurrence moved from the Southeast portions of the RMA to the Northwest as fuels cured and drought continued through the summer. Large wind driven fires on the eastern plains began the season in late February, with the Betty's Way incident nearly reaching 70,000 acres on the plains of central Nebraska. As the summer progressed there was an extended fuel and fire behavior advisories issued for the Front Range extending into Wyoming. By late season, the higher elevations along the Continental Divide and northern portions of the RMA had receptive fuels that lead to large fire growth.

The summer remained hot and dry in Wyoming, leading to severe drought by the end of July and extreme drought by the end of August. The dryness during the summer extended down the Front Range to as far south as Denver, leading moderate to severe drought from Fort Collins north into Wyoming. Through much of the summer winds remained every light, limiting the spread potential. However, as soon as stronger winds developed east of the Rockies fire activity increased significantly.

There were multiple significant wind events through the summer into early fall. The first was the last week of July that saw the Alexander Mountain, Stone Mountain, and Quarry fires start along the Front Range foothills, along with several in eastern Wyoming. The fires along the Front Range were all threatening large communities which garnered the attention of the public. The second event came during the middle of August that resulted in the several large fires including the Remington, House Draw, Flat Rock, and Constitution fires in northeast Wyoming. These fires spread north into Montana and most of their acreage burned in the Northern Rockies Geographic Area. During both timeframes, Complex Incident Management Teams (CIMTs) were ordered to the RMA from the Southwest Area. The last wind event was in mid-September resulting in numerous fires in Wyoming and South Dakota including Short Draw and Power Dam Road. The remainder of the year remained warm and dry across Wyoming, South Dakota and Nebraska, while much of Colorado and Kansas started seeing more favorable storm tracks resulting good early season snow in the high elevations and much needed moisture across the eastern plains of Colorado and into Kansas.

In the RMA there were 109 incidents that met large fire criteria and reported ICS-209s. Large fires burned 669,298 acres and destroyed 174 structures. Wyoming accounted for 40% of the large fires (44) and 72% of the acreage burned (484,034). Large fires were reported starting in February and were consistently reported until the end of October.

RMA Complex incident Management Teams (CIMTs) spent most of their assignments outside the RMA supporting large fires in Idaho, Oregon, and Washington. RMA Team 1 and 3 ended the RMA season on the Elk fire in the Bighorn National Forest in Wyoming.

The RMA preparedness level elevated to PL2 on June 20<sup>th</sup> and remained at PL2 for a majority of the season. RMA escalated to PL3 for 10 days from July 28 to August 8 due to large fire activity around the GACC, particularly 3 large fires threatening structures in the front range. The GACC preparedness level remained at PL2 until November 8<sup>th</sup> before a snowstorm across the RMA brought moderating conditions.

**INTERAGENCY FIRE STATISTICS: 2024 WILDLAND FIRE ACTIVITY BY CAUSE**

The following table shows, by cause, the number of fires and acres burned for each of the agencies within the RMA. Federal and Non-federal are listed individually, and within each Federal agency the fire and acres are further broken down by the state in which the federal fire occurred. What this means is that a fire that occurred on BIA land in Colorado will **only** be listed in the BIA-CO row below; it will **not** be included in the States-CO row. State figures represent all Non-federal fires and acres in the respective states as reported to the USFS Regional Office's State and Private Forestry staff.

\* One BIA unit stretches from SD to ND and in this report, except for large fire information, these fire figures are included in BIA SD numbers. There are also two FWS refuges located in ND with Bighorn Canyon NRA expanding from N. WY into MT (MT-BIP) that are the responsibility of the RMA. Except for large fire information, in this report the numbers for these three units are included in FWS SD and NPS MT figures. Fire figures listed in the "Other" section represent Bureau of Reclamation locations in CO and WY (CO-WCAL AND WY-WAL), Department of Defense in CO (CO-AFQ and CO-FCQ), SD (SD-ELAQ), and The Nature Conservancy Unit in NE (NE-PLRI) and SD (SD-OAE).

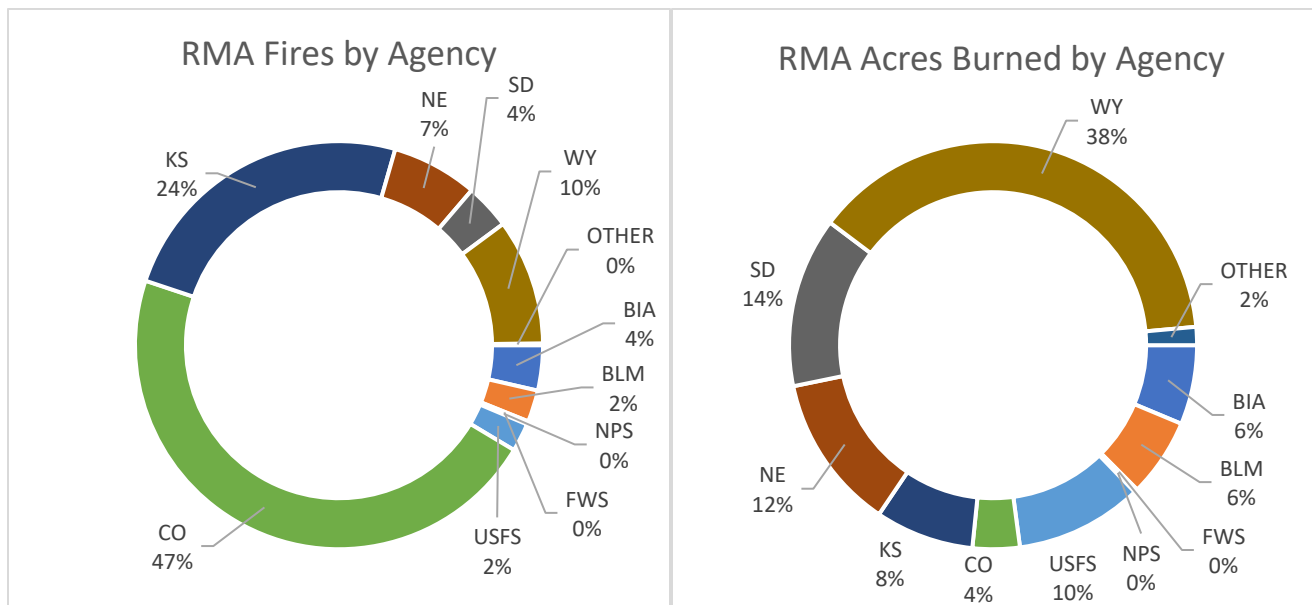

## 2024 WILDLAND FIRE ACTIVITY BY CAUSE AND BY INDIVIDUAL AGENCY WITHIN THE RMA

The following table shows, by cause, the number of fires and acres burned for each of the agencies within the RMA. Federal and Non-federal fires and acres are listed individually. What this means is that a fire that occurred on BIA land in Colorado will **only** be represented in the BIA row below; it will **not** be included in the Colorado row. The State figures represent all Non-federal fires and acres in the respective state as reported to the USFS Regional Office's State and Private Forestry staff.

† Other includes all other federal agencies not listed above such as the Bureau of Reclamation locations in CO and WY (CO-WCAL AND WY-WAL), Department of Defense in CO (CO-AFQ and CO-FCQ), SD (SD-ELAQ), and The Nature Conservancy Unit in NE (NE-PLRI) and SD (SD-OAE).

The two following pie charts illustrate the percent of fires and percent of acreage burned for each of the agencies within the RMA. Federal and Non-federal fires and acres are represented individually. What this means is that a fire that occurred on BIA land in Colorado will only be represented in the BIA pie slice below; it will not be included in the Colorado pie slice. The State percentages represent all Non-federal fires and acres in the respective state.

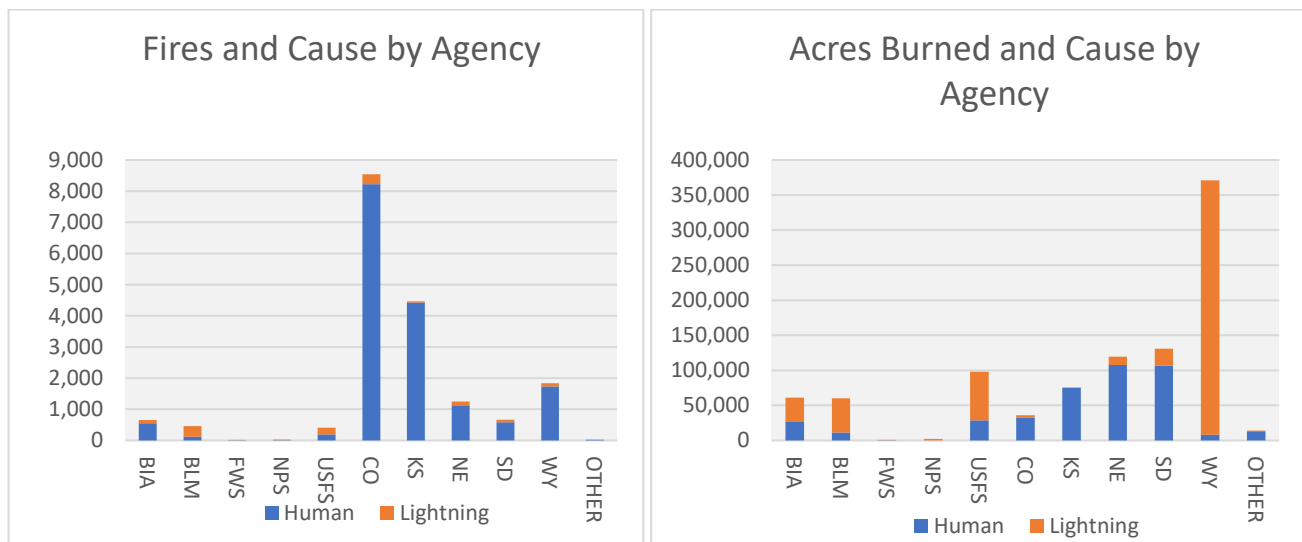

## 2024 WILDLAND FIRE ACTIVITY BY CAUSE AND BY CAUSE WITHIN EACH RMA AGENCY

The two following pie charts illustrate, by cause, the percentage of fires and the percentage of acres burned within the entire RMA. The pie charts include both Federal and Non-federal fires and acres in the cause percentages.

The two following bar graphs illustrate, by cause, the number of fires and acres burned for each of the agencies within the RMA. Federal and Non-federal fires and acres are represented individually. What this means is that a fire that occurred on BIA land in Colorado will **only** be represented in the BIA bar below; it will **not** be included in the Colorado bar. The State fires and acres represent all Non-federal fires and acres in the respective state as reported to the USFS Regional Office's State and Private Forestry staff.

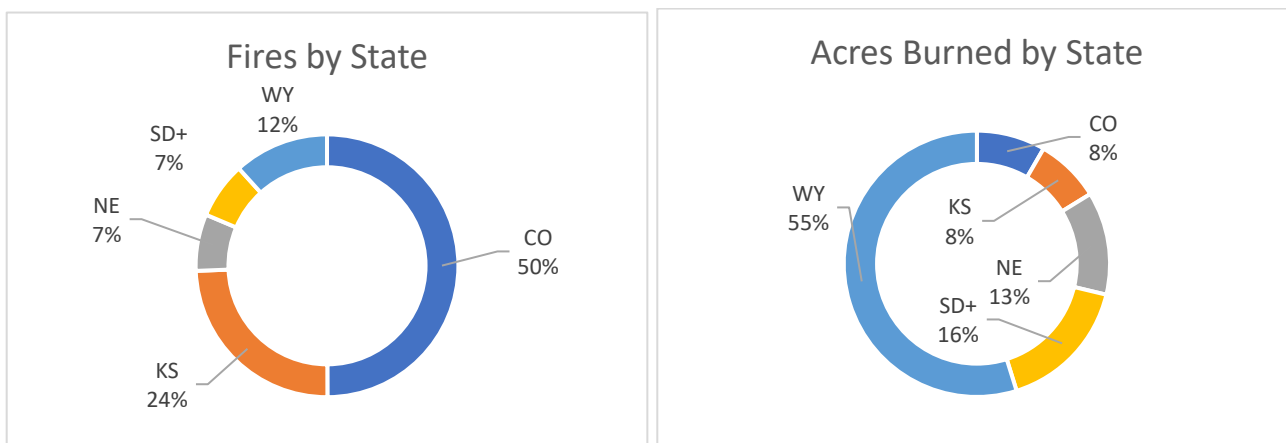

## 2024 WILDLAND FIRE ACTIVITY BY CAUSE

### COMBINED FEDERAL AND NON-FEDERAL AGENCIES WITHIN EACH STATE

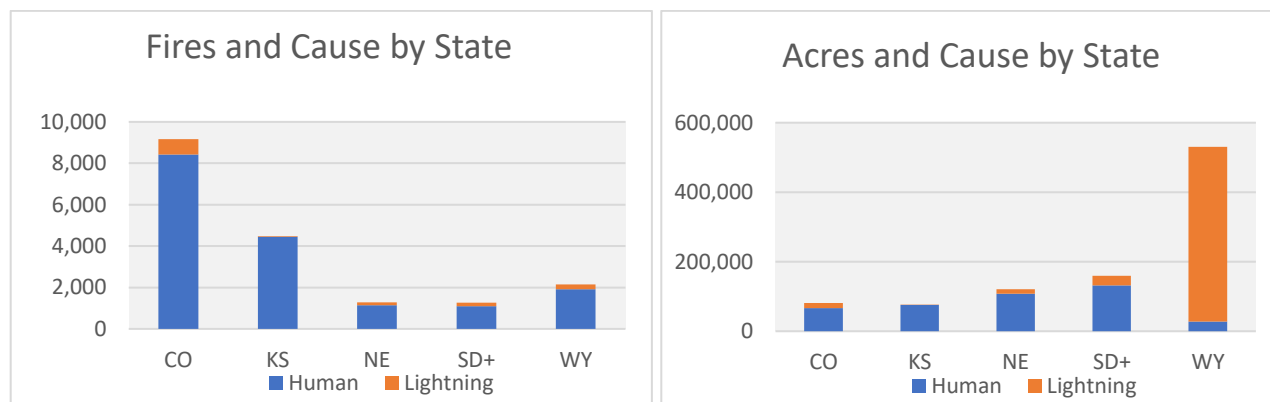

The following table shows, by cause, the number of fires and acres burned within each of the five states of the RMA. Both Federal and Non-federal fires and acres are included in state totals.

The two following bar graphs illustrate, by cause, the number of fires and acres burned within each of the five states that comprise the RMA. Both Federal and Non-federal fires and acres are included in state totals.

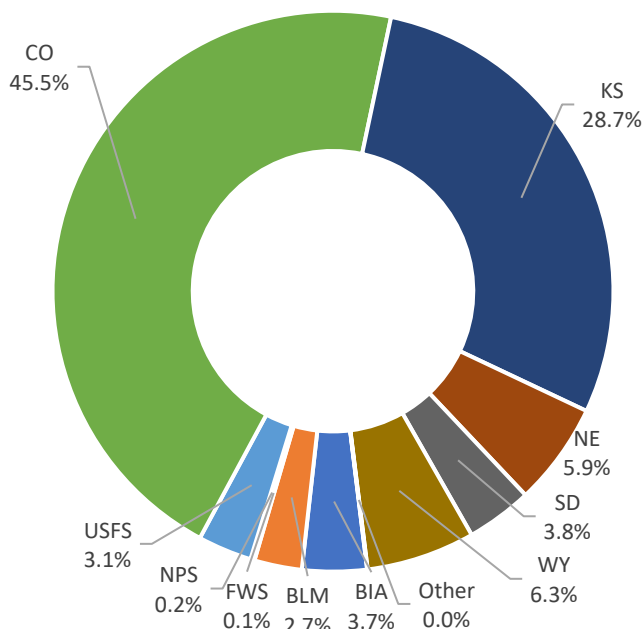

## 5 YEAR RMA AVERAGES BY AGENCY (2019 - 2023)

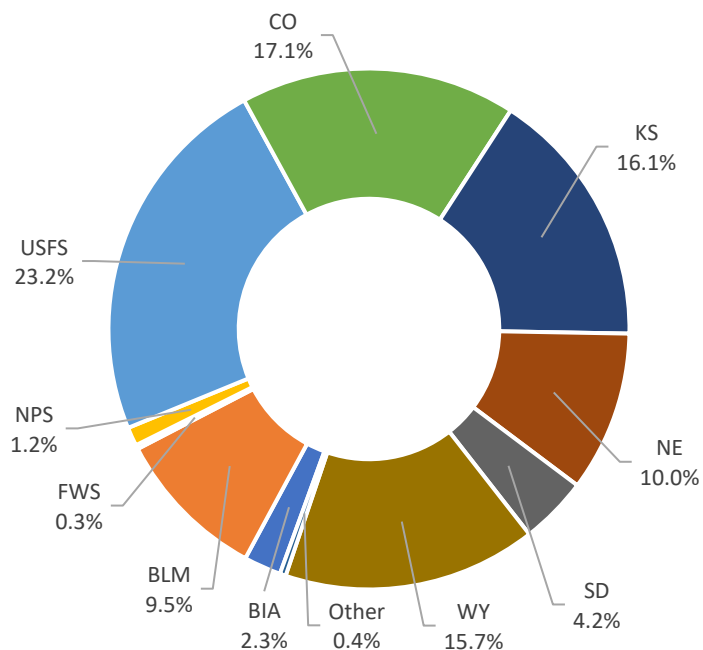

The following table shows the average number of fires and acres burned for each of the agencies within the RMA over the past 5 years, **not including the 2024 data**. The pie charts below the table show the 5-year average percentages of fires and acres burned by agency. Federal and Non-federal fires and acres are listed individually. What this means is that a fire that occurred on BIA land in Colorado will **only** be represented in the BIA row and pie slice below; it will **not** be included in the Colorado row or pie slice. The State figures represent all Non-federal fires and acres in the respective state as reported to the USFS Regional Office's State and Private Forestry staff. See the Appendix for a breakdown of the last 10 years of RMA fire statistics by individual year and agency.

## RMA LARGE INCIDENT SUMMARY BY MONTH FOR 2024

The following table shows by start date all large fires that were reported and submitted as final electronically in the ICS-209 system. A large fire is defined as 100 acres or more in timber fuel types, 300 acres or more in grass fuel types, or a fire that has a Complex Incident Management Team Assigned. The "Unit" and "Agency" listed in the table are not necessarily the only unit or agency that was affected by the incident; what is listed is typically the jurisdictional agency for the incident. In the "Kind" column, WF=Full Suppression/Perimeter Control, MON=Monitor, CON=Contain and PZP=Point or Zone Protection/Limited Perimeter Control. In the "Cause" column, H = Human caused, L/N = Lightning or Natural caused, U = Undetermined. The acres shown are the acres reported on the last electronic ICS 209 submitted and are not necessarily the official acres for that incident. In the same vein, the number of structures shown as destroyed is the number reported on the last electronic ICS-209 and is not necessarily the official number of structures destroyed by that incident. The "Structures Destroyed" column includes residences, commercial buildings and outbuildings. A Type is listed in the "IMT Type" column only if a CIMT, AC, or NIMO was assigned.

## 2024 RMA LARGE FIRE SUMMARY BY AGENCY

The following table shows the number of large fires and acres burned by large fires in the RMA. The data in the table is based on the last ICS-209 report submitted electronically and are not necessarily the official acres of the incident. The “Agency” listed is the jurisdictional agency listed on the ICS-209 and is not necessarily the only agency that was affected by the incident. Large fires reported under a county’s jurisdiction are included in the corresponding state’s figures.

## 2024 RMA LARGE FIRE SUMMARY BY AGENCY

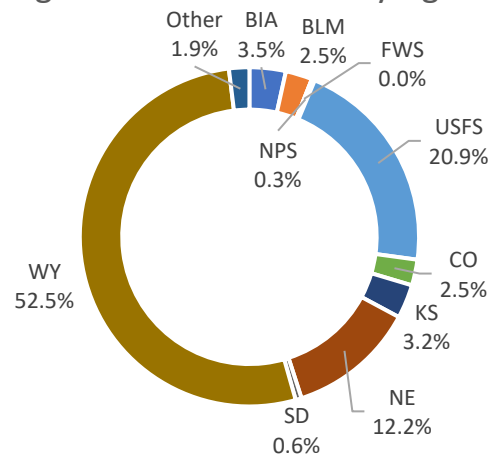

The following table and two pie charts illustrate the percent of large fires and percent of large fire acreage burned for each of the agencies within the RMA. Federal and Non-federal fires and acres are represented individually. What this means is that a fire that occurred on BIA land in Colorado will only be represented in the BIA pie slice below; it will not be included in the Colorado pie slice. The State percentages represent all Non-federal fires and acres in the respective state. Other includes other Federal Agencies not listed.

### RMA 2024 LARGE FIRE SUMMARY COMBINING FEDERAL AND NON-FEDERAL AGENCIES WITHIN EACH STATE

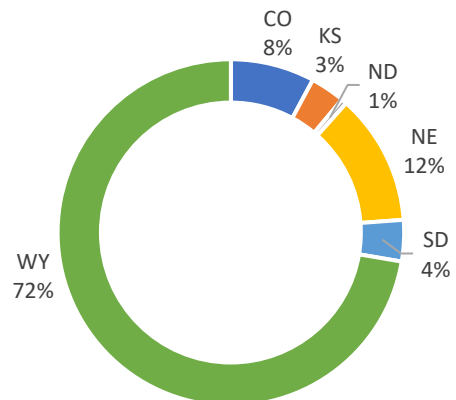

The following table and pie charts show the number of large fire and acres burned by large fires within each of the five states of the RMA. Both Federal and Non-federal fires and acres are included in these state totals. This information is from the last electronically submitted ICS-209 for an incident, which are not necessarily the official acres for the incident.

## VISITING IMTs TO THE RMA IN 2024

The following table shows the Complex Incident Management Teams (CIMTs), Area Command Teams (AC) and National Incident Management Organization(s) (NIMO) ordered into the Rocky Mountain Area and the assignments those IMTs/s/ACs/NIMOs had in 2024. The "Start Date" is the date the fire started, not necessarily the date the IMT/Organization was assigned to the incident. Other "home" RMA CIMTs may have also been assigned to fires listed below, see the proceeding section entitled "RMA Large Incident Summary By Month for 2024" for a complete listing of all large fires in the RMA and teams assigned to those fires.

### HANDCREWS RMA TYPE 1 HANDCREW SUMMARY FOR 2024

The following table shows the Type 1 Handcrews hosted in the RMA and the total incidents, in area and out-of-area that each crew was assigned to during the 2023 fire season. These figures come directly from each crew and represent all incidents, not just incidents for which RMC processed an order. Days listed represent days working on an incident and do not include travel or R&R.

## 10 YEARS OF RMA INTERAGENCY FIRE STATISTICS

The following table shows the number of fires and acres burned for each of the agencies within the RMA over the past 10 years, not including the 2024 data. Federal and Non-federal fires and acres are listed individually. What this means is that a fire that occurred on BIA land in Colorado will only be represented in the BIA row below; it will not be included in the Colorado row. The State figures represent all Non-federal fires and acres in the respective state as reported to the USFS Regional Office's State and Private Forestry staff.
