

What's new in Fire Incident Mapping Tools (FIMT) version 9.3.0.9

1. Migrated from Visual Basic 6 code to .Net C# language. Reorganized all of the code better and removed all test, draft, unused code. Primary reason – ArcGIS 10 will not work with VB6 code.
2. FIMT error log file is now stored in: C:\Documents and Settings\\Local Settings\Temp. File is called: FIMTExtensionLog.txt
 - If help desk can not immediately solve the problem, may as user to provide this log file to assist in correcting the problem.
