Urban Search and Rescue.....	181

INTRODUCTION

The Interagency Situation (SIT) Report Program is a web-based application that captures incident activity and resource status information in summary form intended for use by managers. Once the information has been submitted via the web site, it can be accessed and utilized at local Dispatch Offices, Geographic Area Coordination Centers (GACCs) and the National Interagency Coordination Center (NICC) to produce summary reports to be used by agency managers as a decision making tool. Agency information officers also use the reports to disseminate incident activity to the media and public.

GACCs have edit access to all of the Dispatch Offices within their area. Additionally, NICC has edit access to all Dispatch Offices and GACCs.

The SIT Report is prepared on a daily basis at National Preparedness Level 2 and above, or when significant activity occurs. Please refer to Chapter 25 of your Geographic Area's Mobilization Guide and the National Interagency Mobilization Guide for more specific reporting requirements for the SIT Report.

USER SUPPORT

Technical support for the SIT Report Program can be found through the National Fire and Aviation Management (F&AM) Web Applications site (FAMWEB) or at the Fire Applications Help Desk. Contact the Help Desk at 1-800-253-5559 or (208) 387-5290 or via e-mail at: fire_help@dms.nwccg.gov. Calls to the Help Desk are handled 24 hours a day. After normal business hours (7:30am – 5:00pm Mountain Time) leave a message, and the on-call duty officer will return your call.

If you have questions on data entry, what to report, program access, etc., contact your local dispatch center or your Geographic Area Intelligence Coordinator/Officer.

TROUBLESHOOTING

Specific instructions are explained in this User's Guide for many of the data entry and program features. In some cases, instructions must be followed carefully for the program to work. Additional troubleshooting instructions are outlined in specific sections of this User's Guide. Please follow the instructions in this User's Guide carefully before contacting the Fire Applications Help Desk or GACC.

If you lose Internet connection while in the program, reconnect and then click the "**Submit**" button. You should **not** lose any of the data you entered before being disconnected.

This page intentionally left blank

ACCESS TO THE SIT REPORT PROGRAM

The SIT Report Program is accessible via the internet through the National Fire and Aviation Management Web Applications site (FAMWEB). Microsoft Internet Explorer is the preferred browser for completing the SIT Report. Other browsers may be used but note that there may be difficulties and the site could look slightly different when viewed in each browser.

The SIT Report Program shares incident information with the ICS-209 (209) Program for data entry, summaries and reports. It is important to maintain and protect the security of the program. User names and passwords are assigned to individuals, and should be protected. **Not under any circumstance should a user name or password be shared with the public or the media as this is a government program.**

To get to the SIT Report Program on the FAMWEB site, you will need to enter the site via the URL-- <http://fam.nwcg.gov/fam-web/>. The image below is an example of what the website looks like.

The SIT Program is hosted in a website environment on a server at the U. S. Department of Agriculture's National Information Technology Center (NITC) at Kansas City. You will need to have a Kansas City Log-on ID (KCLID) and an Oracle password in order to gain access to the program.

REQUESTING A NEW ACCOUNT

To request a new FAMWEB Logon ID for SIT, click on the “[New User Accounts](#)” link located on the main page and follow the instructions provided.

If you need help getting a Logon ID and password, contact the Applications Help Desk at 1-800-253-5559 or (208) 387-5290.

Users who currently have access to the WIMS Program need to call their GACC Intelligence Coordinator/Officer to get access to the SIT Program. Current application users that move from one location to another and continue to need access to the SIT Program for the new area need to call the GACC Intelligence Coordinator/Officer for that area to obtain access.

LOGGING ON TO THE SIT REPORT PROGRAM

From the FAMWEB home page, click on the “[SIT Report](#)” link (as shown below).

The screenshot shows the FAMWEB website interface. The address bar displays <http://fam.nwcg.gov/fam-web/>. The main header includes the FAMWEB logo and the text "NATIONAL FIRE AND AVIATION MANAGEMENT WEB APPLICATIONS". A navigation bar contains links for "FAMWEB Home", "Contact Us", "FAQ", "Help", and "Disclaimer", along with the date "Monday, November 26, 2007".

The left sidebar contains a menu with the following items:

- ▶ FAMWEB
- ▶ Administration
- FIRESTAT
- AWSR
- AMIS
- ▶ WIMS
- ▶ **SIT Report** (highlighted with a red circle)
- 209
- PocketCards
- KCFAST
- FEPMIS
- Fire and Weather Data

The main content area features a "Welcome to FAMWEB" heading. Below this, there are several sections:

- Announcements:** The Fire and Aviation Management Web Applications (FAMWEB) web site brings together a variety of applications, tools, and services related to interagency fire and aviation management managed by the National Wildfire Interagency Coordination Group (NWICG) and participating agencies. For detailed information, data access, and user support, please contact the help desk.
- Redesign Underway:** The FAMWEB web site is currently under redesign. The new design will bring together a number of applications and services into a single user community. The new design will include new pages for **Disclaimer**, **Announcements**, **Frequently Asked Questions**, and **Help**. The new design will also include a **Feedback** page where users can provide input on the status and enhancement of the site. Additional details on the status and enhancement of the site will be provided in the **Announcements** pages.

A login dialog box titled "Connect to fam.nwcg.gov" is overlaid on the page. It contains the following fields and options:

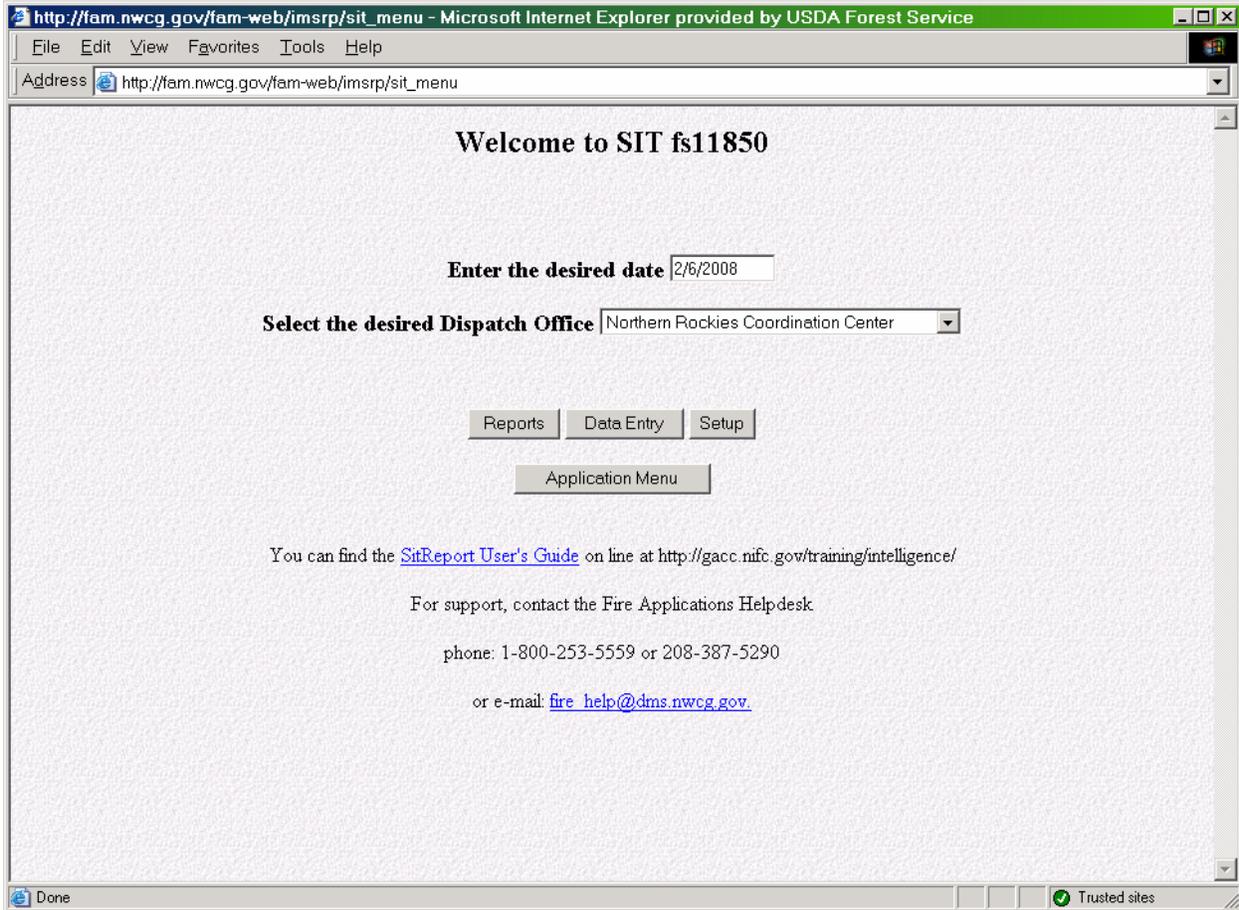

- imsrp
- User name: fs11850
- Password: [masked]
- Remember my password
- OK button
- Cancel button

A dialog box, as shown above, will pop up asking for your User name and password.

Enter your “**User Name**” and “**Password**”.

Click the “**OK**” button.

Once you are at the Welcome to SIT screen, as shown below, you can select from the “**Reports**”, “**Data Entry**”, and “**Setup**” functions. The “**Application Menu**” button will take you back to the FAMWEB home page.

Individual access rights to the program determine which buttons will appear on the screen.

- “**Report**” authority only allows the user to run reports.
- “**Data Entry**” authority gives the user data entry access.
- “**Manager**” authority allows that user to add and update/delete levels of security/access, as well as dispatch offices and units.

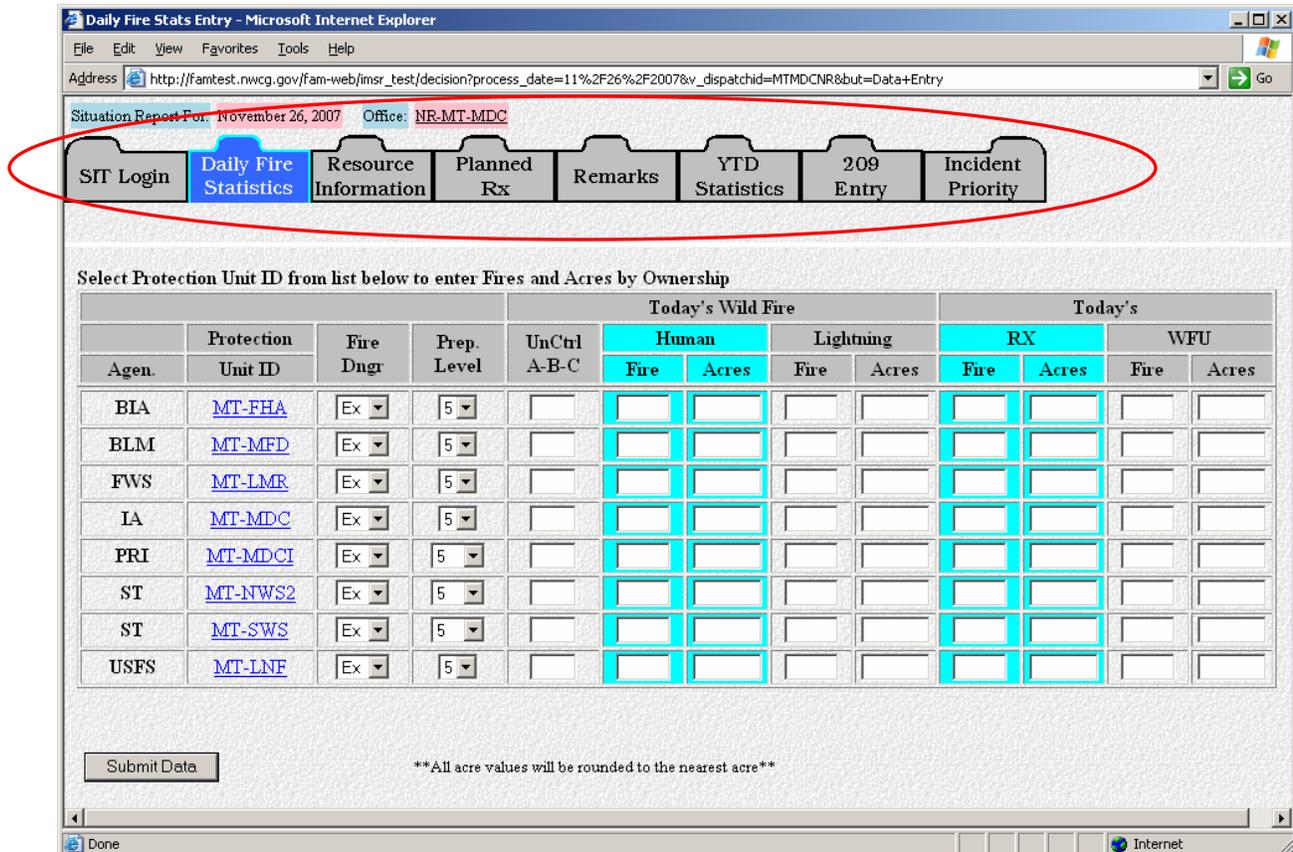

For more information about user authority please refer to Section VI. Site Management.

This page intentionally left blank

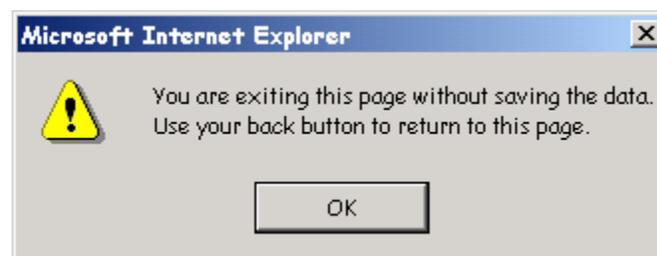

SITE NAVIGATION

To navigate within the SIT Program you can use either a mouse or a combination of keys including the Tab key. The Tab key can be used to navigate through the main web site. Using your mouse to navigate will allow you to move forward and backward through the data entry screens. You can also use your mouse to scroll up and down or from left to right within a screen in order to view the rest of the data entry fields.

Once you are in the Data Entry portion of the program you will see a row of tabs on the top of each screen with the name of the current screen highlighted.

You can move from screen to screen without entering data by simply using your mouse to click on the appropriate tab. A window, like the one shown below, will pop up.

Clicking the “OK” button will take you to the tab you selected. Using your “Back” button on your browser will return you to the screen you just left.

To use the keyboard for the Data Entry screens:

- Use the **mouse** and the **Tab** key to move from field to field. The **Tab** key will advance you to the next field.
- Pressing the **Shift** and **Tab** keys simultaneously will move you back to the previous field.

ENTERING SIT DATA

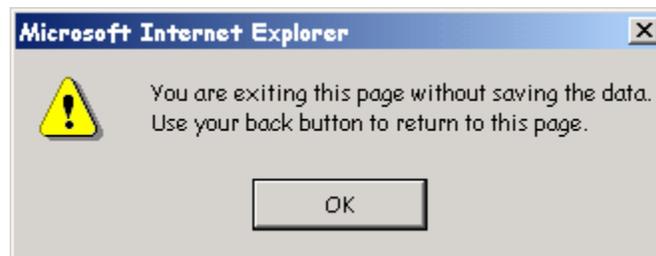

During the active fire season, SIT reports are required on a daily basis. Likewise, ICS-209s are used to report large wildfires, Wildland Fire Use (WFU) events, and any other significant events on lands under federal protection or federal ownership. Lands administered by states and other federal cooperators may also report in this manner. Consult the requirements within your Geographic Area for submission times, frequency, etc. Once your data has been submitted, it will be reviewed by your GACC. If there are any problems or questions, they must be resolved by 0200 Mountain Time, the submission deadline for NICC.

Be professional and discrete in the comments you make in “Remarks”. Keep your comments short, pertinent, and professional. Comments such as “hope we get some fires soon”, “here comes the overtime”, or “it’s Miller time and I’m out of here”, are inappropriate and there is no place for them in this program.

GACCs have edit access to the data entered by all of the offices within their Geographic Area.

Use the following tips for effective data entry:

- ❖ **Don’t use the “Enter” key** - it could submit the data you have entered (depending on the browser you are using) before you have filled in all the blocks on the screen, but it is not completely dependable as a method of submitting data.
- ❖ The **“Submit Data”** button is arguably the most important button on any screen in the program. By clicking this button the information you just entered is transmitted and stored in the database. It also will automatically take you to the next entry screen.
- ❖ If you made changes to the active screen and do not **“Submit Data”** from the screen you are leaving, a window, like the one shown below, will pop up.

Click the **“OK”** button. This will take you to the next tab. Use your **“Back”** button on your browser to return to the previous tab. You will get this window again. Clicking the **“OK”** button will take you to the screen you just entered data. Click the **“Submit Data”** button to save that data.

- ❖ If you forget to submit the “Year-to-Date Statistics” screen, even though you submitted all of the previous screens, any new fire/acre or resource status

information you entered will not be carried forward and will not show up in the reports.

- ❖ Certain fields have pull-down lists (marked with down arrows) that will let you select from the different choices available with a click of your mouse. Also within these fields, entering the first letter of the value you are looking for will let you scroll through the various choices.
 - **Example:** If you want to find Type 2 Crews in the list of resource types, pressing the letter “C” will take you to the first resource that starts with “C” and will allow you to scroll through the resource types that begin with “C” or if you press “C” again, it will jump to the next resource that begins with “C”.
- ❖ Some fields within the SIT Program will automatically clear each calendar day (e.g., numbers of new fires and acres), while other fields will carry over values from the previous report (e.g., Fire Danger, Preparedness Level, Resource information). When editing fields that already contain data, you need to highlight the existing data and then enter the new data. **The program does not type over old data.**
- ❖ **Do not use any special characters such as #, &, !, @,*,?, etc. in numeric fields.** A window, like the one shown below, will pop up and state you need to enter a positive number if you have entered a character in a numeric field.

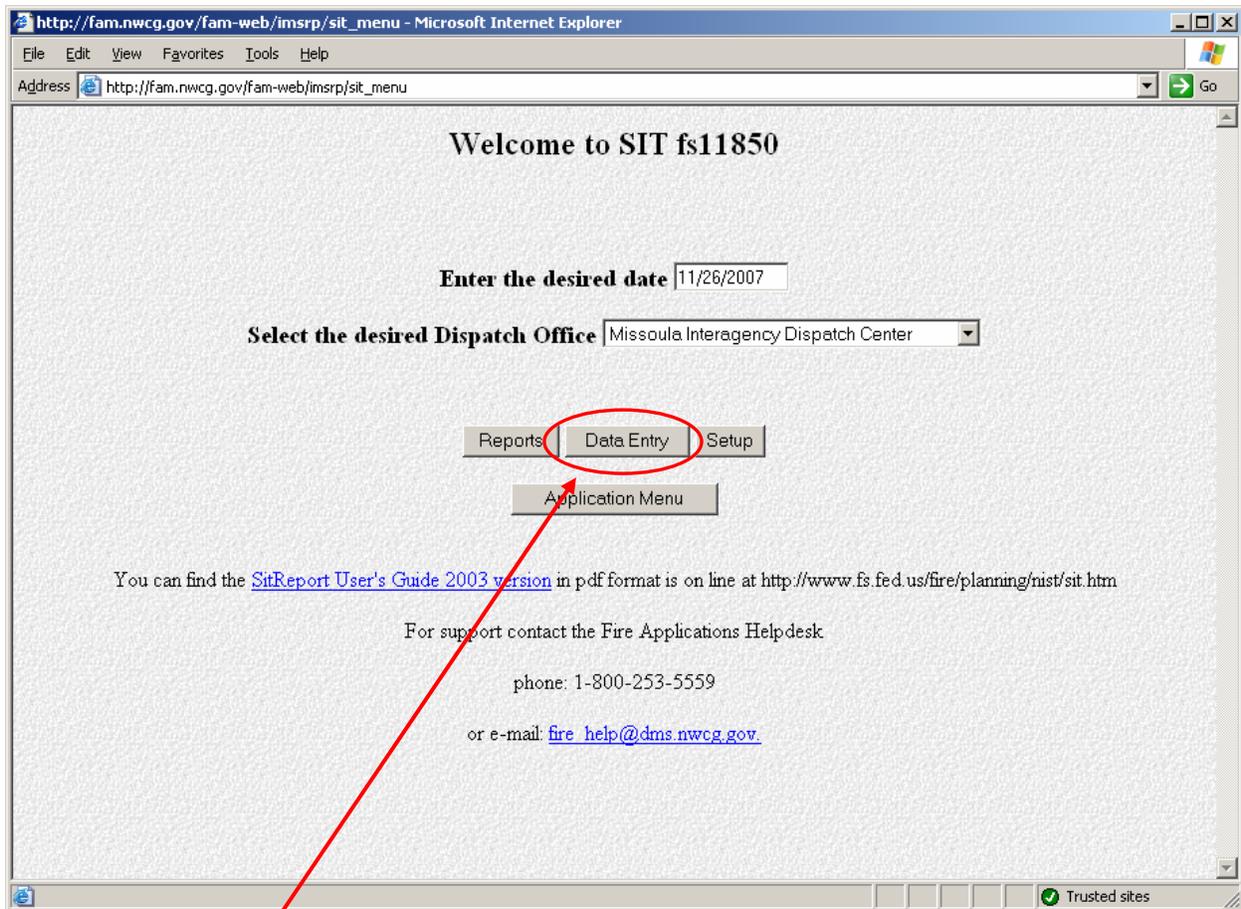

Press “**OK**” to go back and make the correction.

- ❖ If you notice that you made a mistake while entering your data, don't panic. If you are still in that screen, you can use the mouse to go back and select another value or clear out the field.

When you're ready to begin entering SIT information:

- Log on to **SIT**.
- The date will default to the current day's date in Central Time. If the current time is past 2400 Central Time, you must change the date back to the current date in your time zone.
- Select the desired dispatch office for which you are reporting.

The SIT Welcome screen is shown below:

Click the **"Data Entry"** button.

Upon clicking the **"Data Entry"** button, you will be taken to the **Daily Fire Statistics** screen.

This page intentionally left blank

DAILY FIRE STATISTICS

SIT Login | **Daily Fire Statistics** | Resource Information | Planned Rx | Remarks | YTD Statistics | 209 Entry | Incident Priority

Situation Report For: November 26, 2007 Office: NR-MT-HDC

Select Protection Unit ID from list below to enter Fires and Acres by Ownership

Agen.	Protection Unit ID	Fire Dngr	Prep. Level	UnCtrl A-B-C	Today's Wild Fire				Today's			
					Human		Lightning		RX		WFU	
					Fire	Acres	Fire	Acres	Fire	Acres	Fire	Acres
BLM	MT-BUD1	H	4									
BLM	MT-LED1	H	4									
PRI	MT-HDCI	H	4									
ST	MT-CES	H	4									
USFS	MT-HNE	H	4									

Submit Data **All acre values will be rounded to the nearest acre**

Be sure to report all wildland fire activity (regardless of suppression strategy, RX (Prescribed) and WFU (Wildland Fire Use) for the period of 0001 to 2400 local time.

- **Note:** If you need to update your Year-to-Date totals, **do not** use this screen to update. Go directly to the “YTD Statistics” tab (instructions on page 29).

Agency & Protection Unit ID

These fields will appear automatically, based on the units identified to have protection responsibility within your area.

Contact the GACC Intelligence Coordinator/Officer if you need to update or add a Protection Unit to your list.

Fire Danger by Protection Unit

This field will default to the value from the previous day's report. Clicking the down arrow allows you to select a different value: L = Low, M = Moderate, H = High, VH = Very High and E = Extreme.

Preparedness Level by Protection Unit

This field will also default to the previous day's report value. Clicking the down arrow allows you to select a different value, between 1 and 5, that represents the Preparedness Level of each unit for which you report. Consult your local Preparedness Plan/Area Mobilization Guide if you are unsure what each number represents.

If you have no new fires and no new acres to report, simply verify the Fire Danger and Preparedness Level for your unit(s) and click the **“Submit Data”** button.

Uncontrolled A-B-C fires by Protection Unit

This field automatically clears itself each day. Enter the number of fires (both human and lightning-caused) that remain uncontrolled at the time of the report. A, B and C Size Class fires are those fires that range from 0 to 99 acres in size. Uncontrolled large incidents will be captured in the 209 Entry section.

Wildfire, RX and WFU activity by Protection Unit

Beginning in 2008, users will enter all fire and acreage statistics by land ownership for the unit with protection responsibilities. This means the specific piece of land the fire started on and land(s) in which the fire burned. Additionally, users will no longer be able to enter fire and acreage statistics from the main “Daily Fire Statistics” screen.

Select the **“Protection Unit ID”** from the list to enter fire and acres by ownership.

Select Protection Unit ID from list below to enter Fires and Acres by Ownership

Agen.	Protection Unit ID	Fire Dngr	Prep. Level	UnCtrl A-B-C	Today's Wild Fire				Today's			
					Human		Lightning		RX		WFU	
					Fire	Acres	Fire	Acres	Fire	Acres	Fire	Acres
BLM	MT-BUD1	H	4									
BLM	MT-LED1	H										
PRI	MT-HDCI	H										
ST	MT-CES	H										
USFS	MT-HNF	H										

http://famttest.nwcg.gov - Fires and Acres by Ownership - Microsoft Internet Explorer

Fires and Acres by Ownership for
Protection Unit: MT-HNF Helena National Forest

Today's Fire Activity by Ownership

Delete	Ownership Unit	Human		Lightning		Rx		WFU	
		Fires	Acres	Fires	Acres	Fires	Acres	Fires	Acres
<input type="checkbox"/>	MT-HNF								
<input type="checkbox"/>	MT-CES								
<input type="checkbox"/>	MT-HDCI								
Total:		0	0	0	0	0	0	0	0

Update existing YTD records with these new values? Yes [View current YTD values](#)

Submit Data Reset

****All acre values will be rounded to the nearest acre****

- **Example:** “MT-HNF” was selected. As shown above, a screen will open that will allow users to enter Fires and Acres by Ownership for the Protection Unit selected.

Today's Human Fires by Ownership

This field automatically clears itself each day. Enter the number of new human-caused fires reported by land ownership for the reporting period.

Today's Human Acres by Ownership

This field automatically clears itself each day. The number entered is the total acres burned by land ownership during the reporting period, which includes acreage from large and Complex fires. Acreages must be rounded up or down to the next whole number; e.g., .4 acres or less would be rounded down to zero and .5 or more would be rounded up to 1 acre.

The number of new human-caused fires and new human-caused acres burned do not necessarily relate to each other; it is quite common to have new acres burned with no new fires being reported.

- **Example:** 1 new human-caused fire was reported yesterday on the XYZ unit for 60 acres burned. Today, there were no new human-caused fires, but yesterday's fire is now 400 acres in size. The report should show 0 new human-caused fires and 340 new human-caused acres burned.

Today's Lightning Fires by Ownership

This field automatically clears itself each day. Enter the number of new lightning-caused fires reported by land ownership for the reporting period.

Today's Lightning Acres by Ownership

This field automatically clears itself each day. The number entered is the total acres burned by land ownership during the reporting period, which includes acreage from large and Complex fires. Acreages must be rounded up or down to the next whole number; e.g., .4 acres or less would be rounded down to zero and .5 or more would be rounded up to 1 acre.

The number of new lightning-caused fires and new lightning-caused acres burned do not necessarily relate to each other; it is quite common to have new acres burned with no new fires being reported.

- **Example:** 1 new lightning-caused fire was reported yesterday on the XYZ unit for 60 acres burned. Today, there were no new lightning-caused fires, but yesterday's fire is now 400 acres in size. The report should show 0 new lightning-caused fires and 340 new lightning-caused acres burned.

Today's RX (Prescribed) Fires by Ownership

This field automatically clears itself each day. Enter the number of new prescribed fires reported by land ownership for the reporting period. **Prescribed Fires are defined as fires which are ignited by fire management personnel.**

The number of new prescribed fires and new prescribed acres burned do not necessarily relate to each other; it is quite common to have new acres burned with no new fires being reported. You can have multiple units slated for accomplishment, but it is still only one project; be careful not to over-report.

Today's RX (Prescribed) Acres by Ownership

This field automatically clears itself each day. Enter the number of new prescribed acres reported by land ownership for the reporting period.

The number of new prescribed fires and new prescribed acres burned do not necessarily relate to each other; it is quite common to have new acres burned with no new fires being reported.

- **Example:** 1 new prescribed fire was reported yesterday on the XYZ unit for 60 acres burned. There were no new prescribed fires today, but an additional 340 acres were burned on the same project. The report should show 0 new prescribed fires and 340 new acres burned.

Today's WFU (Wildland Fire Use) Fires by Ownership

This field automatically clears itself each day. Enter the number of new wildland fire use fires reported by land ownership for the reporting period. **Wildland Fire Use is defined as a fire that is lightning-caused and being managed to accomplish specific, pre-stated resource management objectives.** The fire must be located within a predefined area for which an approved Fire Management Plan exists.

Do not duplicate report. WFU fires are lightning-caused and should **only** be reported as "WFU". Do not double count them by reporting them as "Lightning" fires too.

Today's WFU (Wildland Fire Use) Acres by Ownership

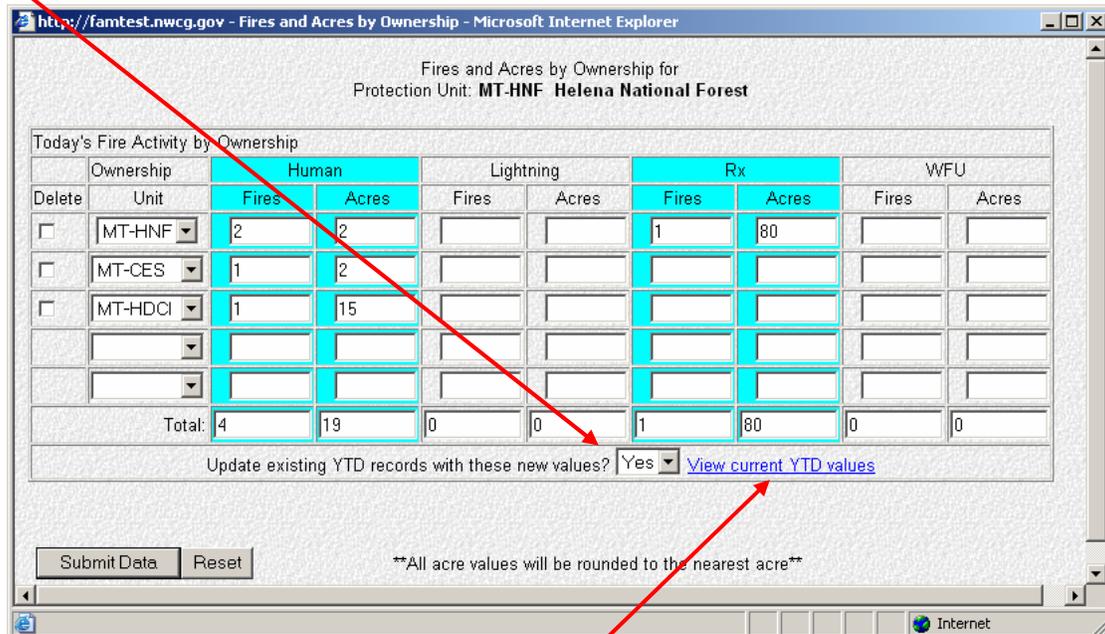

This field automatically clears itself each day. Enter the number of new wildland fire use acres reported by land ownership for the reporting period.

Do not duplicate report. Although WFU acres are caused by lightning, they should **only** be reported as "WFU" acres.

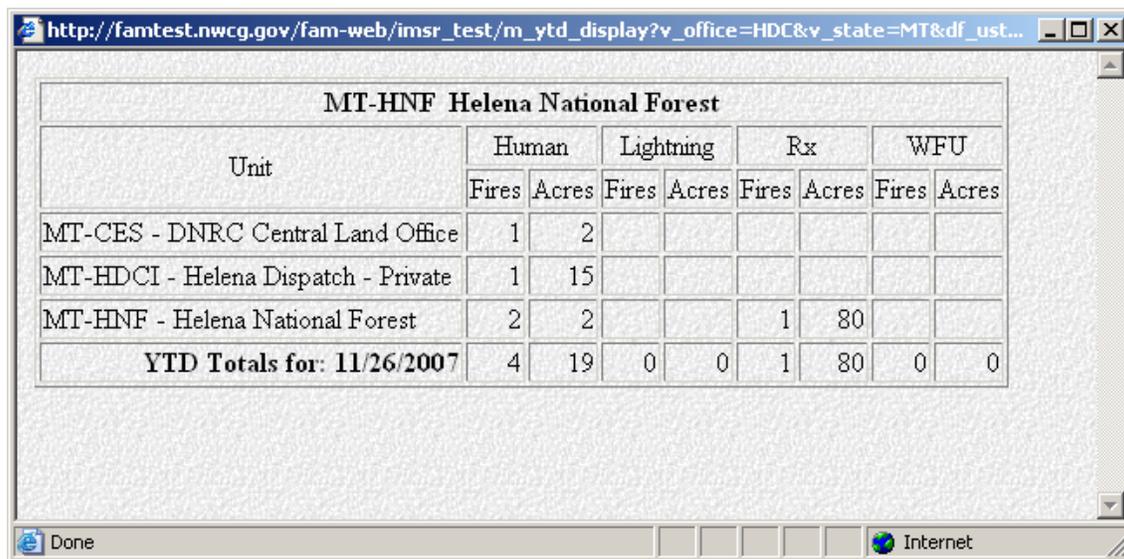

The number of new wildland fire use fires and new wildland fire use acres burned do not necessarily relate to each other; it is quite common to have new acres burned with no new fires being reported.

- **Example:** 1 new wildland fire use fire was reported yesterday on the XYZ unit for 60 acres burned. There were no new wildland fire use fires today, but an additional 340 acres were burned on the same project. The report should show 0 new wildland fire use fires and 340 new acres burned.

Once you have reviewed the information on the Fires and Acres by Ownership screen and ensured that "Update existing YTD records with these new values?" is defaulted to "Yes", click the "Submit Data" button.

By clicking the "View current YTD values" link identified above, a window will pop up (as shown below) that will allow the user to verify Year-To-Date fires and acres by ownership submitted for that Protection Unit.

Again, review the information you entered on the "Fire and Acres by Ownership screens with the totals that populate the "Daily Fire Statistics" by Protection Unit screen. Once you have ensured that this information is correct, click the "Submit Data" button. An example of what this screen looks like upon completion is shown below.

The screenshot shows a web browser window titled "Daily Fire Stats Entry - Microsoft Internet Explorer". The address bar contains a URL from the NWCG website. The page header includes "Situation Report For: November 26, 2007" and "Office: NR-MT-HDC". A navigation menu contains buttons for "SIT Login", "Daily Fire Statistics" (which is highlighted), "Resource Information", "Planned Rx", "Remarks", "YTD Statistics", "209 Entry", and "Incident Priority".

The main content area is titled "Select Protection Unit ID from list below to enter Fires and Acres by Ownership". It contains a table with the following structure:

Agen.	Protection Unit ID	Fire Dngr	Prep. Level	UnCtrl A-B-C	Today's Wild Fire				Today's			
					Human		Lightning		RX		WFU	
					Fire	Acres	Fire	Acres	Fire	Acres	Fire	Acres
BLM	MT-BUD1	H	4		1	1	0	0	0	0	0	0
BLM	MT-LED1	H	4		0	0	0	0	0	0	0	0
PRI	MT-HDCI	H	4		0	0	0	0	0	0	0	0
ST	MT-CES	H	4		2	4	0	0	0	0	0	0
USFS	MT-HNF	H	4		4	19	0	0	1	80	0	0

At the bottom of the page, there is a "Submit Data" button and a note: "**All acre values will be rounded to the nearest acre**".

RESOURCE INFORMATION

Situation Report For: November 26, 2007 Office: NR-MT-HDC

Navigation: SIT Login | Daily Fire Statistics | **Resource Information** | Planned Rx | Remarks | YTD Statistics | 209 Entry | Incident Priority

Unit	Agency	Resource	Available	Committed	Delete
MT-CES	ST	ENGS	2	2	No
MT-CES	ST	HEL2	1	0	No
MT-CES	ST	HEL3	1	0	No
MT-HNF	BIA	CRW2	0	1	No
MT-HNF	USFS	CRW1	0	1	No
MT-HNF	USFS	CRW2	1	1	No
MT-HNF	USFS	ENGS	4	3	No
MT-HNF	USFS	HEL3	1	0	No

Submit Data

The Resource Information screen captures resources “committed” or “available” for initial attack/extended attack and prescribed fire projects. **Resource numbers should be projected for the next day.**

- **Note:** Resources committed to large incidents are reported in the “209 Entry” section – not here.

Unit

Click the pull-down menu to select from the choices available for your area of responsibility. The format for this field is: the 2-letter state identifier followed by the unit identifier. **Use the unit identifier of the unit the resource is assigned to, not the unit that owns it.**

- **Example:** A Type 1 crew from the Helena National Forest assigned locally would be entered as **MT-HNF**.
- **Example:** A Type 2 crew from the Flathead Agency on assignment to the Helena National Forest would be entered as **MT-HNF** as well.

Agency

Click the pull-down menu to select the agency that owns the resource.

- **Example:** A Type 1 crew from the Helena National Forest assigned locally would be entered as **USFS**.
- **Example:** A Type 2 crew from the Flathead Agency on assignment to the Helena National Forest would be entered as **BIA**.

Resource

Click the pull-down menu to select the type of resource. The choices for this field are listed in the abbreviated 4-letter mnemonic format. Entering the first letter of the value you are looking for will let you scroll through the various choices.

- **Example:** If you want to find Type 2 Crews in the list of resource types, pressing the letter “C” will take you to the first resource that starts with “C” and will allow you to scroll through the resource types that begin with “C” or if you press “C” again, it will jump to the next resource that begins with “C”.

Available

Enter the number of resources you project will be available the next day for the unit and agency you selected, regardless of whether they can leave the local unit. **Available resources are defined as those resources physically located on your unit(s), which are not on a mandatory day off.** Unstaffed resources such as engines, or resources expected to be out of service due to maintenance/repairs for the entire day, **should not be shown.**

- **Note:** Remember that you are projecting resources for the next day.

All resources should be listed, regardless of whether they can leave the unit or State. The intent is to present fire managers a record of a unit's capability to handle its own local situation. If further clarification regarding resource availability is required, use the “Remarks” section.

Committed

Enter the number of resources committed for the unit and agency you selected.

Committed resources are defined as those resources which are assigned to initial/extended attack incident(s) or prescribed fire projects on units for which you are reporting.

- **Note:** Resources that are committed to large incidents should **not** be reported here; they will be reported through the “209 Entry” screens.

Resources that have been sent away to incidents outside your area of responsibility should not be reported until they return home.

Resources from other units/areas assigned to any of your units should be reported from the time of their arrival (or projected arrival) until they are demobed.

Once you have built a list of your local resources, they will carry over to the next day's report. Edit this data as needed to reflect changes in the number of resources available/committed.

To remove resources no longer assigned to your unit(s), click the down arrow under the “Delete” column and select “Yes”.

When you have finished entering your resource data, click the “Submit Data” button.

If your screen has 10 lines of entered resource data and additional lines of resources need to be added, click the **“Submit Data”** button. Click on the Resource Information tab again. By moving your screen down, you will see an additional 10 blank rows for you to enter additional resources. Click **“Submit Data”** again when you have finished entering your resources.

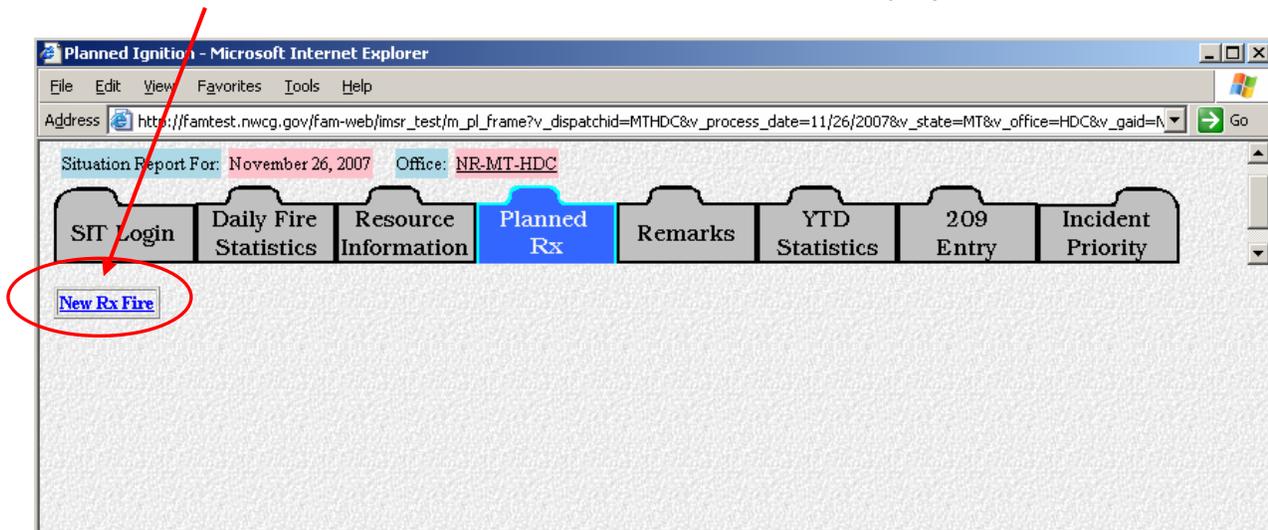

This page intentionally left blank

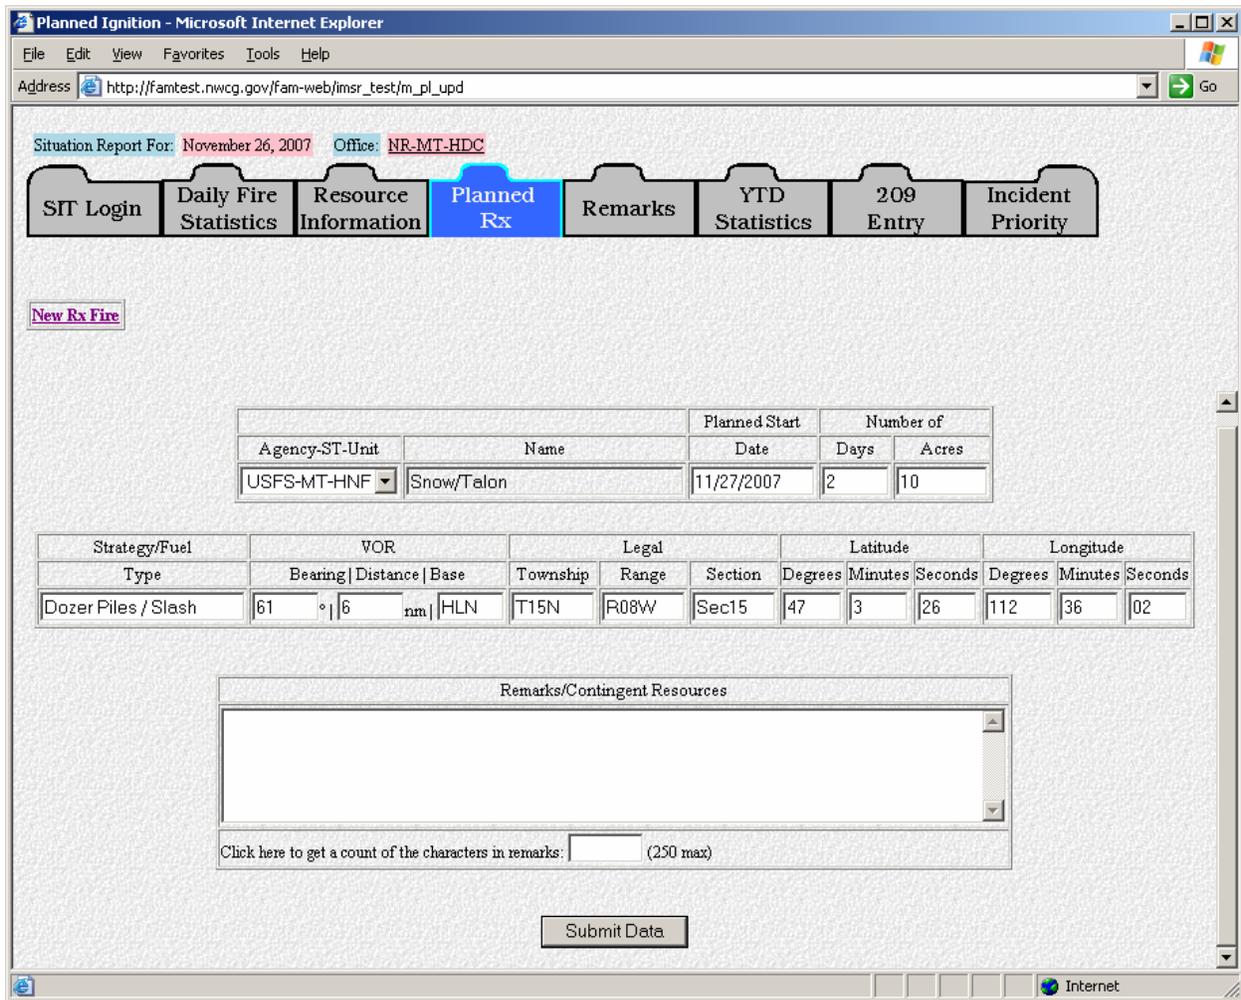

PLANNED RX (Prescribed) FIRES

The Planned Rx screen reports prescribed fire projects that are planned within the next few days. It will give managers an idea of the number of projects being conducted in the short term, along with planned resource commitments.

- **Note:** Reporting procedures for “**Planned Rx**” fires differ from GACC to GACC. Current GACC reporting procedures are:
- **Alaska** – report **all** “Planned Rx” fires for the next reporting period.
 - **California** – report **all** “Planned Rx” fires for the next reporting period.
 - **Eastern** – report **all** “Planned Rx” fires planned for ignition within the next 24 hours.
 - **Great Basin** – report **all** “Planned Rx” fires planned for ignition within the next day.
 - **Northern Rockies** – **not required** to report “Planned Rx” fires on the SIT report.
 - **Northwest** – report **all** “Planned Rx” fires planned for ignition within the next 2-3 days.
 - **Rocky Mountain** – report **all** “Planned Rx” fires ONE DAY prior to the day of planned ignition and update the report on each day subsequently, until the prescribed fire is complete.
 - **Southern** – State Coordination Centers will report **all** “Planned Rx” fires one day prior to the day of planned ignition.
 - **Southwest** – **not required** to report “Planned Rx” fires on the SIT report.

Click the “**New RX Fire**” button to create a record for a new project.

Agency-ST-Unit

Click the pull-down menu to select the Agency-State-Unit. Your choices are limited to those offices for which you have reporting responsibility.

Name

Enter the name for the project.

Once you enter a value in this field, it controls the record of the project in the database and cannot be changed.

Planned Start Date

Enter the date in the format of MM/DD/YY.

If it has not been updated within 2 days after the planned start date, the project record will not show up in the pick list.

Number of – Days

Enter the number of days that it will take for the project to be completed.

Number of – Acres

Enter the total number of acres expected to be burned.

Strategy/Fuel Type

Enter type of burn strategy being used and the predominant fuel type (i.e., piles, broadcast burn, etc.).

VOR Information

Enter the bearing, distance, and base or OMNI from the nearest VOR as you would normally enter it on a resource order.

- **Example:** 61, 6, HLN

Legal Description

Enter the Township, Range and Section for the point of origin.

- **Example:** T15N, R08W, Sec 15

Latitude – Degrees

This should be a 2-digit number that represents the point of origin.

Latitude – Minutes

This should be a 2-digit number that represents the point of origin (rounded to the nearest minute).

Longitude – Degrees

This should be a 3-digit number that represents the point of origin.

Longitude – Minutes

This should be a 2-digit number that represents the point of origin (rounded to the nearest minute).

Remarks/Contingent Resources

In narrative format, enter a list of all resources you plan to commit to completing the project, including resources held in reserve.

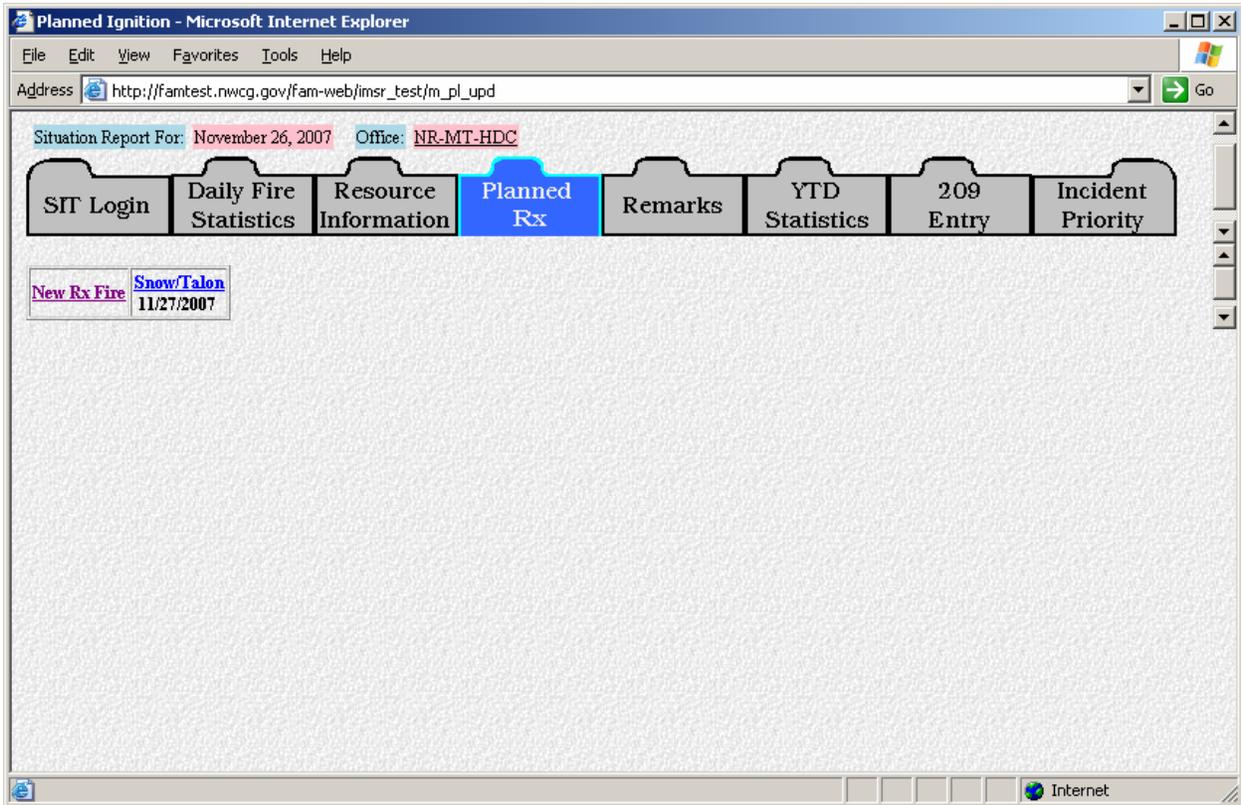

When you have finished entering the information on planned prescribed fire projects, click the “**Submit Data**” button to transmit the data. The screen will clear itself so that you can enter data on another project. When you have finished entering Planned RX Fires, click the tab at the top of the screen to go to whichever screen you want next (Remarks, YTD Statistics, 209 Entry, etc.).

Once information has been entered pertaining to a prescribed fire project, it will carry over for 2 days from the planned start date.

If the project cannot be implemented on the planned start date, you should update this field with a revised start date; otherwise the project record will not show up in the pick list.

When you enter the "Planned RX" fires screen, you may see additional boxes across the top of the screen with the project name(s) as shown below. Clicking the project name link will open up the record.

Many of the entries will not change over the course of the project; however, the Planned Start Date field should be reviewed daily and changed as needed.

REMARKS

Situation Report For: **November 26, 2007** Office: **NR-MT-HDC**

SIT Login Daily Fire Statistics Resource Information Planned Rx **Remarks** YTD Statistics 209 Entry Incident Priority

Preparedness level

Remarks

Helena Dispatch Zone Preparedness Level = 4. A Canadian frontal system will move across the zone tomorrow bringing scattered thundershowers and cooler temperatures. Light initial attack activity today, 4 new fires for 18 acres. MT-HNF completed 80 acre RX burn. Updated YTD statistics for MT-HNF.

Click here to get a count of the characters in remarks: (500 max)

On Call

To report a fire call 406-444-4242

Click here to get a count of the characters in on call: (250 max)

This screen is used to capture **“On-Call”** information for your center, along with **“Remarks”** pertinent to your units/area and your Dispatch Center/Area preparedness level.

Preparedness Level

Click the pull-down menu to select the Preparedness Level for your Dispatch Center or Geographic Area as a whole.

Remarks

Briefly summarize the current situation on your local units or within your Geographic Area. The program will automatically clear this field each day. Include the following types of information:

- General synopsis of current and expected weather.
- Fuel/drought conditions (live fuel/1,000-hr moisture, ERCs, KBDIs, etc.).
- What is the current and anticipated fire situation?
 - Are fires being caught at initial attack, or are they escaping?
 - Are more ignitions expected due to lightning carry-overs?

- Significant events or problems.
- Resource status (are shortages anticipated?).
- Updates to Year-To-Date fires and acres.

On Call

List the Dispatcher(s)/Coordinator(s) on-call for your office, along with home/cell/pager numbers. Privacy information entered in the database via this field will be protected from public access; users will only be able to pull on-call information for units/centers within their area of responsibility.

The program will carry over the On-Call information from day to day.

Once you have finished entering the remarks and on-call information, click the “**Submit Data**” button to transmit the data. This will automatically take you to the Year-to-Date Statistics screen.

YEAR-TO-DATE STATISTICS (YTD)

SIT Login | Daily Fire Statistics | Resource Information | Planned Rx | Remarks | **YTD Statistics** | 209 Entry | Incident Priority

Situation Report For: November 23, 2007 Office: NR-MT-HDC

Select Protection Unit ID from list below to edit YTD Fires and Acres by Ownership

Protection Unit:	Butte Field Office BLM	Human		Lightning		Rx		WFU	
		Fires	Acres	Fires	Acres	Fires	Acres	Fires	Acres
MT-BUDI	YTD Totals 27-NOV-07	0	6	3	53	0	0	0	0
	No fire activity today	0	0	0	0	0	0	0	0
Current YTD Values	YTD Totals for: 11/23/2007	0	6	3	53	0	0	0	0

Protection Unit:	Lewistown Field Office BLM	Human		Lightning		Rx		WFU	
		Fires	Acres	Fires	Acres	Fires	Acres	Fires	Acres
MT-LED1	YTD Totals 27-NOV-07	0	0	0	0	0	0	0	0
	No fire activity today	0	0	0	0	0	0	0	0
Current YTD Values	YTD Totals for: 11/23/2007	0	0	0	0	0	0	0	0

Protection Unit:	Helena Dispatch - Private PRI	Human		Lightning		Rx		WFU	
		Fires	Acres	Fires	Acres	Fires	Acres	Fires	Acres
MT-HDCI	YTD Totals 27-NOV-07	7	1,160	3	216	0	0	0	0
	No fire activity today	0	0	0	0	0	0	0	0

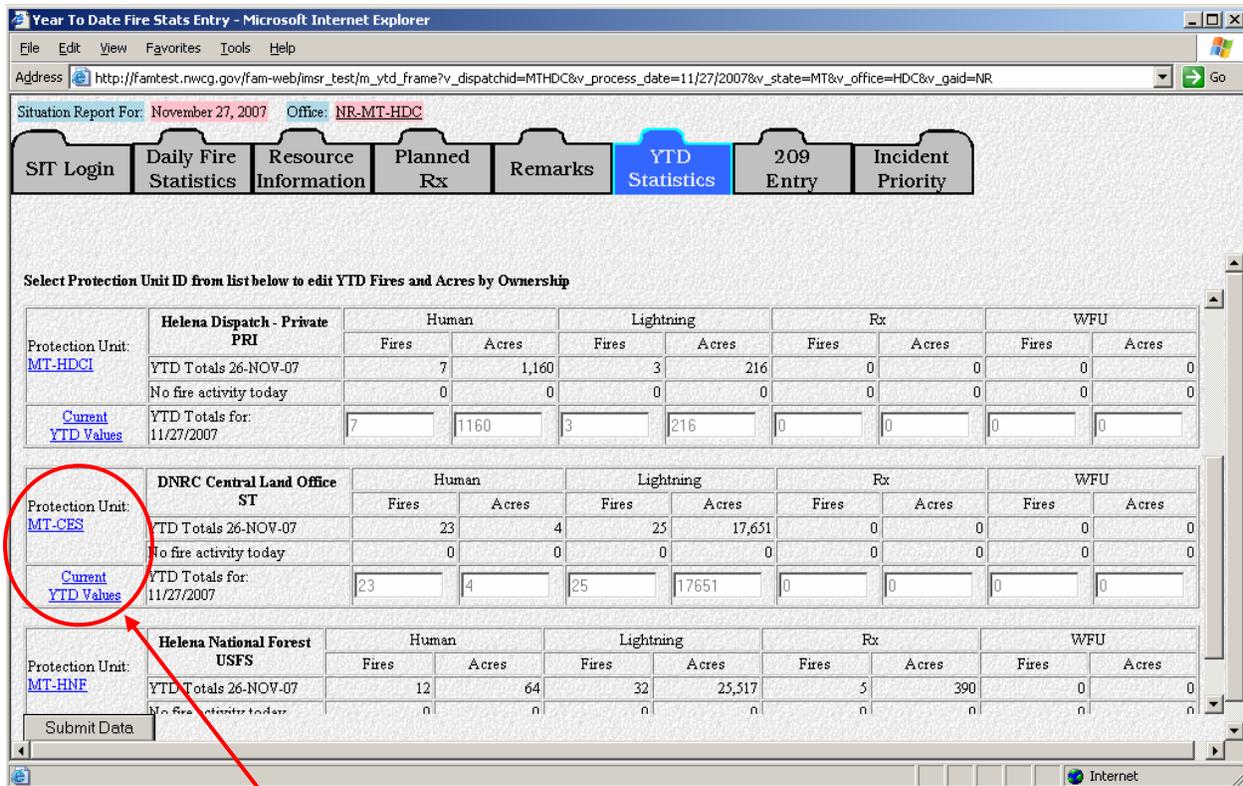

Submit Data

The YTD screen captures fire statistics on a calendar year basis (January 1 - December 31). As you enter the screen, the program will display the year-to-date statistics for each unit with protection responsibilities within your area.

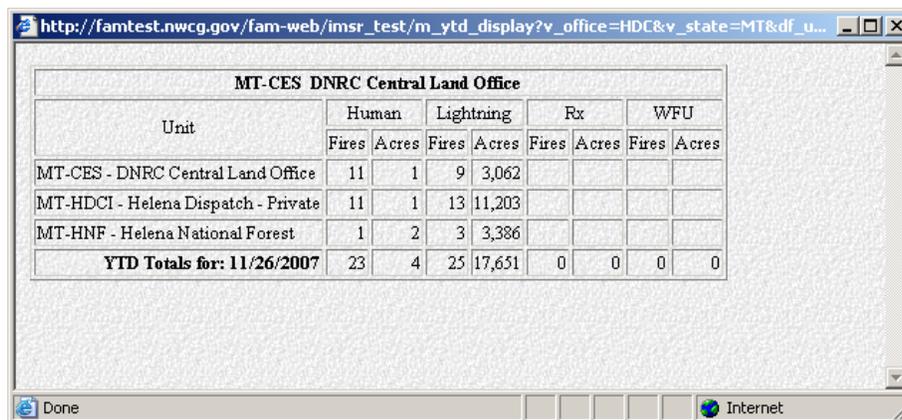

The SIT Program automatically calculates new year-to-date totals for all fire types. On a daily basis, the new fires and acres that you reported via the Daily Fire Statistics screen will automatically be added to the YTD totals carried over from the previous day's report.

Click the “**Submit Data**” button to transmit the data as calculated.

- **Note:** If you forget this step in the YTD Statistics screen, any new fire/acre or resource status information you entered will not be carried forward and will not show up in the reports.

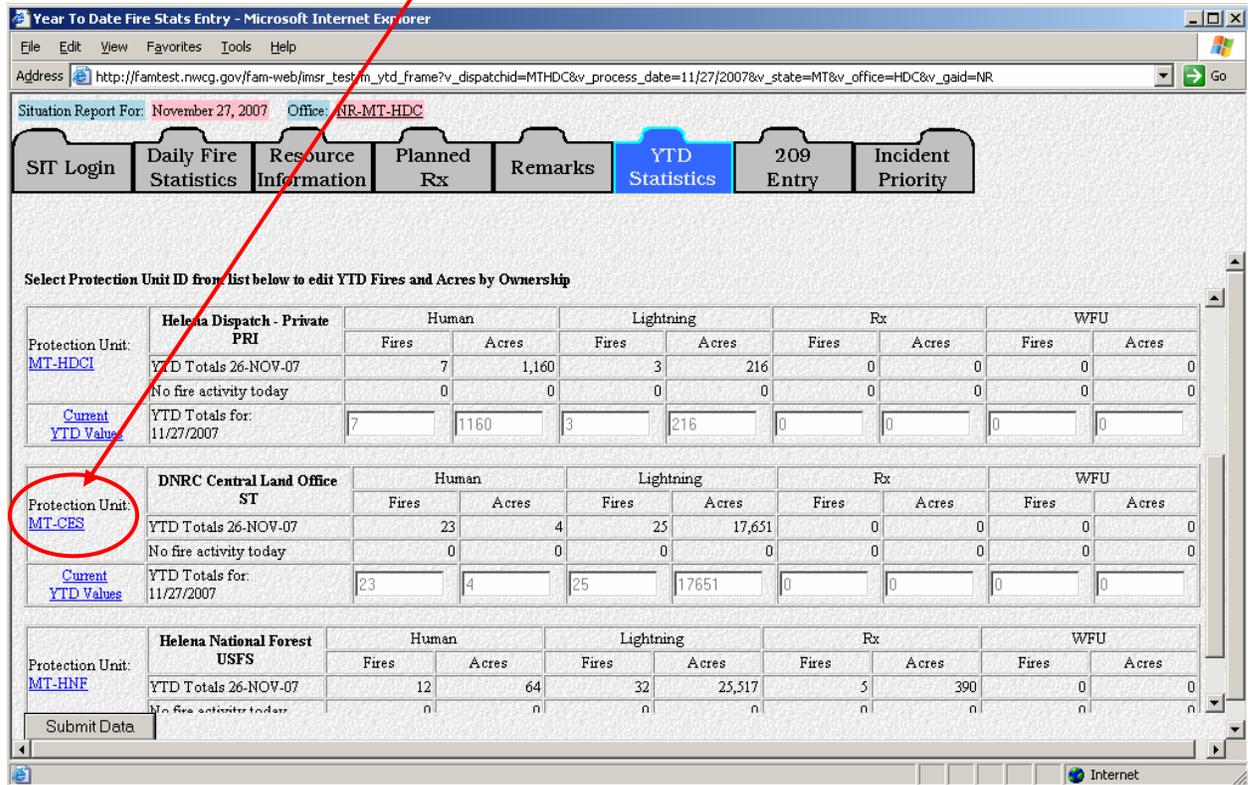

By clicking the “[Current YTD Values](#)” link for any Protection Unit, a window will pop up (as shown below) that will allow the user to verify Year-To-Date fires and acres by ownership submitted for that unit.

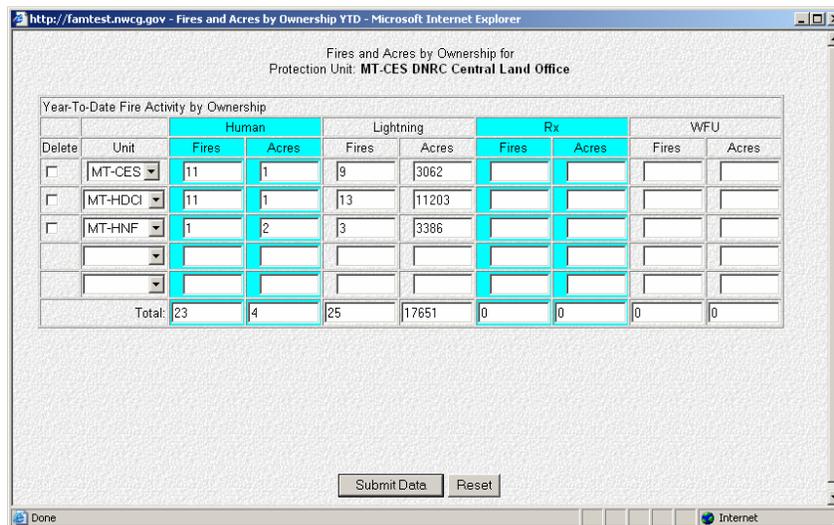

Adjusting YTD Totals

The preferred method to adjust YTD fires and/or acreages is:

- Select the Protection Unit ID for the unit that needs to be adjusted on the YTD Statistics screen, as shown below.

- Example:** "MT-CES" was selected. As shown below, a screen will open that will allow users to modify the Year-To-Date Fire Activity by Ownership for the Protection Unit as needed.

- Once you have made your changes on the Year-To-Date Fire Activity by Ownership screen, click the “**Submit Data**” button.
- Verify that the changes were accepted for that unit in the “**YTD Totals for xx/xx/xxxx (current date)**” line.
- Click the “**Submit Data**” button on the YTD Statistics screen to accept changes.

The year-to-date totals shown on the Situation Report should be adjusted periodically to reflect statistics being reported on agency fire reports. While large fires are ongoing, compare the current and previous ICS-209(s) on a daily basis to determine whether total acreages have increased, decreased, or remained the same.

Additional acres burned each day should be reported in the Daily Fire Statistics screen. See “Today’s Human Acres by Ownership” and “Today’s Lightning Acres by Ownership” data entry instructions (page 15).

209 Entry

GENERAL – ICS-209 Data Entry Instructions

The Incident Status Summary (ICS-209) is used to report large Wildfires, Wildland Fire Use (WFU) events, and any other significant events on lands under federal protection or federal ownership. Lands administered by states and other federal cooperators may also report in this manner.

The ICS-209 is submitted by the agency that has protection responsibility for the incident regardless of who administers the land. If the protection agency is non-federal and chooses not to meet federal reporting standards, then the federal agency which has administrative jurisdiction will submit the ICS-209.

ICS-209 reporting criteria are as follows:

- **Wildfire:** large fires one hundred (100) acres or larger in timber fuel types, three hundred (300) acres or larger in grass or brush fuel types, or when a Type 1 or 2 Incident Management Team (IMT) is assigned.
- **WFU fires and for wildfires where confinement is the strategy employed as the appropriate management response:** when the event exceeds one hundred (100) acres in timber fuel types or three hundred (300) acres in grass or brush fuel types, or when a Fire Use Management Team (FUMT) is assigned.
- **Other significant events:** classified as incidents in which significant commitment of wildland fire resources has occurred or when a Type 1 or 2 Interagency IMT has been assigned.
 - **Note:** Refer to your Geographic Area Mobilization Guide for additional reporting guidelines.

There are 5 different screens you will be entering ICS-209 data. The screens are comprised of the following incident information:

- **Screen #1:** ICS-209 Blocks 1-14 (Current Date, Initial/Update/Final information, Cause, Incident Commander, Latitude/Longitude, Descriptive Location, etc.)
- **Screen #2:** ICS-209 Blocks 15-33 (Size, Estimated Costs, Injuries/Fatalities, Structure Information, Threat to Human Life/Safety, Projected incident movement, Values at Risk, Critical Resource Needs, Significant Events, etc.)
- **Screen #3:** ICS-209 Blocks 34-42 (Projected Final Size, Estimated Final Costs, Actions planned for next operational period, Remarks, etc.)
- **Screen #4:** ICS-209 Blocks 43-44 (Committed Resources, Cooperating and assisting Agencies)
- **Screen #5:** ICS-209 Blocks 45-47 (Prepared By and Approval Information)

Examples of each of these screens can be viewed in the “**ICS-209 Data Entry Instructions – by Block**” section of this guide (page 45).

Some specific instructions exist for particular Geographic Areas. These are noted following the general instructions that are listed for each procedure in this guide.

There are 47 blocks in which to enter data for each individual ICS-209. Pay careful attention to the way the blocks are used to report information. Instructions have been written to assist users in finding the most appropriate location to report specific information (e.g., projected incident movement/spread, values at risk, control problems and concerns, etc.). Additionally, Block 42 - “Remarks” can be used to expand upon entries made in previous blocks and marked accordingly.

The information in some of the blocks will be carried over each day. Blocks that clear each day are marked as such in the instructions for each block. Information that carries over from day to day may need to be updated, such as a change in Incident Commander or resources committed, a corrected location, etc. Existing data must be deleted before new data is entered—it does not automatically delete. Leave blocks blank if there is nothing to report. Zeros are not required if there are no numbers to report.

Blocks 1, 2, 4, 6, 11, 13 and 14 **must be completed** in order for any ICS-209 to be accepted by the program. These blocks are identified with “*” by the title. Error messages will be generated if this information is not received or is incorrectly entered.

Some blocks are number-only blocks in which **no text data will be accepted**. These are noted in the instructions for each block later in this section. Text entries in these blocks will create errors upon submission of the ICS-209.

Character maximums are listed for each individual block in the instructions below and on the Data Entry portion of the program. They appear at the bottom of the text blocks as:

char count: (2000 max)

- **NOTE FOR CALIFORNIA USERS ONLY:** Most of the information in the data entry blocks will not be cleared during the same date as it would for users reporting only once per day. Please enter or update information in each individual block when submitting an updated ICS-209 on the same date.

To navigate within the ICS-209 screens you can use either a mouse or a combination of keys including the Tab key. The Tab key can be used to navigate through the data entry blocks. Using your mouse to navigate will allow you to move forward and backward through the data entry blocks.

You can also use your mouse to scroll up and down or from left to right within a screen in order to view the rest of the data entry blocks.

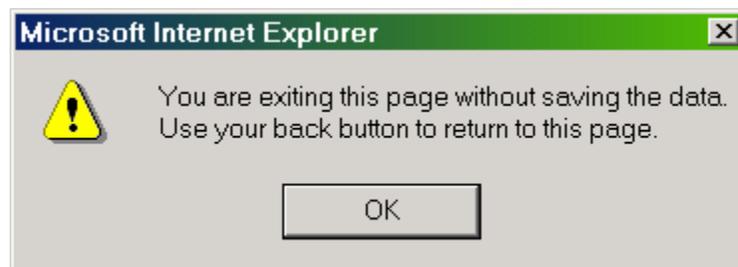

To use the keyboard for the Data Entry screens:

- Pressing the **Shift** key and then pressing the **Tab** key will move the cursor back to the previous field.
- The **Tab** key can be used to advance through various fields.
- **Up** and **Down Arrow** keys will allow you to move through pull-down menu choices.
- Pressing the **Tab** key selects the highlighted choice and moves the cursor to the next block.
- **Arrow** keys can be used to navigate through the radio buttons, and the **Space Bar** can be used to select or deselect one.
- The **Tab** key can be used to navigate through the check boxes, and the **Space Bar** can be used to select or deselect one.

Use the following tips for effective data entry:

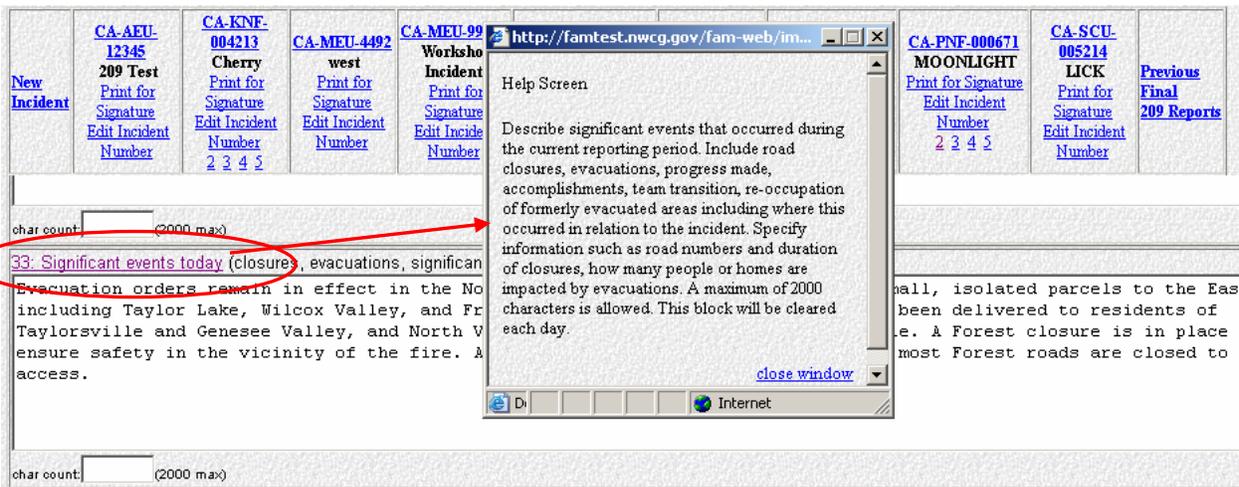

- ❖ **Don't use the "Enter" key** - it could submit the data you have entered (depending on the browser you are using) before you have filled in all the blocks on the screen, but it is not completely dependable as a method of submitting data.
- ❖ The **"Submit Data"** button is the most important button on any screen in the program. By clicking this button, the information you just entered is transmitted and stored in the database. It also will automatically take you to the next data entry screen.

If you forget to click the **"Submit Data"** button before leaving a screen, an alert message (shown below) will pop up.

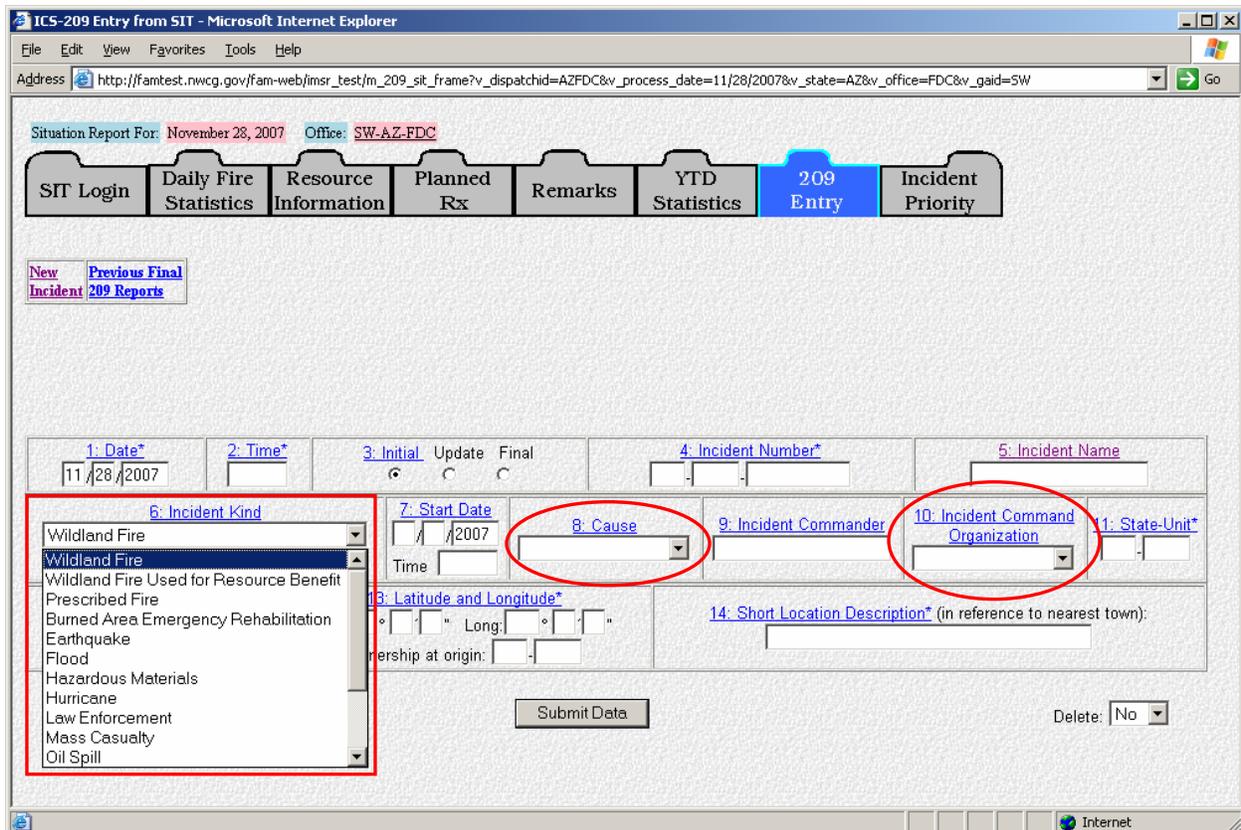

Click **"OK"**. This will take you to the next data entry screen. Use the **"Back"** button on your browser to return to the previous screen. You will see this window again. Clicking the **"OK"** button will take you to the screen you just entered data. Click the **"Submit Data"** button.

- ❖ Help Links for each data entry block exist. By clicking on any of the links a help screen explaining what information is needed for that specific block will appear. In the example shown below, a link to Block "33. Significant events today" was clicked.

- ❖ Certain fields have pull-down lists (marked with down arrows, as shown below) that will let you select from the different choices available with a click of your mouse.

- ❖ **Do not use any special characters such as #, &, !, @,*,?, etc. in numeric fields.** A window, like the one shown below, will pop up and state you need to enter a positive number if you have entered a character in a numeric field.

Press “**OK**” to go back and make the correction.

- ❖ If you notice that you made a mistake while entering your data, don't panic. If you're still in that screen, you can use the mouse to go back and select another value or clear out the field. Go to “**EDITING an ICS-209**” instructions on page 41 for additional information.

ICS-209 Forms and Documentation

All official ICS-209s generated by the FAMWEB applications can be printed out, signed by the Incident Commander, and maintained with other official incident documentation. Specific instructions for this process are located in the “**Processing Official ICS-209s**” section (page 76).

- **Note:** ICS-209 information maintained in this program's database should not be regarded as the official legal documentation required by the incident. This program was designed to allow for ICS-209 information to be placed and stored in a central database for more efficient access to incident information and summaries.

A blank copy of the official ICS-209 form can be referenced in Section VII. Appendix (pages 121-123). Various examples of completed ICS-209s can be referenced in that section as well.

“DELETE” Button Function

Located in the bottom right corner of Screen #1 adjacent to the “Submit Data” button you will see the “Delete” pull-down menu, as shown below.

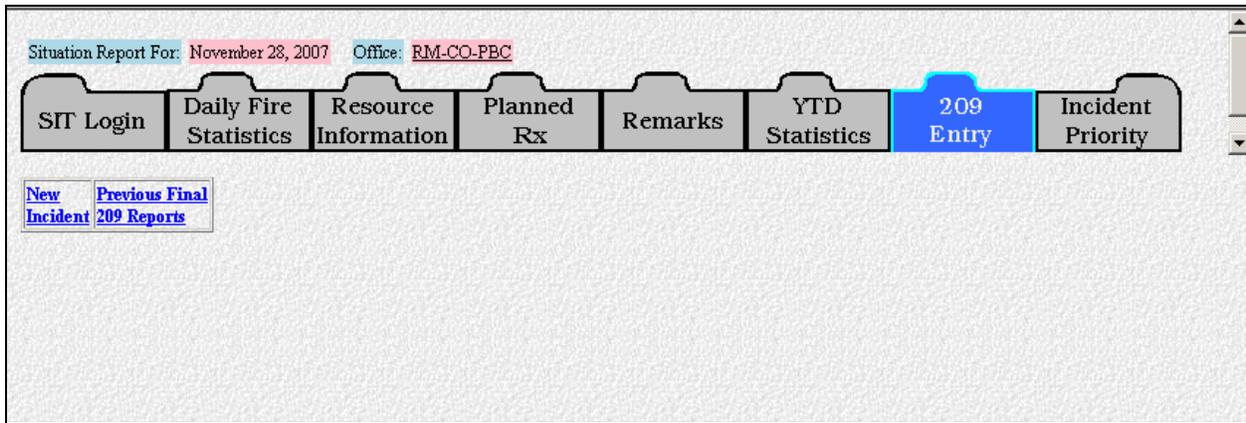

Screenshot of the ICS-209 Entry form in Microsoft Internet Explorer. The form is titled "ICS-209 Entry from SIT - Microsoft Internet Explorer provided by USDA Forest Service". It features a navigation bar with buttons for "SIT Login", "Daily Fire Statistics", "Resource Information", "Planned Rx", "Remarks", "YTD Statistics", "209 Entry" (highlighted), and "Incident Priority". Below the navigation bar are links for "New Incident" and "Previous Final 209 Reports". The main form contains several fields: 1. Date* (11/28/2007), 2. Time*, 3. Initial (radio buttons for Update, Final), 4. Incident Number*, 5. Incident Name, 6. Incident Kind (Wildland Fire), 7. Start Date (/ /2007), 8. Cause, 9. Incident Commander, 10. Incident Command Organization, 11. State-Unit*, 12. County, 13. Latitude and Longitude* (Lat: ° ' " Long: ° ' " Ownership at origin: -), and 14. Short Location Description* (in reference to nearest town). At the bottom, there is a "Submit Data" button and a "Delete: No" drop-down menu, which is circled in red. A red arrow points from the text above to the "Delete" menu.

The delete button drop-down menu defaults to “No”. You would only select “yes” from the drop-down on the rare occasion that an ICS-209 was entered that did not need to be. This will only delete the current ICS-209 and not any other ICS-209s for that incident number.

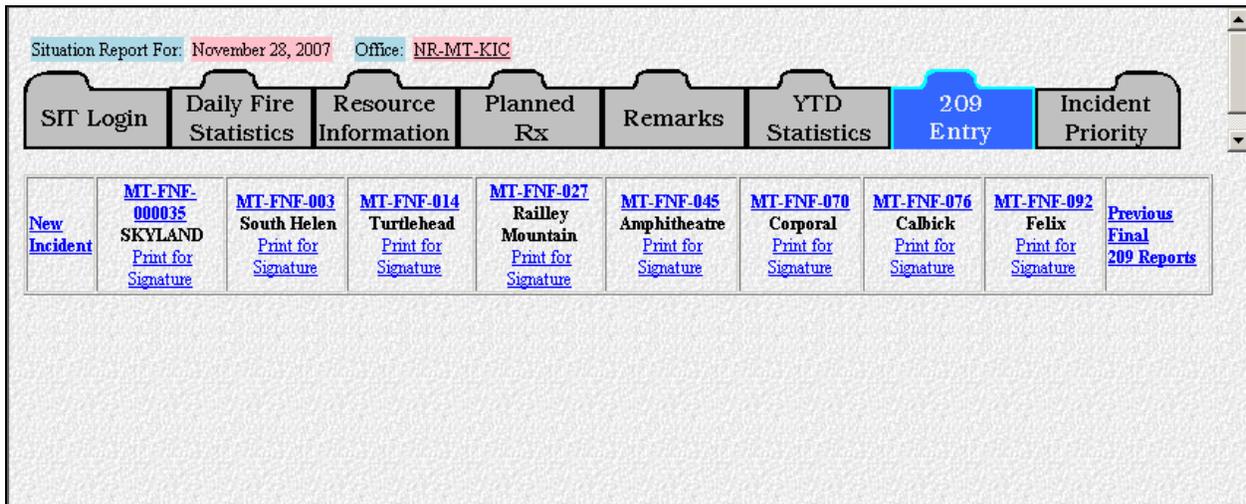

ICS -209 ENTRY via the SIT PROGRAM

The “209 Entry” screen will look like either of the example screens shown below:

- Screen view **without** any ICS-209 incidents.

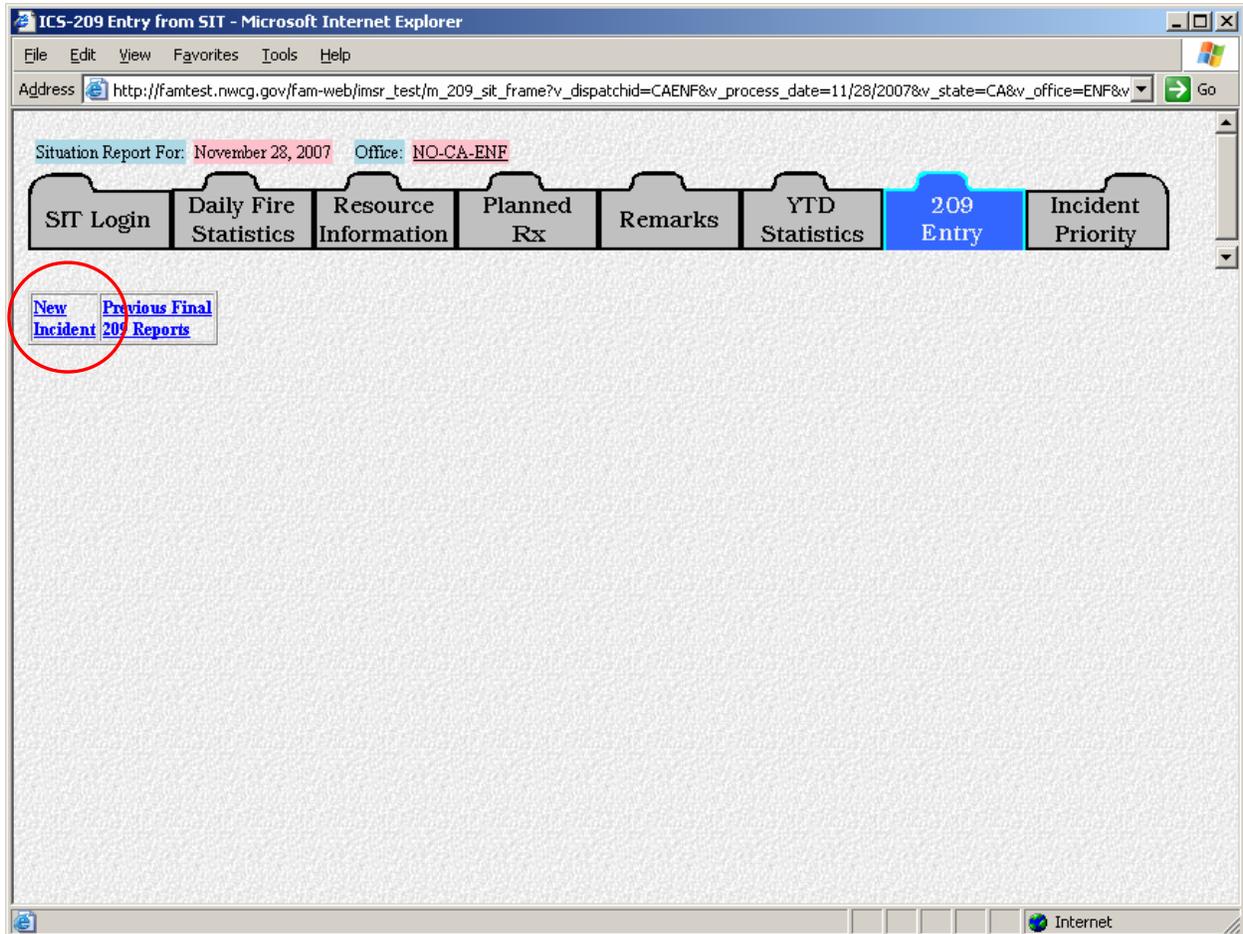

- Screen view **with** active ICS-209 incidents.

“NEW” INCIDENT

Click the “**New Incident**” button to create an ICS-209 for a new incident. To begin entering data, go to page 45 “**ICS-209 Data Entry Instructions – by Block**”.

“EDITING” an ICS-209

For the user's convenience, you can edit any of the 5 data entry screens.

- To edit **screen #1**, click the **incident number link**; **Example**: “WY-YNP-000500” for the Bear Gulch wildfire, as shown below.

An ICS-209 that has been entered and submitted can be edited again **if the time (Block 2) and date (Block 1) are not changed**. Changing the information in these blocks will create an additional ICS-209 rather than an edited version of the current ICS-209.

- To edit **screen #2**, click the “**2**” link to edit information for **Blocks 15 thru 33**.
- To edit **screen #3**, click the “**3**” link to edit information for **Blocks 34 thru 42**.
- To edit **screen #4**, click the “**4**” link to edit information for **Blocks 43 or 44**.
- To edit **screen #5**, click the “**5**” link to edit information for **Blocks 45 thru 47**.

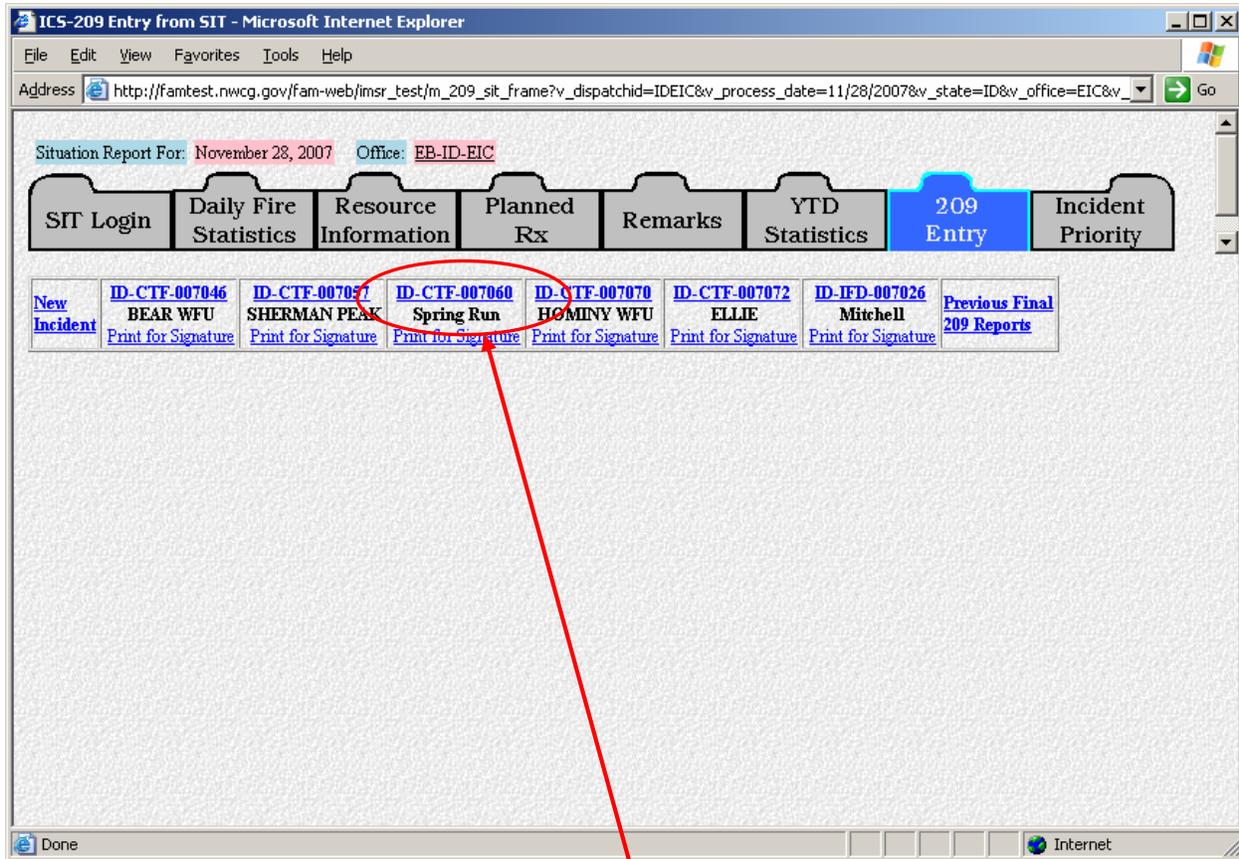

Situation Report For: November 28, 2007 Office: NR-MT-BZC

SIT Login	Daily Fire Statistics	Resource Information	Planned Rx	Remarks	YTD Statistics	209 Entry	Incident Priority
-----------	-----------------------	----------------------	------------	---------	----------------	-----------	-------------------

New Incident	MT-GNF-000078 WH COMPLEX Print for Signature	WY-YNP-000003 OWL Print for Signature	WY-YNP-000500 BEAR GULCH Print for Signature 2 3 4 5	WY-YNP-0712 BEAVERDAM Print for Signature	WY-YNP-0714 Columbine 1 Print for Signature	WY-YNP-0715 Promontory Complex (3 fires) Print for Signature	Previous Final 209 Reports
--------------	--	---	---	---	---	--	--

“UPDATING” an ICS-209

Links to previously entered ICS-209s are arranged in the middle of the screen between the “New Incident” and “Previous Final 209 Reports” links as shown below.

Clicking the desired incident number link (circled above) will bring up the latest ICS-209 submitted. From this point, the ICS-209 can be updated or finalized.

An ICS-209 that has been entered and submitted can be updated **by changing the time (Block 2) and/or date (Block 1)** and selecting “Update” in Block 3. Other blocks can be updated according to “**ICS-209 Data Entry Instructions – by Block**” (page 45).

- **NOTE FOR CALIFORNIA USERS ONLY:** An updated ICS-209 can be submitted as often as required each day within California. Each changed time that is entered in Block 2 will generate an additional ICS-209. **No fields will be cleared as they would if you were entering an update on a different date. Please update fields or delete existing data when it is no longer relevant.**

“FINALIZING” an ICS-209

A final ICS-209 can be created **only** when “**Final**” in Block 3 is selected. The time (Block 2) and date (Block 1) as well as the containment information (Block 17) and/or control information (Block 20) should be updated accordingly.

“**Final**” ICS-209s will be submitted according to each GACC’s reporting procedures (see your GACC mobilization guide for current year procedures):

- **Alaska** - until incident is 100% **contained** or when the incident no longer has significant effect on resource availability
- **California** – when less than 15 single resources remain assigned to an incident or when the incident no longer has any significant effect on agency resource availability
- **Eastern** - until incident is 100% **contained** or when the incident no longer has significant effect on resource availability
- **Great Basin** – 100% **contained**
- **Northern Rockies** – 100% **contained** (wildfire incidents) or **declared out** (WFO incidents)
- **Northwest** – 100% **controlled**
- **Rocky Mountain** – 100% **contained**
- **Southern** – 100% **controlled**
- **Southwest** – until declared **controlled** or **out**

Incidents that are marked “Final” in Block 3 can be accessed on the day they were marked “Final” either by clicking the incident link or by clicking the “Previous Final 209 Reports” link.

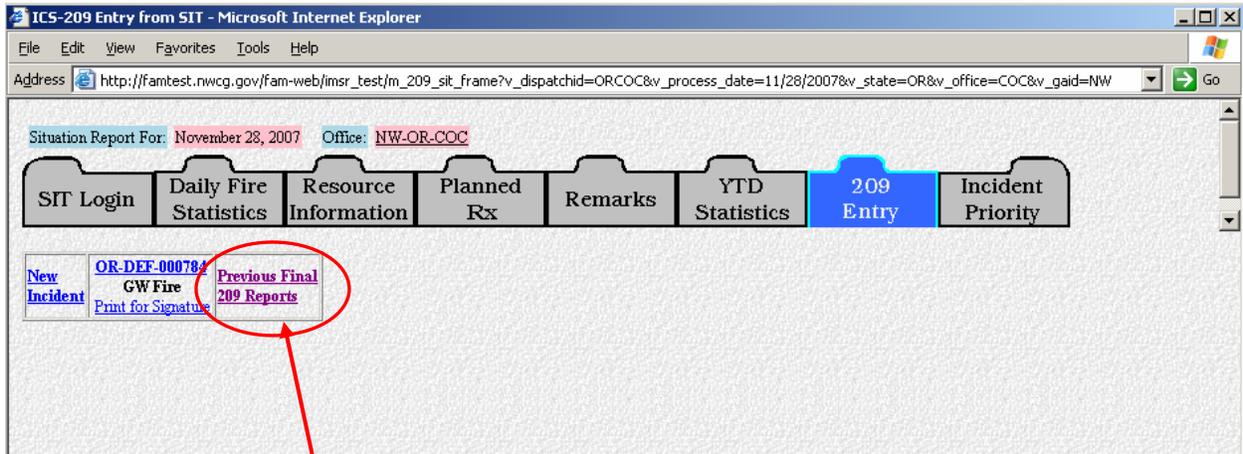

Situation Report For: November 28, 2007 Office: NR-MT-BZC

SIT Login	Daily Fire Statistics	Resource Information	Planned Rx	Remarks	YTD Statistics	209 Entry	Incident Priority
New Incident	MT-GNF-000078 WH COMPLEX Print for Signature	WY-YNP-000003 OWL Print for Signature	WY-YNP-000500 BEAR GULCH Print for Signature 2 3 4 5	WY-YNP-0712 BEAVERDAM Print for Signature	WY-YNP-0714 Columbine 1 Print for Signature	WY-YNP-0715 Promontory Complex (3 fires) Print for Signature	Previous Final 209 Reports

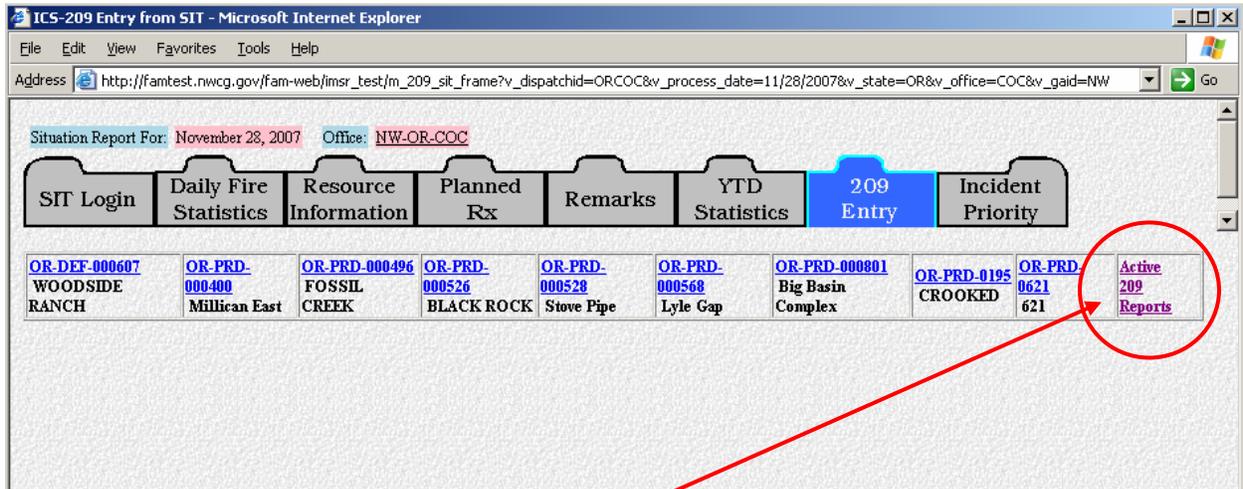

PREVIOUS FINAL ICS-209 REPORTS

The “**Previous Final 209 Reports**” link will allow you to edit any ICS-209s that have been marked as “Final” in Block 3.

ICS-209s can be edited and changed back to “Updates” if necessary, provided that the time (Block 2) and date (Block 1) are not changed.

Clicking the “**Previous Final 209 Reports**” link will take you to the screen shown below.

Selecting the “**Active 209 Reports**” link will return you to the “209 Entry” screen.

ICS-209 DATA ENTRY INSTRUCTIONS - by Block

SCREEN #1: ICS-209 Blocks 1 - 14 (Current Date, Initial/Update/Final information)

- **Note:** Blocks 1, 2, 4, 6, 11, 13 and 14 must be completed in order for any 209 report to be accepted by the program. These blocks are identified with “ * ” by the title.

Block 1. Date *

The date automatically populates in Central Time. If there is a need to change the date to match the time zone you are in, enter the date using the preferred format of mm/dd/yyyy (e.g., 08/07/2008).

Enter the current submission date for the report, not the start date of the incident.

Block 2. Time *

Enter the time that the report was created, which may differ from submission time. This should be entered in military time (e.g., 1725). Do not add “hrs” as this block will **only accept numeric characters**. This block will be cleared out each day.

Block 3. Initial/Update/Final

Select "Initial", "Update" or "Final" for the current ICS-209 you are entering.

This block defaults to "Initial" for a new entry, and "Update" for any update. **All** ICS-209s except for the "Initial" and "Final" should be marked "Update".

- "Initial" - the first 209 created for the incident
- "Update" – subsequent reports for an existing incident
- "Final" – the last 209 for an incident

Marking a 209 "Final" removes it from the active incident list the next day. An incident that has been marked as "Final" can be found in the "Previous Final 209 Reports".

Block 4. Incident Number *

Enter the incident number that has been assigned by the jurisdictional agency. **Never use the same incident number for two different incidents in the same calendar year.**

The incident number should start with the 2-letter state identifier, followed by the 3- or 4-letter unit or agency identifier and the incident number. This is usually the incident project order number in Block 3 of the Resource Order (e.g., AZ-ASD-000006, ID-BOF-044681, UT-MLF1-035, WY-YNP-000500, or CO-CRD-R236).

Unit identifiers **MUST** already exist in the SIT Program in order for the ICS-209 to be accepted to the database.

Incident numbers can be changed by those users with GACC access. If an incident number needs to be changed, contact the GACC Intelligence Coordinator/Officer and request the change. Instructions for editing the incident number are located in "Edit Incident Number" (page 77).

Block 5. Incident Name

Enter the incident name that has been assigned by the jurisdictional agency. Once a name has been assigned to the incident, it should not be changed if at all possible. However, if a name change does occur, be sure to make a note of it in "Remarks" (Block 42).

If the ICS-209 is for a "Complex", put the name of the complex in this block and list the individual fires and acreages in "Remarks" (Block 42). Instructions for "Creating a Complex" are on page 78.

Block 6. Incident Kind / Strategy *

Select the incident kind from the drop-down menu:

- Wildland Fire
- Wildland Fire Used for Resource Benefit
- Prescribed Fire
- Burned Area Emergency Rehabilitation
- Earthquake

- Flood
- Hazardous Materials
- Hurricane
- Law Enforcement
- Mass Casualty
- Oil Spill
- Other (explain in Block 42, "Remarks")
- Search and Rescue
- Structure Fire
- Tornado
- Urban Search and Rescue

Strategy * (Wildland Fires ONLY)

Select from the drop-down menu the management strategy that best represents the situation for the operational reporting period:

- Full Suppression – Perimeter Control
- Point/Zone Protection – Limited Perimeter Control
- Confine/Contain – Monitor

Additional clarification can be made in the "Remarks" block (Block 42).

Block 7. Start Date

Enter the date in mm/dd/yyyy format and the time (military time - 1630) that the incident began in the respective data entry blocks.

Block 8. Cause

Select the appropriate choice from the drop-down menu.

For fire incidents enter the general cause (e.g., Human, Lightning, or Under Investigation).

For other incident kinds enter non-applicable (N/A).

Block 9. Incident Commander

For incidents managed by a single Incident Commander, enter both the first and last name. If the incident is under unified command, list all Incident Commanders by last name separated by a forward slash (e.g., Stam/Vail).

Block 10. Incident Management Organization

This block defaults to a blank. Select the appropriate type of Incident Management Organization assigned from the drop-down menu, if applicable. Organizations include:

- Type 1 Team
- Type 2 Team
- Type 3 Team
- FUMT
- Type 3 IC

- Type 4 IC
- Type 5 IC
- FUM1
- FUM2
- Area Command
- Unified Command

This block should be left blank unless a recognized Incident Management Organization is assigned.

Block 11. State-Unit *

This block will default with the State and Unit that is entered in "Incident Number" (Block 4). This block is utilized to identify the unit that has protection responsibility. Therefore, this block can be edited with a different State and Unit identifier if needed.

Unit identifiers **MUST** already exist in the SIT Program in order to be used when filling out the ICS-209.

Block 12. County

Enter the county in which the incident originated. If other counties are involved, enter them in "Remarks" (Block 42).

Block 13. Latitude and Longitude *

Enter the latitude and longitude in degrees, minutes and seconds derived from the point of origin of the incident. If possible, when using GPS to determine the latitude and longitude, set the receiver datum to NAD83. This data is utilized to generate maps and reports from the local level up to the national level.

Ownership at Origin

This block will default with the State and Unit that is entered in "Incident Number" (Block 4). This block is utilized to identify the ownership of the land the fire originated on. Therefore, this block can be edited with a different State and Unit identifier if needed (e.g., MT-MDCI for private lands within the Missoula Dispatch Zone; MT-LNF for Lolo National Forest, etc.).

Block 14. Short Location Description * (in reference to nearest town)

Give a general location, compass direction and number of miles, in reference to the nearest town (e.g., 20 miles SE of Mammoth, WY). A legal location may also be included, such as Township, Range, Section, and Meridian (e.g., T55N, R112W, Sec. 3 SP).

This information is important for readers unfamiliar with the area to be able to quickly identify the general location of the incident on a state map.

Submit - Screen #1

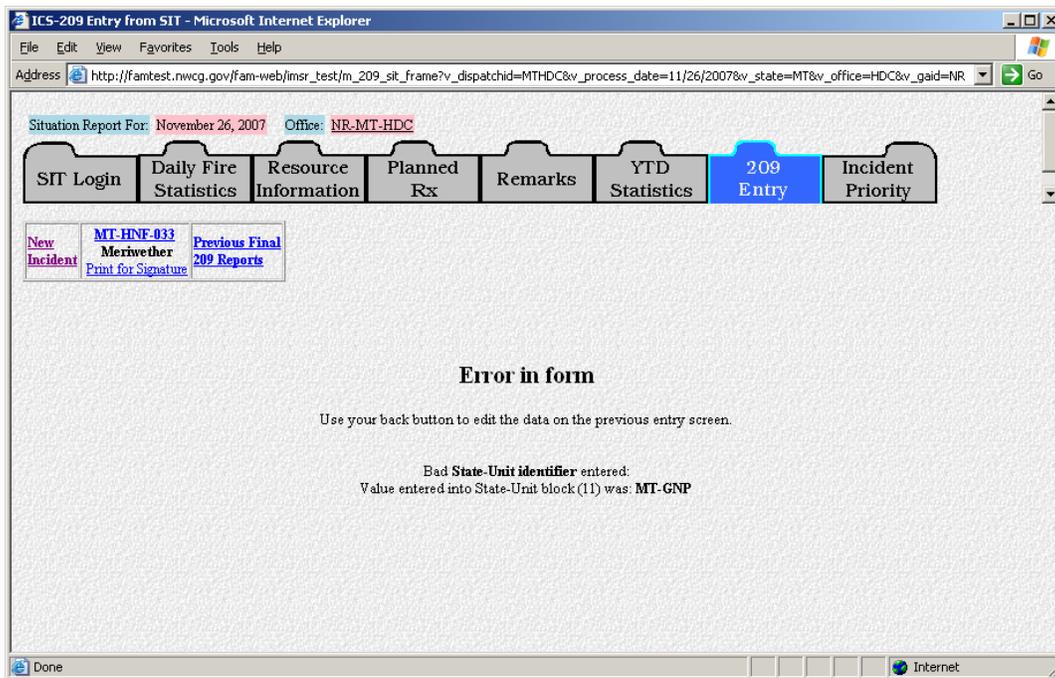

Click on the "Submit Data" button. If all information was entered correctly, the second data entry screen will appear.

If data was not entered in a required block, the following alert message will appear:

Click the “OK” button to return to the data entry screen. Enter any missing or invalid data then click the “Submit Data” button.

The error message, shown below, will display if you entered bad data (such as a unit identifier not identified in the database).

Use the “Back” button to return to the previous screen. Fix any erroneous data identified then click the “Submit Data” button.

SCREEN #2: ICS-209 Blocks 15-33 (Size, Structure and Threat information)

As shown on the next page, the top line of data entry screen illustrates the user entered type of incident, Incident Number, Incident Name, Current Report Date / Time, and active screen you are entering data. The second line identifies the data entry screen.

Block 15. Size/Area Involved

For fire incidents, enter the acreage. If more than one land ownership is involved, click on “Enter Size/Area by Unit” link (shown below) and enter the units and acreage for each involved. This information will carry over to Block 42, “Remarks” of the printable 209 form.

For incidents that are Complexes, enter the total acreage in this block, and break out each fire with acreage in Block 42, “Remarks”.

For other incidents kinds, enter the appropriate descriptive size (square miles, hectares, square kilometers). Information on descriptive size can also be entered in Block 42, “Remarks”.

If a precise figure is not available, use an estimate and note in Block 42.

Block 16. % Contained or MMA

For wildfire incidents enter the percent of the incident that is contained. For wildland fire use incidents at Stage 3 enter the Maximum Manageable Area (MMA) as an acreage value. This is a number entry block only; do not enter symbols or alpha characters. This block will be cleared out each day.

For non-fire incidents, leave blank unless appropriate.

Block 17. Expected Containment

For fire incidents, enter the date in mm/dd/yyyy format, (e.g., 09/27/2007) at which full containment is expected.

WFIP Stage (For Wildland Fire Use incidents only)

Select the WFIP stage from the drop-down box (e.g., Stage I, Stage II, Stage III).

Block 18. Line to Build

For wildland fire incidents, enter the number of chains, feet, meters, or miles of line still to be completed. The drop-down box defaults to chains, so if using miles, meters, or feet please specify. This block will be cleared out each day.

For other incident kinds, such as hazardous materials or flood incidents, other measurements, such as square miles may be appropriate and should be noted in Block 42, "Remarks".

Risk Assessment (For Wildland Fire Use incidents only)

Select the Risk Assessment from the drop-down box (e.g., Low, Medium, High, Extreme).

Block 19. Estimated Costs to Date

Enter the total incident costs to date in a whole dollar amount (e.g., 250000). This is a number character block only; if symbols or alpha characters are entered the program will automatically clear them out of the entry screen, but will add them to completed 209 and subsequent reports. This block will be cleared out each day.

If costs decrease, explain in Block 42, "Remarks", as to why the decrease occurred.

Block 20. Declared Controlled

Enter the date in mm/dd/yyyy format and military time at which the incident was declared controlled (e.g., 02/17/2008, 1500). This field is for current information and is not to be used as an outlook of when the incident is expected to be controlled.

Once this block had been filled, the report is considered to be final. Remember to check the "Final" button in Block 3.

Out Date / Time (For Wildland Fire Use incidents only)

Enter the date in mm/dd/yyyy format and military time at which the incident was declared out.

Block 21. Injuries This Reporting Period

Enter the number of serious injuries for this reporting period. Serious injuries are those in which the person injured is unable to continue to perform in their incident assignment. Explain or describe the nature of any reported injuries in Block 42, "Remarks". This block will be cleared each day.

Block 22. Injuries to Date

Enter the total number of serious injuries for the duration of the incident. This is a cumulative total number that must be manually entered; the program does not do it automatically.

Block 23. Fatalities

Enter the cumulative total of fatalities for the duration of the incident. Fatalities are to only include resources assigned to the incident. Verify and clear any fatality information with the Incident Commander or Agency Administrator prior to submission.

Block 24. Structure Information

Structure information is accounted for according to structure type. Types are defined as follows:

- **Residence:** a place where one lives: a house, apartment, or other shelter used as the residence of a person, family or household. This includes primary and secondary residences. Duplexes and apartments are to be considered as multiple residences.
- **Commercial Property:** real estate zoned for business or industrial use. This includes income-producing property, such as office buildings, restaurants, shopping centers, hotels, industrial parks, warehouses, and factories.
- **Outbuilding/Other:** a constructed building not designed for continuous human occupancy, such as barns, equipment sheds, outhouses, etc. Other structures or outbuildings do not include power poles, fences, pipelines, bridges, etc.

These are number-only entry boxes.

- **# Threatened:** Enter the number of structures threatened by type for the current reporting period. A structure is threatened if it is at risk of loss or damage, or endangered during the operational reporting period. This typically includes structures subject to mandatory evacuation. This block will be cleared out each day.
- **# Damaged:** Enter the number of structures damaged by type for the duration of the incident. A structure is damaged if its' usefulness or value is impaired. This block will be carried over each day.
- **# Destroyed:** Enter number of structures destroyed for the duration of the incident. A structure destroyed is equivalent to a structure declared lost. This block will be carried over each day.

Describe potential structure threats in Block 27, "Values at Risk".

If needed, detail additional structure information about structure type breakdowns in Block 42, "Remarks".

The program will automatically tally the number of damaged and destroyed structures. If the number of structures damaged or destroyed goes down from one day to the next, the program will prompt with a message requiring the user to verify the drop in number.

Block 25. Threat to Human Life/Safety

Check any or all boxes that are relevant for the reporting period for each of these situations:

- Evacuation(s) in progress
- No evacuations(s) imminent
- Potential future threat
- No likely threat

Due to the sensitivity of the information be accurate in your assessment. Provide a detailed explanation of these events in Blocks 26, 27, 29, or 42 as they apply.

Block 26. Projected Incident Movement/Spread

Provide an estimate of the direction in which the incident is expected to spread, migrate, or expand in 12-, 24-, 48-, and 72- hour timeframes. Include an estimate of the acreage or area that will be affected. Emphasize the predicted movement of the fire, not the predicted fire behavior. Include the "why" (conditions affecting fire behavior such as low RH or high winds) and the "where" of the prediction (location, direction and amount of spread). The predicted movement of the fire should be consistent with the timeframes reported for values threatened in Block 27. Each data entry block has a maximum of 2000 characters. This block will be cleared each day.

Data entry examples for this block is shown below:

26. [Projected incident movement/spread](#) in 12, 24, 48, and 72 hour time frames:

12 hours	Increasing fire activity due to SW winds of 25-30 MPH with movement up the west flank towards Seeley Lake along the northeast corner of the perimeter	char count: <input type="text"/> (2000 max)
24 hours	Same as previous	char count: <input type="text"/> (2000 max)
48 hours	Fire will establish in the Deer Creek drainage on the east flank and move up drainage .5 mile towards Placid Creek. Growth of 200-300 acres expected along the north perimeter of the fire over the next 48 hours, and lower temperatures with decreased fire activity.	char count: <input type="text"/> (2000 max)
72 hours	Continued spread to west shore of Seeley Lake and north to south side of Inez Lake and south towards Vaughn Creek	char count: <input type="text"/> (2000 max)

Block 27. Values at Risk

Describe significant threats to communities, critical infrastructure, natural and cultural resources such as timber, wildlife, habitat, watershed, agricultural areas, endangered species, historical resources, or other valuable resources and describe their value or significance in terms of 12, 24, 48, and 72-hour time frames. For example, a ranch house, barns and other outbuildings, located in Division C have the probability of being burned over in about 12 hours, a community of 300 homes and businesses northeast of the fire could be impacted by the fire-front in 48 hours, and the fire will directly threaten a water storage area in 72 hours.

An example of a non-wildfire incident would be when flood waters are rising and a mobile home park will be inundated in 48 hours. Each data entry block has a maximum of 500 characters. These blocks will be cleared each day.

27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames:

12 Hours	West side residences along Seeley Lake. Timber, recreational areas, fish and wildlife habitat.	char count: 94 (500 max)
24 Hours	Town of Seeley Lake, MT. Commercial properties. Cell tower and historic lookout. Timber and recreational areas.	char count: 110 (500 max)
48 Hours	residences north including Lake Inez. Timber and cultural resources.	char count: 68 (500 max)
72 Hours		char count: (500 max)

Block 28. Critical Resource Needs

List the specific types, numbers of and for how many operational periods the critical resources are needed, in order of priority and in 12-, 24-, 48-, and 72- hour increments. For example, 12 hours: 1 Type 1 helicopter (3), 1 Type 2IA handcrew (3); 24 hours: 1 Type 1 helicopter (3), 1 Type 2IA handcrew (3); 48 hours: 5 Type 3 engines with STEN (2); 72 hours: 3 Type 2IA handcrews (4), Type 2 helicopter with bucket.

Additional documentation in Blocks 26, 29, 33, 38, 40 and 42 as they apply, can help support and justify the need for the critical resources. Each data entry block has a maximum of 250 characters. These blocks will be cleared each day.

The screen shown on the next page is an example of Block 28.

[28: Critical Resource Needs](#) (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames):

12 hours	1 Type I Helicopter (3), 1 Type 2IA Handcrew (3)	char count: 48 (250 max)
24 hours	1 Type I Helicopter (3), 1 Type 2IA Handcrew (3)	char count: 48 (250 max)
48 hours	5 Type III Engines with STEN (2),	char count: 34 (250 max)
72 hours	3 Type 2IA Handcrews (4), 1 Type II Helicopter with bucket (3)	char count: 62 (250 max)

Block 29. Major Problems and Concerns

Describe safety concerns and control problems such as heavy fuels, steep terrain, difficult access, adverse weather conditions, and extreme fire behavior anticipated in the next two to three operational periods. Include social/political/economic concerns or impacts. Relate critical resource needs to the planned actions if given the critical resource and how the resource is going to be utilized to mitigate the situation (e.g., T1 engines critical for structure protection). Specific resources that are threatened should be listed in Block 27. A maximum of 2000 characters is allowed. This block will be cleared out each day.

The screen shown below is an example of Block 29.

[29: Major problems and concerns](#) (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.

Need continuous suppression air support to provide lookout and to assist with the line construction and structure protection operations. Lack of line overhead to maintain safety of line resources. Large number of structures and area to protect. Expected hotter, drier, and windier weather pattern for the next few days. Steep mountainous terrain and extremely dry conditions and continued spotting of the fire up to 1 mile ahead of the front. Fire continues to threaten communities and structures in urban interface area.

char count: (2000 max)

The screen shown below is an example for Blocks 30 and 31.

<p>30: Observed Weather for Current Operational Period</p> <p>Peak Gusts (mph): 5-15</p> <p>Max Temperature: 80-90</p> <p>Wind Direction: W</p> <p>Min Relative Humidity: 12-22</p>	<p>31: Fuels/Materials Involved Primary Fire Behavior Fuel Model: Heavy Logging Slash</p> <p>Continuous dead and down lodgepole, was in thick spruce, but moved to the lodgepole. Model 8/9/10 (TIMBER) higher elevation slopes and 2 / 1 (Grass and Timber) lower slopes and valleys.</p> <p>char count: (250 max)</p>
---	---

Block 30. Current Weather Conditions

For fire incidents, enter the current readings for peak wind gusts, wind direction, maximum temperature, and minimum relative humidity. For non-fire incidents complete only if relevant. If additional weather conditions are a factor utilize Block 42, "Remarks" to describe specifics. This block will be cleared each day.

Block 31. Fuels/Materials Involved *

For wildland fire incidents, select the appropriate *primary fuel* carrier from the thirteen Fire Behavior Fuel Models in the pull-down menu, list shown below. This portion of the block is required.

The Primary Fire Behavior Fuel Models include:

- 1 Short grass (1 Foot)
- 2 Timber (grass and understory)
- 3 Tall Grass (2.5 Feet)
- 4 Chaparral (6 Feet)
- 5 Brush (2 Feet)
- 6 Dormant Brush, Hardwood Slash
- 7 Southern Rough
- 8 Closed Timber Litter
- 9 Hardwood Litter
- 10 Timber (litter and understory)
- 11 Light Logging Slash
- 12 Medium Logging Slash
- 13 Heavy Logging Slash

Additional information pertinent to fuels/materials involved can be described in the text block for any incident or event kind, including additional detail on the types of fuels involved (e.g., while the primary fuel on a wildfire may be light logging slash, a number of other fuel types may be involved such as grass and chaparral. A hazardous materials incident might involve 120 gallons of diesel fuel or propane). A maximum of 250 characters is allowed. This block will carry over each day.

Block 32. Today's Observed Fire Behavior

For fire incidents, describe the fire behavior observed for the current reporting period in general terms. Leave this block blank for other kinds of incidents. A maximum of 2000 characters is allowed. This block will be cleared out each day.

The screen shown below is an example of Block 32.

32: [Today's observed fire behavior](#) (leave blank for non-fire events):

Today: Increased west winds and scattered cumulus and Thunderstorms with associated downdrafts increased fire behavior on the NE corner pushing the fire into Archibald Creek and towards road 465. Observed behavior includes group torching and short range spotting.

char count: (2000 max)

Block 33. Significant Events Today

Describe significant events occurring during the current reporting period. Include road closures, evacuations, progress made, accomplishments, team transition, re-occupation of formerly evacuated areas including where this occurred in relation to the incident. Specify information such as road numbers and duration of closures, how many people or homes are impacted by evacuations. A maximum of 2000 characters is allowed. This block will be cleared out each day.

The screen shown below is an example of Block 33.

[33: Significant events today](#) (closures, evacuations, significant progress made, etc.):

Crews and Equipment continued to construct line to redirect away from Placid Lake structures. Air support was used to assist by cooling the edge and providing an extra Lookout. Structures along the west shore of Seeley Lake were being evaluated and prepped. Crews on the NE line disengaged and began indirect line prep along the road 2190. Heavy lift helicopters and 2-CL 215s were used to support fireline construction. 675 residences remain evacuated from areas west of Hwy 83, Placid Lake, and Double Arrow Sub-division. Town of Seeley lake is under a 12 hr pre-evacuation notice and a 12-24 hr pre-evacuation notice. Residences south of the Double Arrow to MT Hwy 200 and east to Cotton Creek are still under a 12-24 hr pre-evacuation notice. Traffic restrictions on Hwy 83, open

char count: (2000 max)

Submit - Screen #2

Upon completing Blocks 15 thru 33 and ensuring all information entered is correct, click the "Submit Data" button at the bottom of the second data entry screen. This will take you to the third data entry screen.

SCREEN #3: ICS-209 Blocks 34-42 (Actions Planned, Remarks, etc.)

Night Shift - Continue to patrol the structures, improve and hold line constructed in DIV A and Z, and if possible construct line in the Archibald Creek area. Day Shift - Continue aerial support of line operations. Continue to improve existing control lines and construct dozer lines along the SE (DIV B and X) and NE (DIV A) flanks. Scout and continue line construction (tying into existing roads) on the north flank (DIV Z). Continue to evaluate and prep indirect contingency line along road 2190. Prep structures on the west side of Seeley Lake and north Lake Placid. If opportunities allow conduct burnout

char count: (2000 max)

Trusted sites

Block 34. Forecasted Weather for next operational period

For fire incidents, enter the next operational period's forecast wind speed, wind direction, temperature, and relative humidity. Highlight significant forecasted weather events such as dry lightning, frontal passages, inversions, and gusty/erratic winds in Block 42, "Remarks". For non-fire incidents in which other weather conditions are a factor, use "Remarks" (Block 42) to describe the conditions. This block will be cleared each day.

Block 35. Estimated Control

For fire incidents, provide the date and time in mm/dd/yyyy and military time format at which control is expected.

For non-fire incidents, enter the date and time at which significant incident support will be discontinued.

Block 36. Projected Final Size

Enter an estimate of the total area that is expected to be involved or affected over the course of the incident. Use acres, hectares, square miles, etc., as appropriate. This is not a number entry only box, so character labels may be used.

Block 37. Estimated Final Cost

Enter an estimate of the total costs for the incident once all finance costs have been processed (e.g. 250000). This is a number only entry box, so do not enter symbols or alpha characters.

Block 38. Actions Planned for Next Operational Period

Provide a short summary of actions planned for the next operational period. For example, team transitions, line construction operations, structure protection, etc. Describe the actions and activities being carried out by the responders. A maximum of 2000 characters is allowed. This block will be cleared out each day.

Data entry examples of Blocks 39 thru 41 are shown below:

39: For fire incidents, describe resistance to control in terms of.	
1. Growth Potential -	High
2. Difficulty of Terrain -	Medium
40: Given the current constraints, when will the chosen management strategy succeed?	
If weather holds there is a moderate chance of success to meet the resource and structure protection objectives	
char count:	(500 max)
41: Projected Demobe Start Date:	1/1/2007 Time:

Block 39. For Fire Incidents, Describe Resistance to Control in terms of...

From each drop-down menu, select the fire's resistance to control in terms of growth potential and difficulty of terrain. Options are: Low, Medium, High, and Extreme. This block will be cleared out each day.

Block 40. Given the current constraints, when will the chosen management strategy succeed?

Give a short assessment of the likelihood of meeting the containment or control targets given the current resources and management strategy. Tie in information related to critical resource needs as expressed in Block 28. If containment is unlikely, explain why and reflect containment and control targets accordingly in Blocks 17 and 33. A maximum of 500 characters is allowed. This block will be cleared out each day.

Block 41. Projected demobilization start date

Enter the date and military time at which significant demobilization is expected to begin in mm/dd/yyyy and military time format.

Block 42. Remarks

This block is used to expand on information that has been entered in previous blocks, or to include other pertinent information not previously addressed.

For a Complex, list all fires included in the Complex. For example, "Fires in this complex include: Bear (290 ac.), Elk (1004 ac.), Icicle Creek (10 ac.)."

Other information to include in this block would be: Incident Command Team transitions or transfer of command back to the local unit; reasons for acreage or cost reductions; injuries that have occurred; or more detailed weather descriptions affecting the incident. This block will be cleared each day.

The screen shown below is an example of Block 42.

42: Remarks:

Two community meetings were held last evening (8/6; at Seeley Lake and Bonner) to inform residences and evacuees on fire conditions and to answer questions. Both sessions were well attended with over 200 people at each Three community meetings will be held this evening (Seeley Lake, Ovando, and Bonner) to inform residences and evacuees on fire conditions and to answer questions, National Weather Service in Missoula issued a Red Flag Warning for Dry thunderstorms with accompanying gusty winds 15-25 mph with possible gusts to 45 mph and low RH. MT Governor visited the fire area today.

char count: (2000 max)

Submit Data

Submit - Screen #3

Upon completing Blocks 34 thru 42 and ensuring all information entered is correct, click the "Submit Data" button at the bottom of the third screen. This will take you to the fourth data entry screen.

SCREEN #4: Committed Resources**Block 43. Committed Resources**

This section of the 209 is used to summarize agency ownership of resources committed to the incident. An example of the standard "Committed Resources" data entry screen is shown below.

- **Note:** There are various data entry screens for "Committed Resources" depending on which "Incident Kind" you selected in Block 6.

Wildland Fire, Wildland Fire Used for Resource Benefit, Prescribed Fire, Burned Area Emergency Rehabilitation, Flood, Hurricane, Law Enforcement, Oil Spill, Other and Tornado incidents will use the standard "Committed Resources" data entry screen, shown on the next page.

- Should not include OES
- List individual state agencies in "Cooperating Agencies" (Block 44).
- **USFS** United States Forest Service
- **WXW** National Weather Service

WF Number: MT-FHA-000145 Name: GRIZZLY GULCH Report Date: 08/07/2007 Time: 1725 Last 209 Date: 08/07/2007 Time: 1725 Screen: 4

<input type="checkbox"/> WXW													1		1	
Total	5		4		2	1	1	26		9		10	148	1	424	

Enter values for each type of resource belonging to that agency. CWN and AD resources should be listed under the agency that hired them. Committed resource types are as follows:

- **CRW1** Type 1 Crews
- **CRW2** Type 2 Crews
- **HEL1** Type 1 Helicopters
- **HEL2** Type 2 Helicopters
- **HEL3** Type 3 Helicopters
- **ENGS** All Engine Types
- **DOZR** Bulldozers
- **WTDR** Water Tenders
- **OVHD** Overhead Personnel
- **Camp Crews**

The "Total Personnel" column should include the total number of people committed to the incident by agency. This number includes all personnel on crews, engines, helicopters (module and pilots), etc. listed for each agency.

The program will not calculate the number of personnel assigned to each resource. Enter the total personnel count manually for each agency in the "Total Personnel" block.

WF Number: MT-FHA-000145 Name: GRIZZLY GULCH Report Date: 08/07/2007 Time: 1725 Last 209 Date: 08/07/2007 Time: 1725 Screen: 4

Do not confuse single resource (SR) with strike teams (ST) in each resource type column. Calculate the correct number of personnel for each strike team.

- **Note:** If the "Total Personnel" sum does not seem to be adding the entered personnel totals correctly, **check to make sure the Java Script on your browser is turned on.**
 - Turning on Java Script in Internet Explorer:
 - Open Internet Explorer
 - Select **Tools** located on the toolbar
 - Select **Internet Options**
 - Click on the **Security** tab
 - Select the **Custom Level** button under "Security level for this zone"
 - Scroll down to "Microsoft VM"
 - Check to make sure **High Safety** radio button has been selected for "Java Permissions"
 - Scroll to "Scripting"
 - "Active Scripting" - click the **Enable** radio button
 - "Allow paste operations via Script" – click **Enable**
 - "Scripting of Java applets" – click **Enable**
 - Click on **OK**
 - Click on **OK**

- Turning on Java Script in Netscape:
 - Open Netscape
 - Select **Edit**
 - Select **Preferences**
 - A window pops up, in the left hand column click on **“Advanced”**
 - In the right hand column make sure the **“Enable Java Script”** box is checked.

To delete a line in the resource screen, check the box under the red “X”.

WF Number: MT-FHA-000145 Name: GRIZZLY GULCH Report Date: 08/07/2007 Time: 1725 Last 209 Date: 08/07/2007 Time: 1725 Screen: 4

Block 44. Cooperating and Assisting Agencies

This block is used to identify specific assisting or cooperating agencies providing support to the incident. These may include the Red Cross, Salvation Army, County Sheriff, Homeland Security, etc. Do not repeat individual agencies already listed in the "Committed Resources" section. A maximum of 500 characters is allowed.

[44: Cooperating and Assisting Agencies](#) Not Listed Above:

Lolo NF, Montana DNRC with local engines, Missoula County Sheriff's office, BIA
 Tribal Game Wardens, Seeley Lake Fire Department, Missoula Rural Fire provided
 a strike team, Missoula County, Missoula County Sheriff, MT National Guard with

char count: (500 max)

Submit - Screen #4

Upon completing Blocks 43 and 44 and ensuring all information entered is correct, click the "Submit Data" button at the bottom of the fourth screen. This will take you to the fifth and final data entry screen.

ICS-209 blocks 45-47 -- Approval Screen

45: Prepared by: M. Durkee, SITL 46: Approved by: G. McNitt (IC) 47: Sent to: Missoula Dispatch Center by: MGD

Date: 08/07/2007 Time: 1749

Trusted sites

Block 45. Prepared By

On large incidents with Incident Management Teams this would normally be the Situation Unit Leader or Planning Section Chief. For other incidents it may be the dispatcher in the local dispatch or communications center, or another staff person or manager. This block will be cleared out each day.

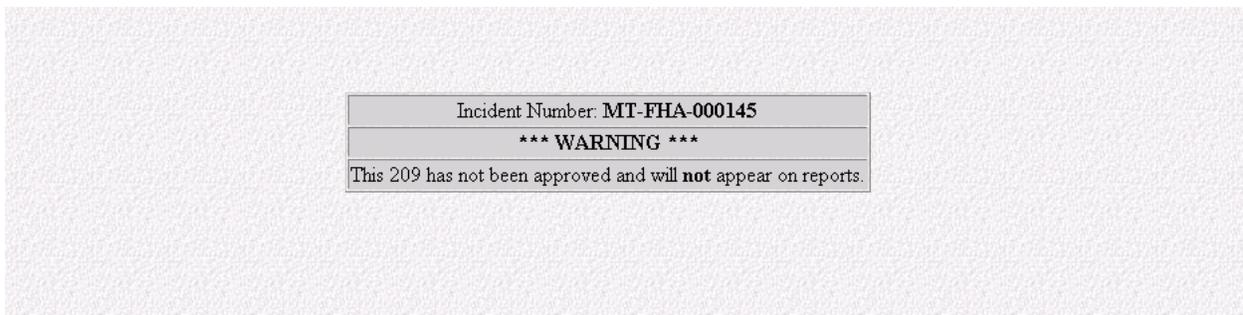

The title of the person can also be entered in addition to their name (*"Jane Smith, SITL"*).

Block 46. Approved By

On large incidents with Incident Management Teams, this would normally be the Planning Section Chief or Incident Commander. For other incidents, it could be the local Dispatch Center Manager, Fire Management Officer, or Agency Administrator.

The title of the person signing the 209 may also be entered (*"Don Jones, ICT2"*).

- **NOTE TO CALIFORNIA USERS:** This block will only be cleared when the date changes.
- **ATTENTION:** The ICS-209 cannot be viewed from the Reports function of the program until this block is filled in. Utilize the "Print for Signature" link to print a draft of the 209 for review and approval by the Incident Commander or Agency Administrator before final submission to the database. A warning message similar to the screen below will appear if the screen is submitted without completing Block 46.

See "Processing Official ICS-209s" instructions for additional information (page 76).

Block 47. Sent Information

Enter the appropriate dispatch center, Geographic Coordination Center, or Emergency Operations Center, along with who is sending it, and the date and time it is being sent. This block will be cleared out each day.

Submit - Screen #5

Upon completing Blocks 45 thru 47 and ensuring all information entered is correct, click the "Submit Data" button to save the report to the ICS-209 database. A message will pop up, like the one shown below, notifying you that the 209 will appear in the reports.

Situation Report For: August 07, 2007 Office: NR-MT-MDC

------------------------------	---	---	---	---	---	--

Incident Number: **MT-FHA-000145**

This 209 has been approved by **G. McNitt (IC)** and will appear on reports.

Incident information is submitted immediately to the main ICS-209 database. Once the record has been accepted to the database, the ICS-209 can be viewed and printed by clicking the "Print for Signature" link located below the Incident name on the incident data entry screen.

The ICS-209 will look similar to the image below:

Additionally, the ICS-209 can be viewed immediately by retrieving the record through the "Reports" function of the program. Reference the "Current ICS-209s" instructions (page 96) in Section V. Reports to find out how to retrieve a completed ICS-209.

- **Note:** The ICS-209 cannot be viewed from the "Reports" function of the program until Block 46 has been completed. See the instructions for Block 46 or the "Processing Official ICS-209s" instructions (page 76) for additional information.

PROCESSING OFFICIAL ICS-209s

This section provides general information about how to use the program to process official ICS-209s using this database. Detailed information on data entry in this program is provided in “209 Entry” section (page 33) of this user’s guide.

The web-based program will allow for official ICS-209s to be produced for incident documentation packages.

- **Note:** The database itself is not the official incident record.

To produce official incident ICS-209s for Incident Commander approval:

- Return to the 209 Entry screen.
- Click the desired ICS-209 Incident Number link.
- Edit the ICS-209 for the incident by clicking the incident number link or any of the other 4 data entry screens.
- Complete and submit all of the required screens of data to the database **without** filling in the “Approved By” data (Block 46) on Screen #5. If this box is left completely blank, the ICS-209 **will not** be available for anyone else to view in the program.
- Return to the incident entry screen.
- Request the ICS-209 for the incident by clicking the “Print for Signature” link for the desired incident number.
- When the ICS-209 appears, print a copy. This copy can be submitted to the Incident Commander for review and signature.
- When the printed ICS-209 has been signed, it will serve as the official copy for the incident documentation package.
- Once the Incident Commander has signed the official copy, do not change anything on the data entry screens.

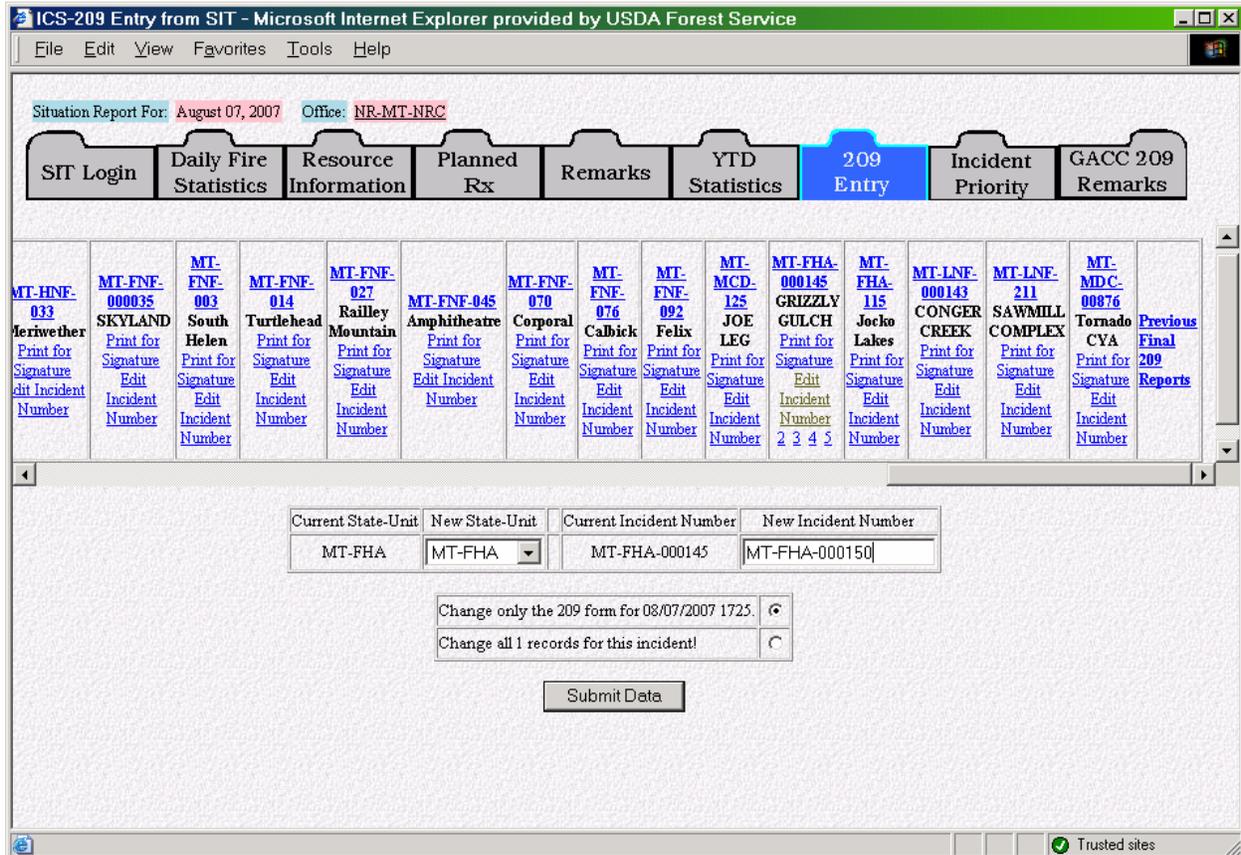

Submission of official Incident Commander approved data to the database:

- Click the “#5” data entry link of the desired incident.
- Complete the “**Approved By**” data (Block 46).
- Click the “**Submit**” button. This will submit the approval information in Block 46 to the database. Once this has been done, other users of the program will be able to view the ICS-209.

EDIT INCIDENT NUMBER

Only users with GACC access can change incident numbers. Call your respective GACC Intelligence Coordinator/Officer to request an incident number change.

Click the **“Edit Incident Number”** link for the incident needing to be changed. Grizzly Gulch, MT-FHA-000145 is the example incident shown below.

New Unit Identifier

Choose the correct unit identifier from the pull-down menu. Only the unit identifiers for the Dispatch Office you are using are available in the pull-down menu.

New Incident Number

Enter the “New Incident Number” in the space provided. Be sure to enter the incident number in capital letters and hyphens between the state, unit and number.

Amend ICS-209s

Selecting **“Change only the 209 form for the current date”** will change only the current ICS-209. Selecting **“Change all records for this incident”** will change all existing ICS-209s and any subsequent reports.

If the current ICS-209 is selected to be changed, then the previous ICS-209 that existed before the incident number was changed will automatically be marked as “Final” in Block 3 and will be treated as such in the database. Click the **“Submit Data”** button once all corrections have been made.

CREATING A “COMPLEX”

A complex can be created one of three ways. The GACC should be contacted when any complex is created.

The first way to create a complex is to **change the incident name**, not the incident number (e.g., change “Big Bar” to “Big Bar Complex”). This approach will keep the same incident number and thus the entire incident history will be under the same incident number. Individual or additional fires in the complex and the previous fire name can be listed in “**Remarks**” (Block 42).

The second way to create a complex is to **edit the incident number**. Choose the “Edit Incident Number” link on the existing incident link (GACC access only) to create a new incident number for the complex. This will keep certain information from the original incident number in the ICS-209 (e.g., latitude and longitude, etc.). However, the incident number will be different than the one on the original incident (See “Edit Incident Number, page 77). Individual fires in the complex are to be listed in “**Remarks**” (Block 42).

Lastly, you can create a **new incident** with a new incident number and incident name for the new complex. Follow the instructions for “New Incident” explained earlier in this section (page 40). The individual incident numbers and incident names of the fires comprising of the complex as well as the date on which the complex was created should be listed in “**Remarks**” (Block 42). The ICS-209 for each incident that became part of the complex should be marked “Final”. The “**Remarks**” block of each incident should indicate that the particular fire was moved to a complex.

INCIDENT PRIORITY

Prioritize the incident in relation to the other incidents within your area of responsibility.

- Priorities will be assigned at the local, Geographic Area, and National levels.

Dispatch Priority

Enter the priority number in the “**Dispatch Priority**” block provided. The screen below is an example of incident priority categorized at the “local” level.

Situation Report For: **October 24, 2007** Office: **SO-CA-BDF**

Incident Number	Name	Type	Date/Time	Dispatch Priority	Active
CA-BDF					
CA-BDF-10566	GRASS VALLEY	WF	10/24/2007 1800	1	Yes
CA-BDF-10570	SLIDE	WF	10/24/2007 1830	2	Yes

Active

Select either “Yes” or “No” from the pull-down menu. The system will automatically default to “Yes”, which will maintain the record in active status and carry the information forward to the next day. Picking “No” will result in the record being made inactive, thus the record will not show up on that days’ SIT report. Inactive incidents can be made active again by entering a current ICS-209 for the incident or selecting “Yes” under the “Active” block on the “Incident Priority” screen.

Click the “**Submit Data**” button.

The screen below illustrates "Incident Priority" data entry at the GACC level. GACCs will prioritize the incidents according to Geographic and National priority criteria regardless of agency.

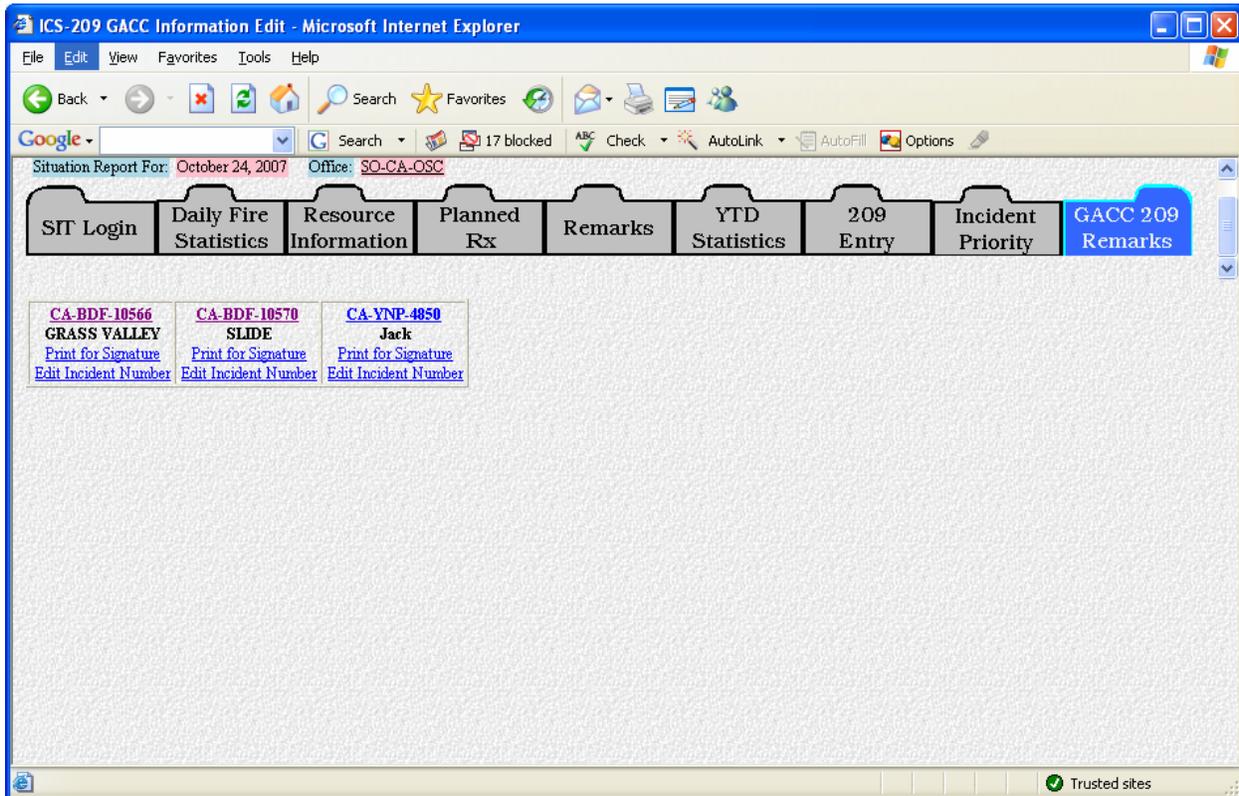

Situation Report For: **October 24, 2007** Office: **SO-CA-OSC**

Incident		Type	Date/Time	Dispatch Priority	GACC Priority	Active
CA-ANF						
CA-ANF-4306	RANCH	WF	10/24/2007 1800	3	5	No

CA-LAC-07233077	Magic	WF	10/24/2007 1800	6	6	No
CA-MVU						
			10/24/2007			

GACC 209 REMARKS

The final SIT Program data entry tab titled “**GACC 209 Remarks**” allows GACCs to edit, add or delete information from specific blocks of active ICS-209s.

- Changes made will **only** show up on the SIT reports for that reporting period. The changes will **not** change the ICS-209 record in the 209 database.

Click the incident link for which you would like to add remarks (e.g., **CA-BDF-10566, Grass Valley**, shown above).

Once an individual incident has been selected GACCs can make changes, add or delete information to any or all of the following ICS-209 data:

- Observed Fire Behavior
 - Significant Events
 - Actions Planned
 - Remarks
- **Note:** If you delete out the information that has been brought in from the ICS-209 in each of these blocks, make sure you hit your space bar once. This will assure that the info will be gone when you run reports.

The data entry screen will look like the example below.

Situation Report For: **October 24, 2007** Office: **SO-CA-OSC**

SIT Login **Daily Fire Statistics** **Resource Information** **Planned Rx** **Remarks** **YTD Statistics** **209 Entry** **Incident Priority** **GACC 209 Remarks**

[Edit Incident Number](#)

WF Number: **CA-BDF-10566** Name: **GRASS VALLEY** Current Incident Date: **10/24/2007** Hour: **1800**

GACC Priority: Local Priority:

Observed Fire Behavior

Fire behavior has lessened during this operational period due to a decrease in winds combined with increased relative humidity and effective perimeter control. Observed fire behavior today has been limited to creeping and backing fire with short uphill runs.

Click here to get a count of the characters in Observed Fire Behavior: (2000 max)

Click the **“Submit Data”** button when finished.

If there are no “active incidents” in the GACC for that reporting period, a message stating **“No active incidents for this GACC”** will be illustrated on the screen.

REPORTS

There are a variety of SIT and ICS-209 reports that can be accessed for each level of the dispatch/coordination system.

The reports can be saved to local servers or hard drives as **Web Page, HTML only (*.htm, *.html)** documents. Additionally, for editing purposes and creating specialty reports, the HTML documents can be pasted into .doc or .rtf documents.

SIT REPORTS

Reports can be selected for any of the following topics:

- Geographic Area Reports
- Dispatch Office Reports
- Special Area Reports
- National IMSR
- National Weekly Fire Activity
- National PAO Reports

Reports are accessible from the SIT Welcome screen. Click the **“Reports”** button, as shown below.

This will take you to the “Wildland Incident Situation Reports” menu screen.

Geographic Area Reports

There are eight “Geographic Area Reports” generated by the SIT Program. Before picking any of the specific report buttons, make certain that the date entered in the “**Report date**” block is correct. Select the preferred GACC from the “**Geographic Area**” pull-down menu. Click on the appropriate button to get the desired report.

Near the bottom of each report is a link titled “**Return to the Report List Menu**”. This link will take you back to the “Wildland Incident Situation Reports” menu. Clicking the “Back” button on your browser will also take you to the “Wildland Incident Situation Reports” menu.

Regardless of the date selected, the current date and time, in Central Time, is published at the very bottom of each report.

Detailed Report

This report is generated for the Geographic Area as a whole. Below this button are four point-selectable radial buttons (“**Select**”, “**Significant**”, “**Protection**”, “**Owner**”) which determine the type of information delivered.

By choosing the “**Select**” button, the Detailed Report brings up 209 incidents, showing name, incident type, incident commander, and for fires, percent contained and size, and stating whether the incident is active or not.

By choosing the “**Significant**” button, the Detailed Report brings up a complete report of Geographic Area fire activity. This report can be further fine tuned by selecting Fire Activity by the “**Protection**” or by the “**Owner**” radial buttons. These reports include the following information for all units in each Dispatch Office:

- Fire danger and preparedness levels
- New fires and acres (wildfires, prescribed fires, and wildland fire use) broken out by human or lightning caused.
- Year-to-date fires and acres (wildfires, prescribed fires, and wildland fire use)
- Occurrence totals (wildfires, prescribed fires, and wildland fire use)

- Total number of units at each fire danger level
- Remarks by reporting office
- Information specific to each large incident (listed in order of priority)
- Summary table of large fire totals - acreage, personnel and resources (CRW1, CRW2, HEL1, HEL2, HEL3, ENGS and OVHD) committed
- Total number of initial attack / extended attack resources available and committed by each dispatch office
- Prescribed fire projects planned for near future dates

Summary Report

This report summarizes the Detailed GACC Situation Report. The report includes only those units reporting activity for that reporting period as well as units that have made changes to the previous day's reporting information.

By choosing the “**Select**” button, the Summary Report brings up 209 incidents, showing name, incident type, incident commander, and for fires, percent contained, and size, and stating whether the incident is active or not.

By choosing the “**Significant**” button, the Summary Report brings up a complete report of Geographic Area **fire** activity. This report can be further fine-tuned by selecting Fire Activity by the “**Protection**” or by the “**Owner**” radial buttons. These reports include the following information for all units in each Dispatch Office:

- Fire danger and preparedness levels
- Total number of units at each fire danger level
- New fires and acres (wildfires by cause, prescribed fires, and wildland fire use)
- Year-to-date fires and acres (wildfires, prescribed fires, and wildland fire use) broken out by human or lightning caused.
- Occurrence totals (wildfires, prescribed fires, and wildland fire use)
- Remarks by reporting office
- Information specific to each large incident (listed in order of GACC priority)
- Total number of resources committed to large incidents, by resource type (CRW1, CRW2, HEL1, HEL2, HEL3, ENGS and OVHD) and agency
- Total number of initial attack / extended attack resources available and committed

Large Incident Report

This report includes the specific incident information and resources committed for each large incident, listed in order of priority within the Geographic Area. It also contains a summary table of large fire totals - acreage, personnel and resources (CRW1, CRW2, HEL1, HEL2, HEL3, ENGS and OVHD) committed.

RX and WFU Report

This report summarizes year-to-date prescribed (RX) fire and wildland fire use (WFU) activity, separated by unit and agency.

Planned RX Report

This report summarizes information entered for prescribed fire projects planned within the next few days.

On Call Report

This report summarizes the after hours contacts by office.

GACC Fire Danger

This report lists the individual units as well as total number of units in High, Very High and Extreme fire danger within the selected GACC for that date.

Resources by Unit

This report summarizes initial / extended attack resources available and committed by resource type and reporting unit. It also contains a summary table showing all resources committed (CRW1, CRW2, HEL1, HEL2, HEL3, ENGS and OVHD) to both large fires and initial / extended attack.

Dispatch Office Reports

Scroll down the “Wildland Incident Situation Reports” screen to the “**Dispatch Office Reports**” menu, shown below.

Select the preferred GACC from the “**Select the desired Geographic Area**” pull-down menu to view reports produced for local dispatch offices.

Click the “**Dispatch Office Reports**” button to go to the “**Detailed Dispatch Office Situation Report**” menu screen, shown on the following page.

You will see the four different Dispatch Office reports to select:

- Dispatch Office Detailed Report
- Dispatch Office Summary Report
- Dispatch Planned Rx Report
- Dispatch Large Incident Report

“**Enter the desired date**” in the block provided.

From the pull-down menu, “**Select the desired Dispatch Office**”.

Near the bottom of the “**Detailed Dispatch Office Situation Report**” menu is a link titled “**Return to the Report List Menu**”. This link will take you back to the “Wildland Incident Situation Reports” menu. Clicking the “Back” button on your browser will take you to the “Wildland Incident Situation Reports” menu as well.

The link titled “**Return to the Select Dispatch Office Menu**” located near the bottom of each Dispatch Report will return you to the “Detailed Dispatch Office Situation Report” menu.

Regardless of the date selected, the **current** date and time, in Central Time, which the report was executed is posted at the very bottom of each report.

Dispatch Office Detailed Report

This report is generated for the local Dispatch office within the GACC. It includes the following information for all units:

- Fire danger and preparedness levels
- New fires and acres (wildfires, prescribed fires, and wildland fire use)
- Year-to-date fires and acres (wildfires, prescribed fires, and wildland fire use) broken out by human or lightning caused
- Occurrence totals (wildfires, prescribed fires, and wildland fire use) by unit
- Total number of units at each fire danger level
- Remarks by reporting office
- Information specific to each large incident (listed in order of priority)
- Summary table of large fire totals - acreage, personnel and resources (CRW1, CRW2, HEL1, HEL2, HEL3, ENGS and OVHD) committed
- Total number of initial attack / extended attack resources available and committed by unit
- Total number of resources committed to large fire and initial attack / extended attack incidents
- Who is on-call for each unit

Dispatch Office Summary Report

This report summarizes the Detailed Situation Report for dispatch offices. The report includes only those units reporting activity for that reporting period as well as units that have made changes to the previous day's reporting information. Content includes:

- Fire danger and preparedness levels
- New fires and acres (wildfires by cause, prescribed fires, and wildland fire use)
- Year-to-date fires and acres (wildfires, prescribed fires, and wildland fire use) broken out by human or lightning caused
- Occurrence totals (wildfires, prescribed fires, and wildland fire use) by agency
- Total number of units at each fire danger level
- Remarks by reporting office
- Information specific to each large incident (listed in order of priority)
- Total number of resources committed to large fires, by resource type (CRW1, CRW2, HEL1, HEL2, HEL3, ENGS and OVHD) and agency
- Total number of resources committed and available to initial/extended attack, by resource type (CRW1, CRW2, HEL1, HEL2, HEL3, ENGS and OVHD) and agency
- Total number of large fire and initial attack extended attack resources committed (by agency)

Dispatch Planned Rx Report

The Dispatch Office Planned Rx Report summarizes information entered for prescribed fire projects planned within the next few days.

Dispatch Large Incident Report

This report includes specific incident information and resources committed for each large incident, listed in order of priority within the dispatch office. It also contains a summary table of large fire totals - acreage, personnel and resources (CRW1, CRW2, HEL1, HEL2, HEL3, ENGS and OVHD) committed.

Special Area Reports

Detailed, Summary, Planned Rx, and Large Incident Reports are produced for Special Areas. The content of each of these reports is similar to the content found in the individual GACC and dispatch office reports.

There are eleven Special Areas, including:

- California
- Great Basin
- Greater Yellowstone Area
- NE Fire Compact
- Northwest Areas A, B, C, D, E, F, and G

Scroll down the “Wildland Incident Situation Report” screen to the “**Special Area Reports**” menu, shown on the following page.

Before selecting any of the report buttons, make sure that the date entered in the “**Enter the desired date**” block is correct.

Select the preferred area from the “**Select the desired Special Area**” pull-down menu.

Near the bottom of each report is a link titled “**Return to the Report List Menu**”. This link will take you back to the “Wildland Incident Situation Reports” menu. Clicking the “Back” button on your browser will take you to “Wildland Incident Situation Reports” menu as well.

Regardless of the date selected, the **current** date and time of the report being executed, is posted to the bottom of each report in Central Time.

National IMSR

Scroll to “**National IMSR**” reports on the “Wildland Incident Situation Reports” screen.

“**Enter the desired date**” in the block provided, as shown in the above screen.

IMSR

This report is used exclusively by the Intelligence Desk at NIIC for preparation of the National Interagency Situation Report.

NMAC Resource Summary

This report summarizes resource information for all of the GACCs. The content

includes the following:

- Resource Locations by GACC (e.g., Crews T1, Jumpers, etc.)
- Resource Availability by GACC (e.g., Crews T1, Crews T2, Jumpers, etc)

National Map IMT

This report is used exclusively by the Intelligence Desk at NIIC for preparation of the National Fire Map with IMT type.

Resource Summary

This report summarizes resource information for all of the GACCs. The content includes the following:

- Resource Locations by GACC (e.g., Crews T1, Jumpers, etc.)
- Resource Availability by GACC (e.g., Crews T1, Crews T2, Jumpers, etc)
- Geographic Summary of large fire information, including total acres, total personnel, crews, engines, helicopters, structures lost, and costs-to-date

YTD Large Incidents

This report contains year-to-date information for all large incidents sorted by GACC. The content includes the following information for each incident:

- Incident Name, number, and type
- Start and ending dates
- Cause and size
- Suppression costs
- Structures destroyed
- Latitude and longitude
- Sum of acres burned, suppression costs, and structures destroyed

YTD State and Agency

Content includes:

- National YTD fires and acres burned by state and agency

Fire Danger

This report lists units in Very High or Extreme fire danger by GACC. Additionally, the report gives a sum of the number of units in Very High or Extreme fire danger.

Structures and Fatalities by State

This report lists year to date structures destroyed and fatalities by state, listed by incident name, type, and size (if a fire).

Large Incidents and Resources

This report lists incident name, type, size and percent contained (where applicable), and also gives IC name and IMT type, and structures threatened or destroyed, and whether the incident is active or not.

Resource and Cost by State

This report lists, by state, the numbers of aircraft, crew, equipment, and overhead assigned to active incidents. It also gives the cost difference since the last report and the total year-to-date costs.

NIIC Active Incidents

This report lists, by state, large, active incidents giving incident name, number, start date, size, percent contained, IMT assigned, and structures destroyed to date.

NIIC State YTD Activity

This report lists by, state and agency, the year-to-date numbers and acres of all human, lightning, and wildland fire use fires.

WF and WFU Structures

This report lists, by state, the number of structures (residential, commercial, outbuildings) destroyed in wildland and wildland fire use fires in the last 24-hour period.

NIIC GACC WF-WFU Structures

This report lists, by GACC, the number of structures (residential, commercial, outbuildings) destroyed in wildland and wildland fire use fires in the last 24-hour period.

NIIC State Fire and Structures

This report lists by, state, the year-to-date numbers and acres of all wildland, prescribed, wildland fire use, human, and lightning fires and the number of structures destroyed.

National Weekly Fire Activity

This report provides the number of human, lightning, prescribed, and wildfire for resource benefits fires as well as acres for the time frame selected. The report provides the totals by GACC and agency.

Scroll down the “Wildland Incident Situation Reports” screen to the “**National Weekly Fire Activity**” menu, shown below.

The screenshot shows a web browser window titled "Situation Reports - Mozilla Firefox". The browser's menu bar includes File, Edit, View, History, Bookmarks, Tools, and Help. The main content area displays a form titled "National Weekly Fire Activity" with a purple header. The form contains two input fields: "Enter the desired begin date" with the value "11/19/2007" and "Enter the desired end date" with the value "11/29/2007". Below these fields are three buttons: "Fire Activity", "Structures/Fatalities", and "State Activity".

“Enter the desired begin date” and “Enter the desired end date” in the blocks provided.

Fire Activity

This report lists, by agency within each GACC, the number of fires and acres that

occurred within the dates specified in the report query.

Structures/Fatalities

This report lists, nationwide by agency, the number of structures destroyed and fatalities that occurred within the dates specified in the report query.

State Activity

This report lists, by state, the number of wildland, prescribed, and wildland fire use fires and acres that occurred within the dates specified in the report query.

National PAO Reports

Scroll down the “Wildland Incident Situation Reports” screen to the “**National PAO Reports**” menu, shown below.

The screenshot shows a web browser window titled "Situation Reports - Mozilla Firefox". The main content area features a purple header "National PAO Reports". Below the header is a form with the following elements:

- A text input field labeled "Enter the desired date" containing the value "11/29/2007".
- A row of two buttons: "Fires by State" and "YTD-State".
- A row of two buttons: "Fire List by State" and "YTD-Large Incidents by State".
- A single button: "Structures Fatalities by State".

At the bottom of the form area, there are two buttons: "SIT Login" and "209 Reports".

The “**SIT Login**” button located at the bottom of this screen will take you to the SIT Welcome screen.

The “**209 Reports**” button located at the bottom of this screen directs you to the ICS-209 Reports screen.

“**Enter the desired date**” in the block provided.

Fires by State

This report provides incident name, acres, personnel, structures and percent contained of all the incidents for the date selected.

- **Note:** The large font of this report is intentional to facilitate report printing on a plotter.

YTD – State

This report provides the year-to-date total, by state, of the number and acres for all wildland, prescribed, and WFU fires.

Fire List by State

This report gives a list of all the active fires for the date selected. Check the box(s) next to incident(s) to be shown on the report. Click the “**Submit Data**” button to retrieve the report. The content of this report is much the same as the “Fires by State” report.

Clicking the “**Reset Data**” button can reset Incidents selected.

YTD – Large Incidents by State

This report contains year-to-date information for all large incidents sorted by State. The content includes the following information for each incident:

- Incident Name, number, and type
- Start and ending dates
- Cause and size
- Suppression costs
- Structures destroyed
- Latitude and longitude
- Sum of acres burned, suppression costs, and structures destroyed

Structures Fatalities by State

Sorted by state, this report provides year-to-date totals of structures lost and fatalities. Content includes:

- Incident Name, number, type and size
- Structures destroyed (Primary, Commercial, Outbuilding)
- Fatalities
- Latitude and longitude
- National total of acres burned, structures lost, and fatalities

209 REPORTS

Access current calendar year ICS-209s via the “**209 Reports**” button located at the bottom of the “Wildland Incident Situation Reports” menu screen, shown below.

The screenshot shows a web browser window titled "Situation Reports - Mozilla Firefox". The interface contains three main sections for report generation:

- National IMSR**: Includes a date field set to 11/29/2007 and buttons for IMSR, NMAC Resource Summary, National Map IMT, Resource Summary, YTD - Large Incidents, YTD - State and Agency, Fire Danger, Structures Fatalities by State, Large Incidents and Resources, Resource and Cost by State, NIIC Active Incidents, NIIC State YTD Activity, WF and WFU Structures, NIIC GACC WF-WFU Structures, and NIIC State Fire and Structures.
- National Weekly Fire Activity**: Includes date fields for begin (11/19/2007) and end (11/29/2007) dates, and buttons for Fire Activity, Structures/Fatalities, and State Activity.
- National PAO Reports**: Includes a date field set to 11/29/2007 and buttons for Fires by State, YTD-State, Fire List by State, YTD-Large Incidents by State, and Structures Fatalities by State.

At the bottom of the page, there are two buttons: "SIT Login" and "209 Reports". The "209 Reports" button is circled in red.

All of the ICS-209s are **Read-Only** access.

Although the information on the form generated via the 209 Program is the same as the NWCG ICS-209 form, ICS-209s printed from the database will not look exactly like the NWCG ICS-209 form.

Click the “**209 Reports**” button.

This will take you to the “**Incident 209 Reports**” screen, shown below.

Incident 209 Reports

Current single approved 209 forms by GACC (Active incidents only - select any 209 for a current incident.)	2007 Archive of approved 209 forms by GACC (All 209s for the current year - select any 209 for an incident from this year.)
Briefing Summary for selected current approved 209 forms by GACC (Select current single or multiple 209s for a short briefing summary of incident activity.)	Multiple current approved 209 forms by GACC for selected incidents (Select single or multiple 209s for current incidents within a GACC.)
Briefing Summary with Significant Events and Remarks for selected current approved 209 forms by GACC (Select current single or multiple 209s for a short briefing summary of incident activity.)	Cheetah Data
Significant Incident Summary Spreadsheet by GACC (100+ acres or IMT Type 1 or 2) Southern California <input type="button" value="go"/>	Land Management Unit Summary Spreadsheet Select GACC: Southern California <input type="button" value="go"/>
Current GACC Incident Overview Spreadsheet Southern California <input type="button" value="go"/>	GACC Wildfire Use Summary Spreadsheet Southern California <input type="button" value="go"/>
Incident Change Summary	

[Return to 209 Main Menu](#)
[Go to SIT Report Menu](#)

Currently there are eleven different reports generated for each GACC. They include:

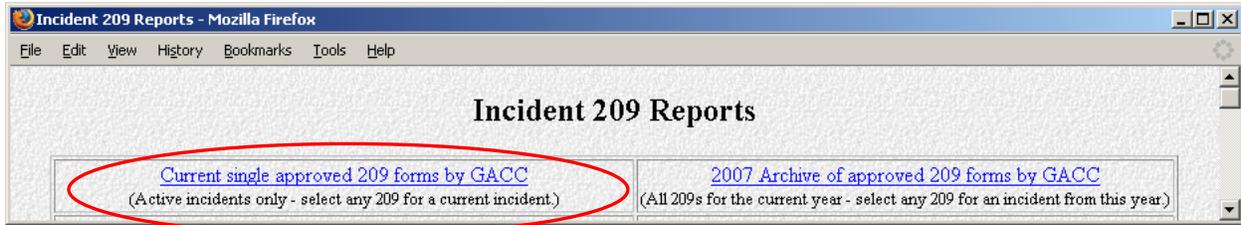

- Current single approved 209 forms
- Archived approved 209 forms for current year
- Brief summary reports for selected current 209 forms
- Multiple current 209 forms (for printing purposes)
- Briefing summary with significant events and remarks on current 209 forms
- Cheetah Data
- Significant Incident Summary Spreadsheet
- Land Management Unit Summary Spreadsheet
- Current GACC Incident Overview Spreadsheet
- GACC Wildfire Use Summary Spreadsheet
- Incident Change Summary

The “**Return to 209 Main Menu**” link at the bottom of the page takes you back to the 209 Program Welcome Screen. **Please refer to the 209 Program User’s Guide for additional 209 Program site navigation.**

The “**Go to SIT Report Menu**” link at the bottom of the page returns you to the “Wildland Incident Situation Reports” menu screen in the SIT Program.

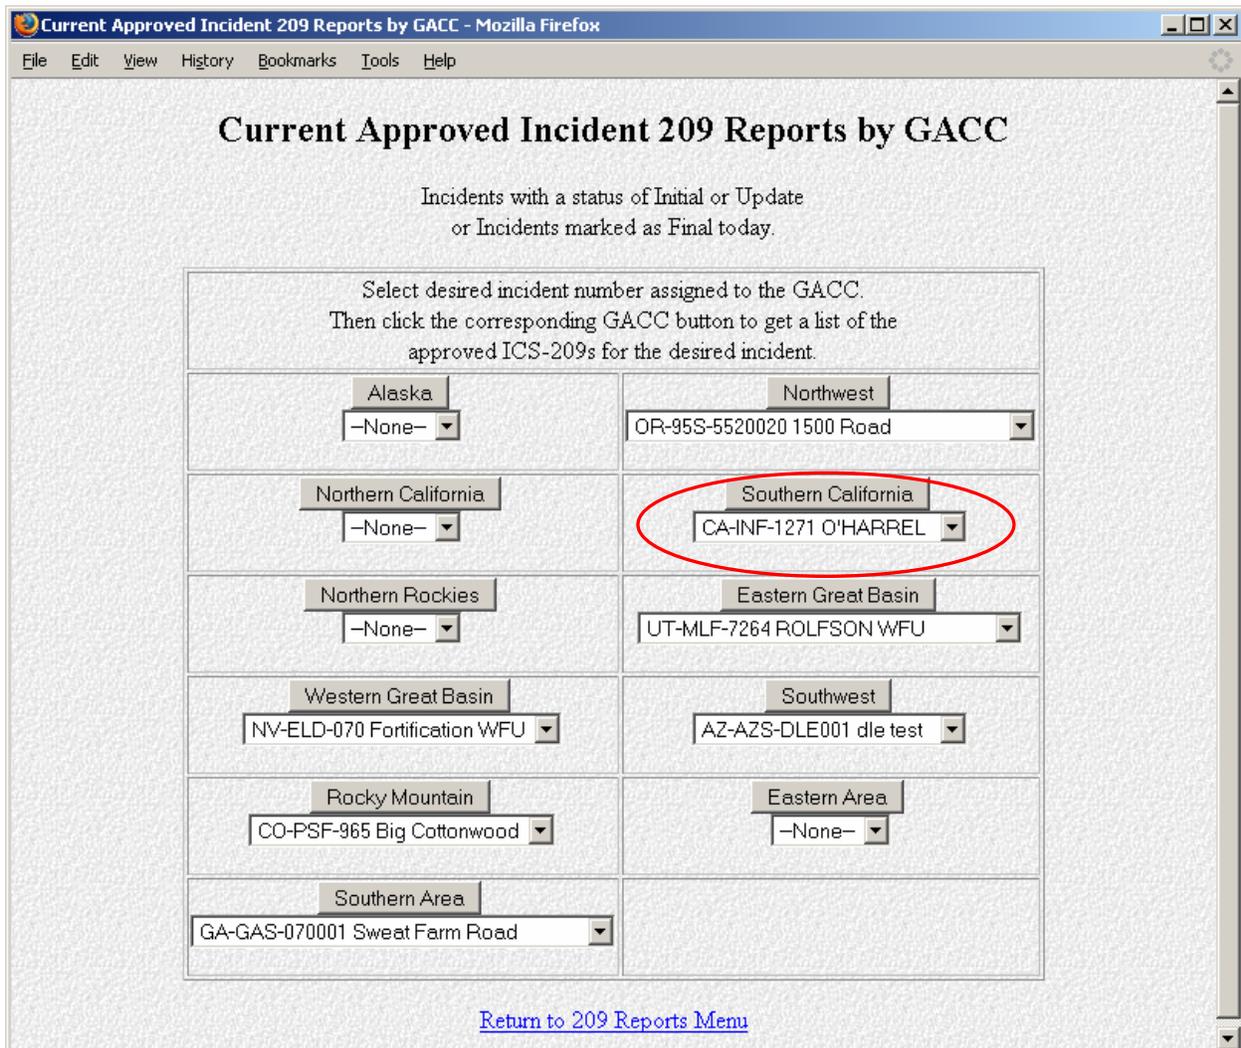

Current ICS-209s

Click the “**Current single approved 209 forms by GACC**” link to select ICS-209s for active incidents.

This link will take you to the “**Current Approved Incident 209 Reports by GACC**” screen. This screen looks like the screen shown below.

The “**Return to 209 Reports Menu**” link at the bottom will return you to the “Incident 209 Reports” menu screen. Simply clicking the “Back” button on your browser will return you to the “Incident 209 Reports” menu screen too.

Select the desired incident number assigned to the GACC. Then click the corresponding GACC button to get a list of the approved ICS-209s for the desired incident.

- **Note:** **Block 46** must be filled out, and the form must have been submitted for the ICS-209 to show up in this list.
- **Note:** Any incident marked “**Final**” on the date selected will **not** appear in this menu. “**Final**” reports can be retrieved thru the “Approved Incident 209 Reports by GACC” link. See the “Archived ICS-209s” instructions on page 98 to retrieve incidents marked “Final”.
- **Example:** The screen capture below illustrates what the individual current approved ICS-209 report menu screen will look like. The incident, **O’Harrel, CA-INF-1271**, was selected from the Southern California pull-down menu, followed by clicking the “**Southern California**” button. You can select any of the reports submitted by clicking the “**Incident Name**” link next to the desired date and report status (e.g., “I” -Initial, “U” - Update).

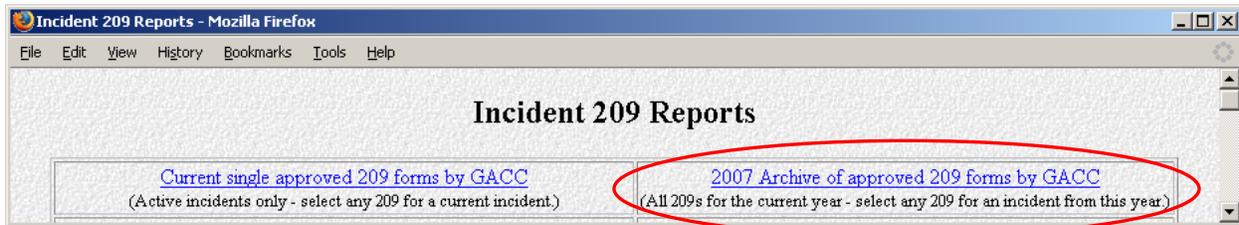

Incident Name	Report Date	Status	Approved Date	Last Edit Date
O'HARREL	11/03/2007 1552	I	11/03/2007 1819	11/03/2007 1819
O'HARREL	11/04/2007 1600	U	11/04/2007 1755	11/04/2007 1755
O'HARREL	11/05/2007 1550	U	11/05/2007 1802	11/05/2007 1802
O'HARREL	11/06/2007 1600	U	11/06/2007 1827	11/06/2007 1827
O'HARREL	11/07/2007 1630	U	11/07/2007 1824	11/07/2007 1824
O'HARREL	11/08/2007 1700	U	11/08/2007 1906	11/08/2007 1906
O'HARREL	11/15/2007 1600	U	11/15/2007 1820	11/15/2007 1820

[Return to Current Approved 209s list.](#)
[Return to All Approved 209 forms by GACC list.](#)
[Return 209 Main Menu](#)

The “**Return to Current Approved 209s list**” link will return you to the “Current single approved 209 forms by GACC” menu screen. Clicking the “Back” button on your browser will take you back to that menu screen as well.

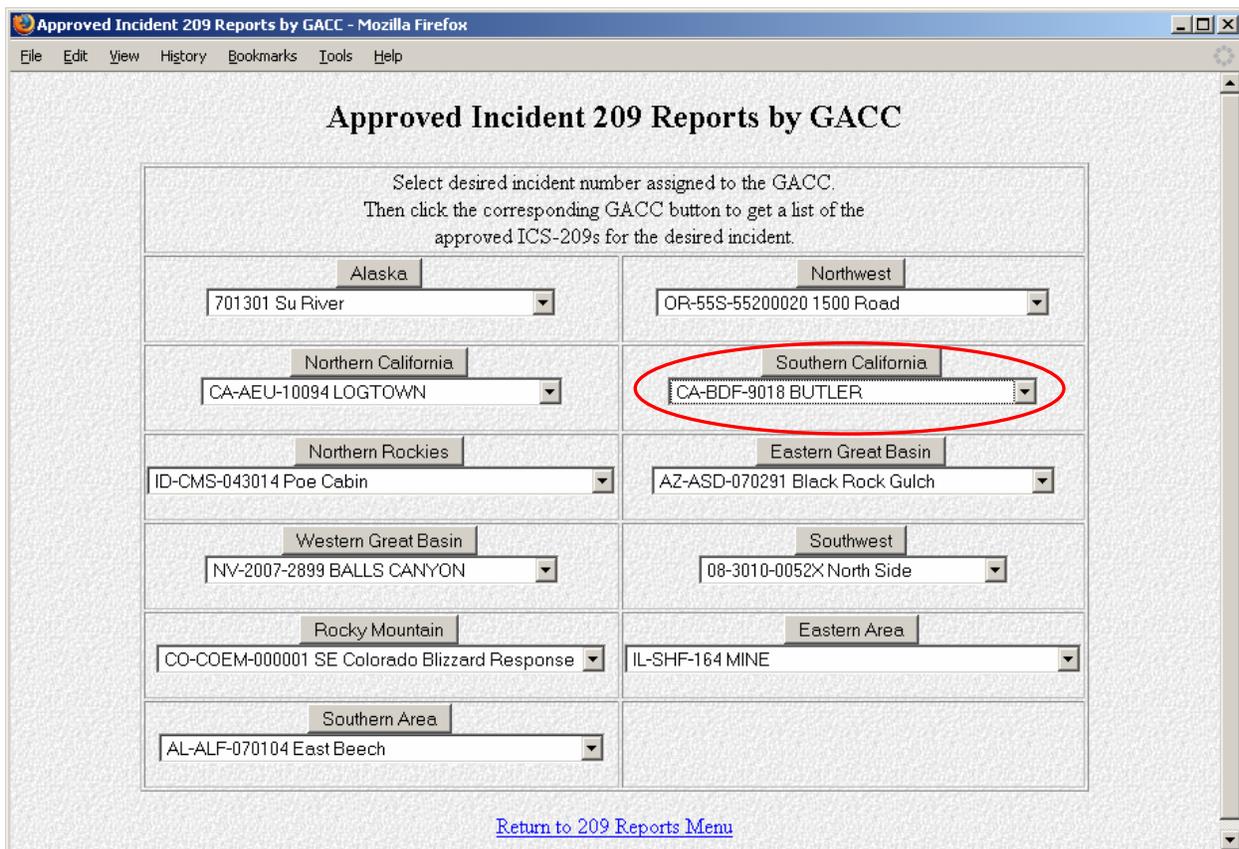

Archived ICS-209s

Click the “**2007 Archive of approved 209 forms by GACC**” link to select any ICS-209s that have been archived or marked “Final”.

This link will take you to the “**Approved Incident 209 Reports by GACC**” screen, shown below.

The “**Return to 209 Reports Menu**” link at the bottom will return you to the “Incident 209 Reports” menu screen. Simply clicking the “Back” button on your browser will return you to the “Incident 209 Reports” menu screen too.

Select the desired incident number assigned to the GACC. Then click the corresponding GACC button to get a list of the approved ICS-209s for the desired incident.

- **Example:** The incident **Butler, CA-BDF-9018** was selected within the Western Great Basin pull-down menu. Click the “**Southern California**” button to retrieve

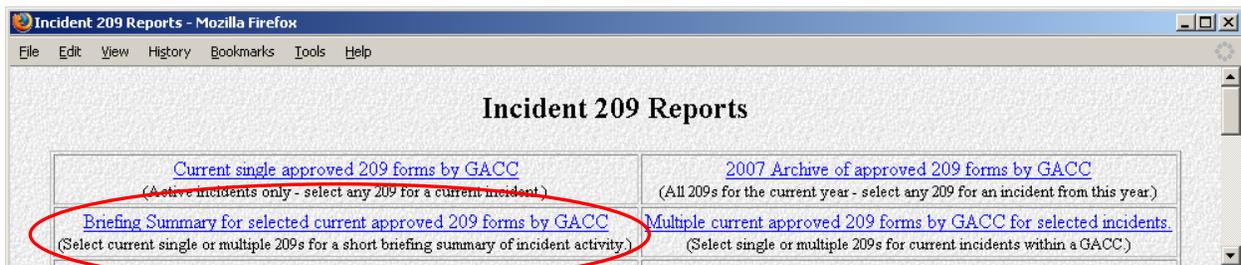

the reports for that incident. The image below illustrates what the individual archived ICS-209 menu screen will look like. You can select any of the reports submitted by clicking the **“Incident Name”** link next to the desired date and report status (e.g., **“I”** -Initial, **“U”** – Update, **“F”** - Final).

The **“Return to Current Approved 209s list”** link will return you to the **“Current single approved 209 forms by GACC”** menu screen. Clicking the **“Back”** button on your browser will take you back to that menu screen as well.

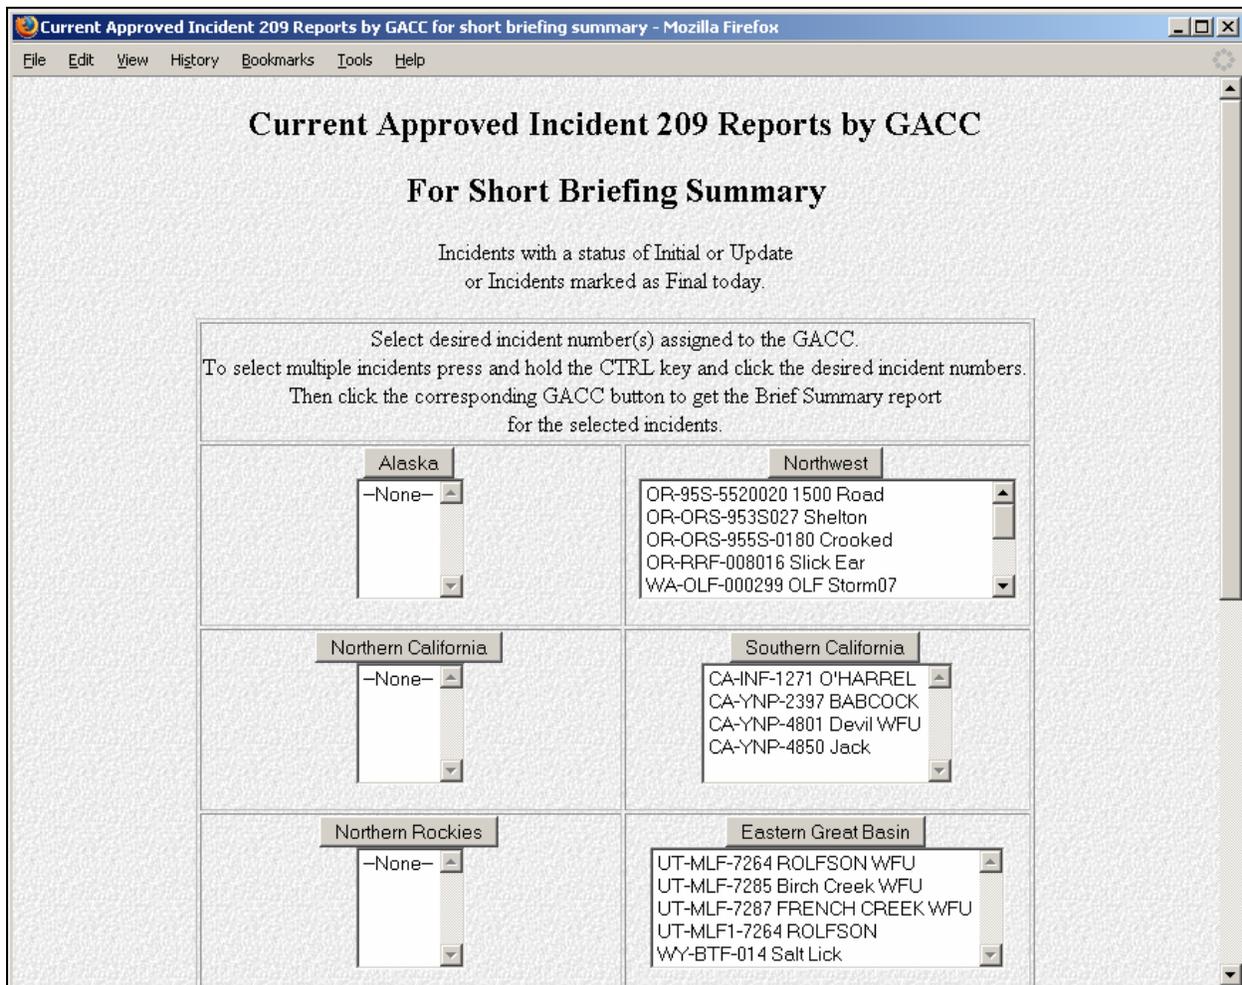

Summary Reports

Click the **“Briefing Summary for selected current approved 209 forms by GACC”** link to select any short summary ICS-209 reports.

This link will take you to the “**Current Approved Incident 209 Reports by GACC For Short Briefing Summary**” screen, shown below.

The “**Return to 209 Reports Menu**” link at the bottom will return you to the “Incident 209 Reports” menu screen. Clicking the “Back” button on your browser will return you to the “Incident 209 Reports” menu screen as well.

Current Approved Incident 209 Reports by GACC
For Short Briefing Summary

Incidents with a status of Initial or Update
or Incidents marked as Final today.

Select desired incident number(s) assigned to the GACC.
To select multiple incidents press and hold the CTRL key and click the desired incident numbers.
Then click the corresponding GACC button to get the Brief Summary report
for the selected incidents.

Alaska -None-	Northwest OR-95S-5520020 1500 Road OR-ORS-953S027 Shelton OR-ORS-955S-0180 Crooked OR-RRF-008016 Slick Ear WA-OLF-000299 OLF Storm07
Northern California -None-	Southern California CA-INF-1271 O'HARREL CA-YNP-2397 BABCOCK CA-YNP-4801 Devil WFU CA-YNP-4850 Jack
Northern Rockies -None-	Eastern Great Basin UT-MLF-7264 ROLFSON WFU UT-MLF-7285 Birch Creek WFU UT-MLF-7287 FRENCH CREEK WFU UT-MLF1-7264 ROLFSON WY-BTF-014 Salt Lick

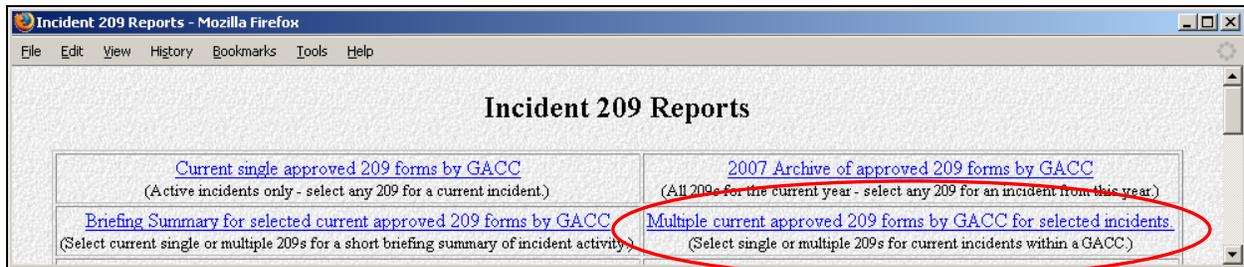

Select the desired incident number assigned to the GACC. Then click the corresponding GACC button to get the Brief Summary Report for the selected incident.

To select multiple incidents press and hold the CTRL key and click the desired incident numbers, then click the GACC button.

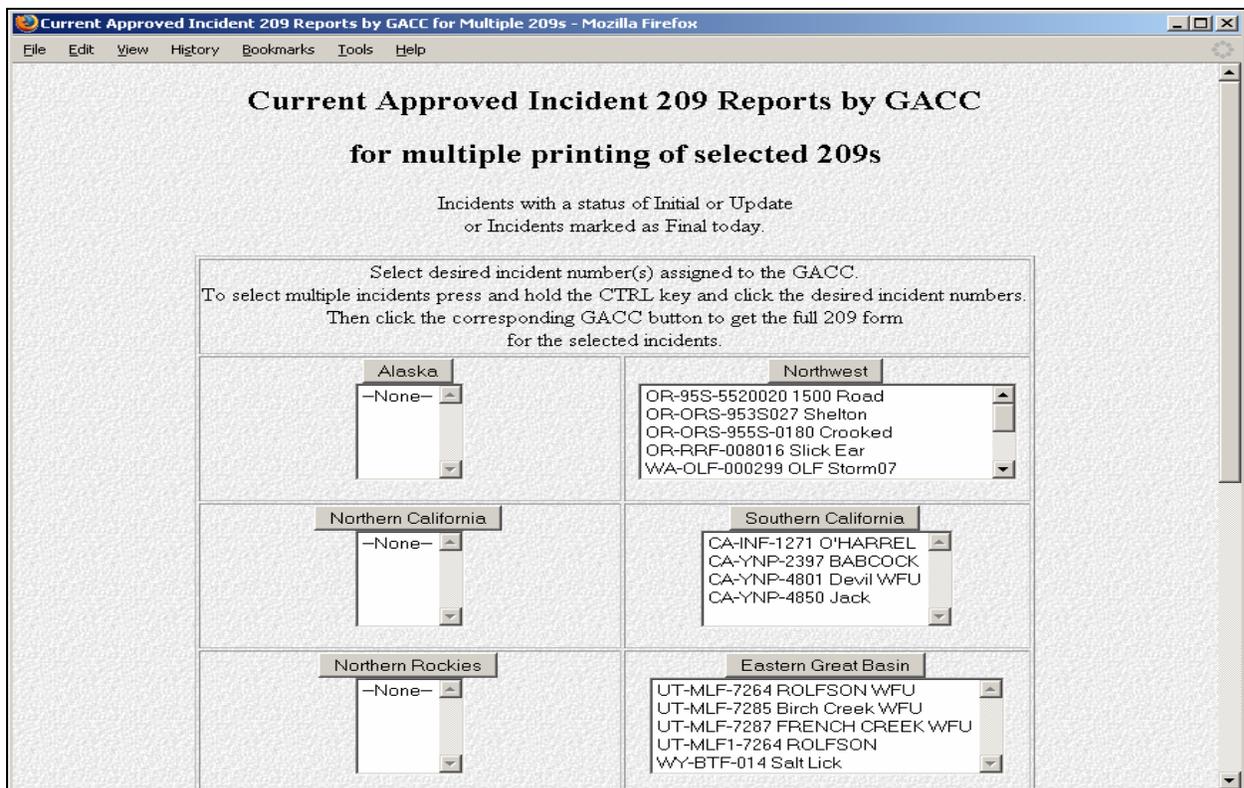

The short briefings include the incident name, number, size, percent contained, threat potential, structure information, fuels/materials, committed resources, etc., from the ICS-209.

Multiple Current 209s for Printing

Click the “**Multiple current approved 209 forms by GACC for selected incidents**” link to select single or multiple 209s for current incidents within a GACC.

This link will take you to the “**Current Approved Incident 209 Reports by GACC for multiple printing of selected 209s**” screen, shown below.

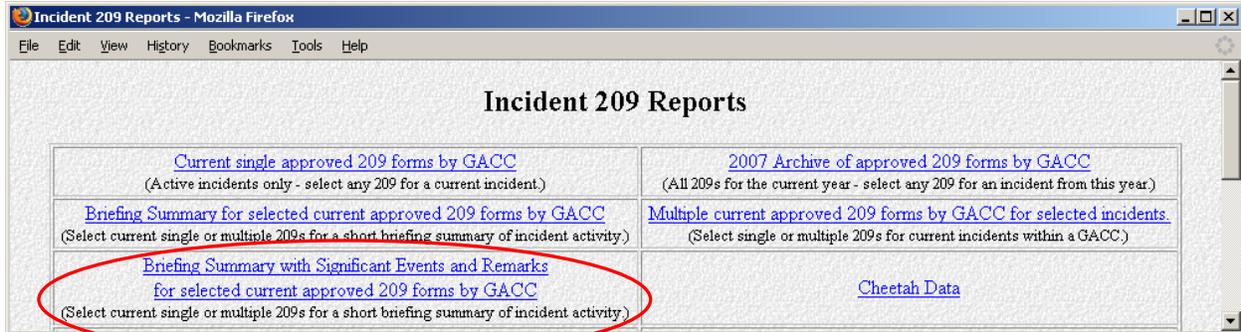

The “**Return to 209 Reports Menu**” link at the bottom will return you to the “Incident 209 Reports” menu screen. Clicking the “Back” button on your browser will return you to the “Incident 209 Reports” menu screen as well.

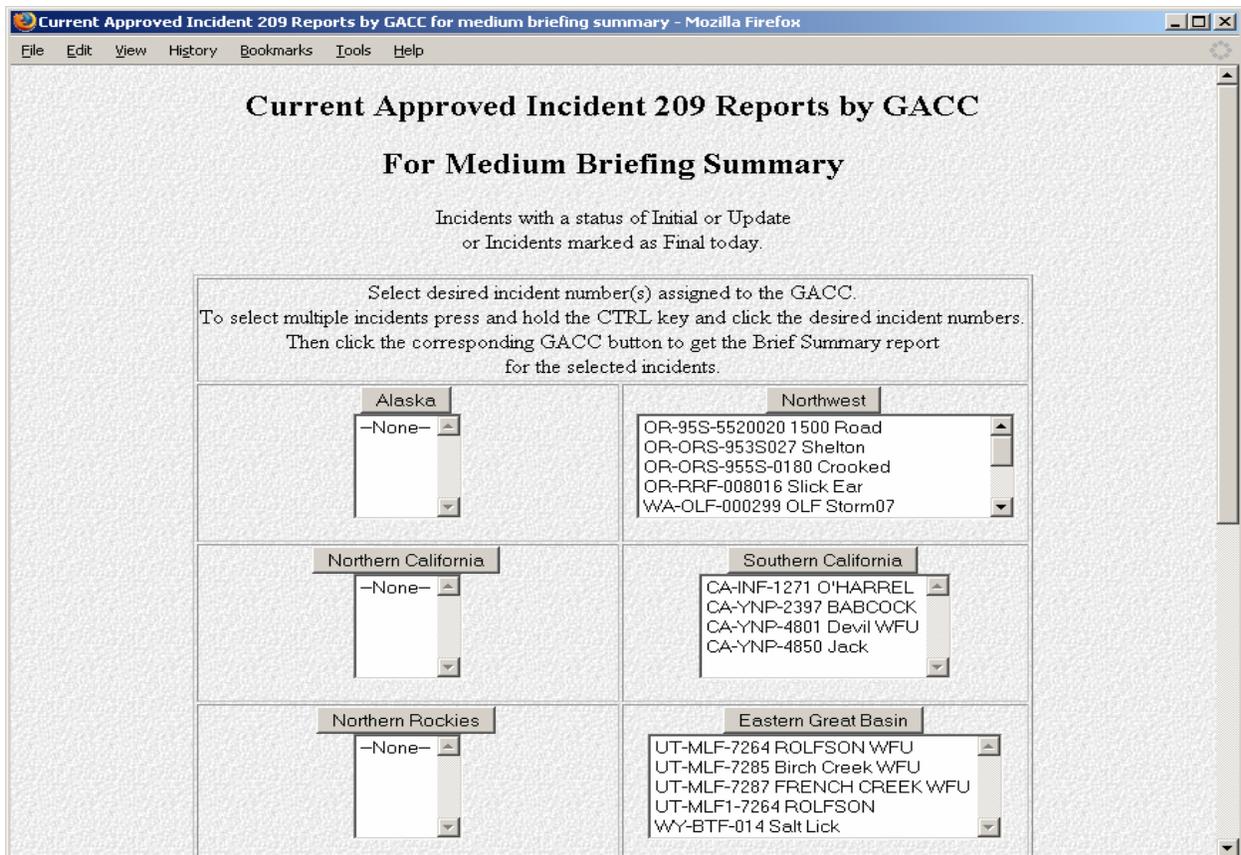

Select the desired incident number assigned to the GACC. Then click the corresponding GACC button to bring up the ICS-209 to be printed. To select multiple incidents press and hold the CTRL key and click the desired incident numbers. Then click the corresponding GACC button to read ICS-209s for the selected incidents.

Briefing Summary with Significant Events and Remarks

Click the “**Briefing Summary with Significant Events and Remarks for selected current approved 209 forms by GACC**” link to select any short summary ICS-209 reports.

This link will take you to the “**Current Approved Incident 209 Reports by GACC For Medium Briefing Summary**” screen, shown below.

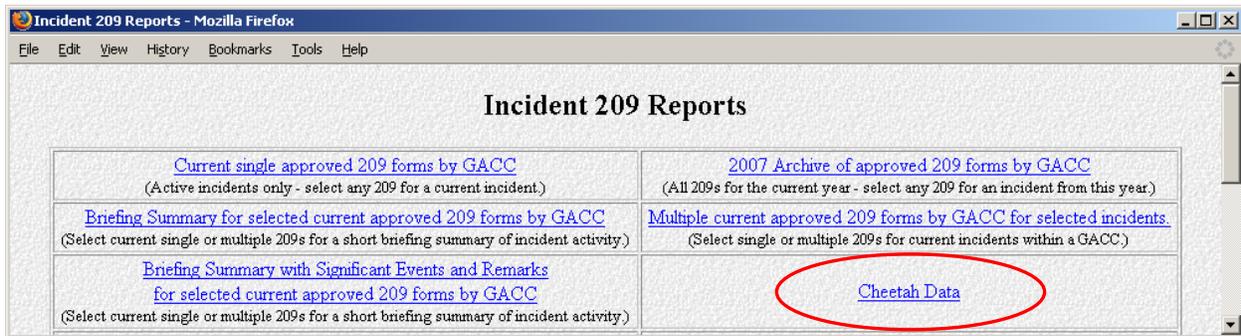

The “**Return to 209 Reports Menu**” link at the bottom will return you to the “Incident 209 Reports” menu screen. Clicking the “Back” button on your browser will return you to the “Incident 209 Reports” menu screen as well.

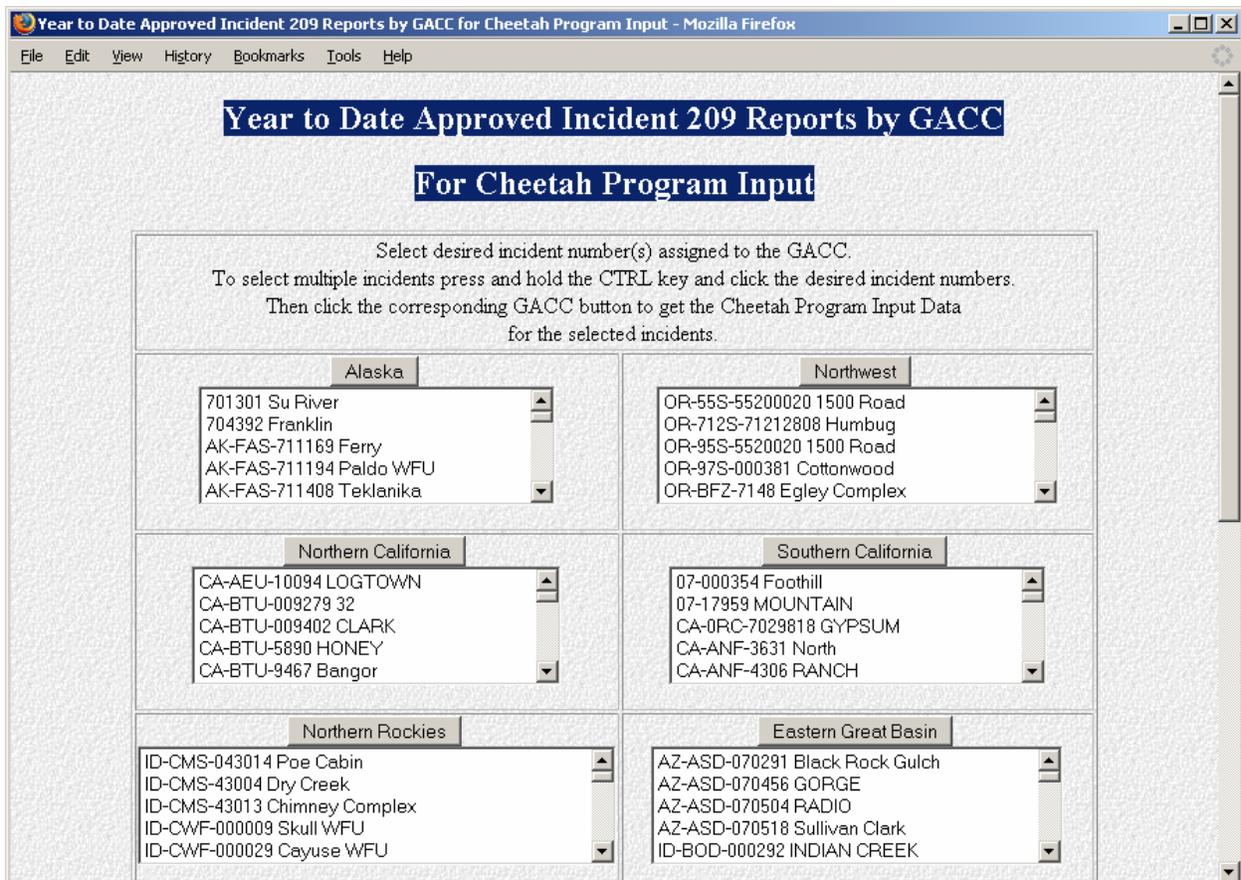

Cheetah Data

The Cheetah 2 (Computerized Harmonic Evaluation of Episodes and Tools for Assessment of Help) program was developed to support examination of fire occurrence patterns and fire suppression resource requirements at the National and Geographic Area levels. Questions are frequently asked on the expected fire suppression resource needs by the National and Geographic Area decision-makers and managers need to assess fire occurrence patterns to predict future fire suppression resource requirements.

Users of the Cheetah Program can obtain incident resource data via the “Cheetah Data” link.

This link will take you to the “Year to Date Approved Incident 209 Reports by GACC for Cheetah Program Input” screen shown below.

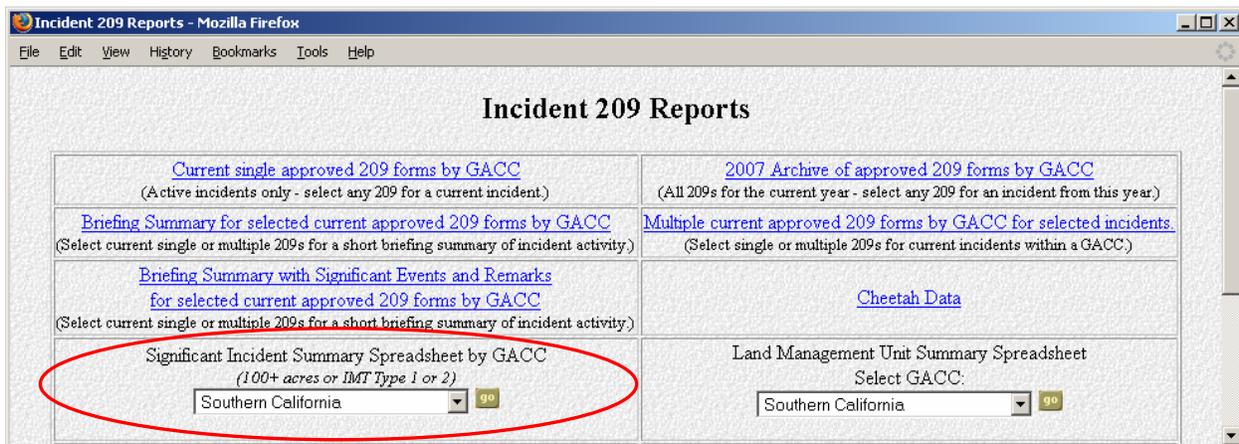

Select the desired incident number assigned to the GACC. Then click the corresponding GACC button to get the Brief Summary Report for the selected incident.

To select multiple incidents press and hold the CTRL key and click the desired incident numbers, then click the GACC button.

The **“Return to 209 Reports Menu”** link at the bottom will return you to the “Incident 209 Reports” menu screen. Clicking the “Back” button on your browser will return you to the “Incident 209 Reports” menu screen as well.

Significant Incident Summary

To view current incidents of 100+ acres or incidents with Type 1 or 2 IMTs assigned to a specific GACC, select the desired GACC from the pull-down menu under the **“Significant Incident Summary Spreadsheet by GACC”** heading on the “Incident 209 Reports” screen, shown below.

Then click the **“Go”** button.

This spreadsheet provides a summary of the following information:

- State and Unit of incident
- Incident Name, Number and Type
- Start Date
- IC name and Team Type
- Latitude and Longitude
- Incident size
- Costs to date
- Date controlled
- Structures destroyed

The **“Return to 209 Reports Menu”** link at the bottom will return you to the “Incident 209 Reports” menu screen. Clicking the “Back” button on your browser will return you to the “Incident 209 Reports” menu screen as well.

Land Management Unit Summary

Select the desired GACC from the pull-down menu under the heading **“Land Management Unit Summary Spreadsheet”** on the “Incident 209 Reports” screen, shown below.

The screenshot shows the 'Incident 209 Reports' page with the following content:

Current single approved 209 forms by GACC (Active incidents only - select any 209 for a current incident.)	2007 Archive of approved 209 forms by GACC (All 209s for the current year - select any 209 for an incident from this year)
Briefing Summary for selected current approved 209 forms by GACC (Select current single or multiple 209s for a short briefing summary of incident activity.)	Multiple current approved 209 forms by GACC for selected incidents (Select single or multiple 209s for current incidents within a GACC.)
Briefing Summary with Significant Events and Remarks for selected current approved 209 forms by GACC (Select current single or multiple 209s for a short briefing summary of incident activity.)	Cheetah Data
Significant Incident Summary Spreadsheet by GACC (100+ acres or IMT Type 1 or 2) Southern California <input type="button" value="go"/>	Land Management Unit Summary Spreadsheet Select GACC: Southern California <input type="button" value="go"/>

Then click the **“Go”** button. A menu screen like the one shown below will appear:

The screenshot shows the 'Select Unit for 209 Summary Spread Sheet by Land Management Unit' page with the following content:

Incident Type All	Land Management Unit San Bernardino NF (6) <input type="button" value="go"/>
----------------------	---

[Return to 209 Report Menu](#)

From the pull-down menus, select the **“Incident Type”** and **“Land Management Unit”**. A spreadsheet will be produced summarizing incident information for **all** incidents for the unit selected.

The **“Return to 209 Reports Menu”** link at the bottom will return you to the “Incident 209 Reports” menu screen. Clicking the “Back” button on your browser will return you to the “Incident 209 Reports” menu screen as well.

Current GACC Incident Overview Spreadsheet

Select the desired GACC from the pull-down menu under the heading “**GACC Incident Overview Spreadsheet**” on the “Incident 209 Reports” screen, shown below.

The screenshot shows a web browser window titled "Incident 209 Reports - Mozilla Firefox". The page content is titled "Incident 209 Reports" and contains a grid of options:

Current single approved 209 forms by GACC <small>(Active incidents only - select any 209 for a current incident.)</small>	2007 Archive of approved 209 forms by GACC <small>(All 209s for the current year - select any 209 for an incident from this year.)</small>
Briefing Summary for selected current approved 209 forms by GACC <small>(Select current single or multiple 209s for a short briefing summary of incident activity.)</small>	Multiple current approved 209 forms by GACC for selected incidents. <small>(Select single or multiple 209s for current incidents within a GACC.)</small>
Briefing Summary with Significant Events and Remarks for selected current approved 209 forms by GACC <small>(Select current single or multiple 209s for a short briefing summary of incident activity.)</small>	Cheetah Data
Significant Incident Summary Spreadsheet by GACC <small>(100+ acres or IMT Type 1 or 2)</small> Southern California <input type="button" value="go"/>	Land Management Unit Summary Spreadsheet Select GACC: Southern California <input type="button" value="go"/>
Current GACC Incident Overview Spreadsheet Southern California <input type="button" value="go"/>	GACC Wildfire Use Summary Spreadsheet Southern California <input type="button" value="go"/>

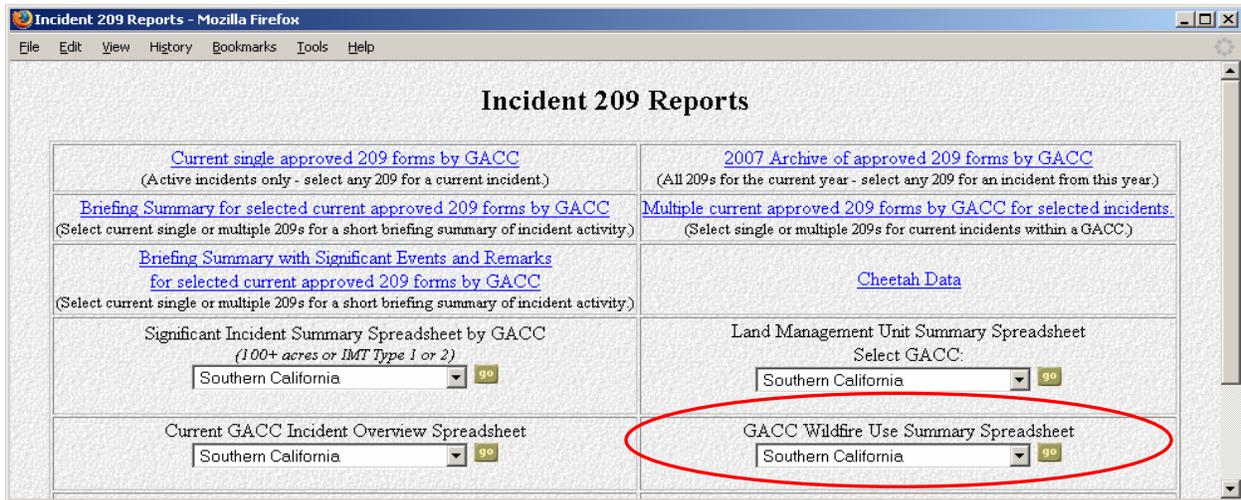

Then click the “**Go**” button.

A spreadsheet will be produced summarizing incident information for **all** incidents for the unit selected.

The “**Return to 209 Reports Menu**” link at the bottom will return you to the “Incident 209 Reports” menu screen. Clicking the “Back” button on your browser will return you to the “Incident 209 Reports” menu screen as well.

GACC WFU Summary

Select the desired GACC from the pull-down menu under the heading **“GACC Wildfire Use Summary Spreadsheet”** on the “Incident 209 Reports” screen, shown below.

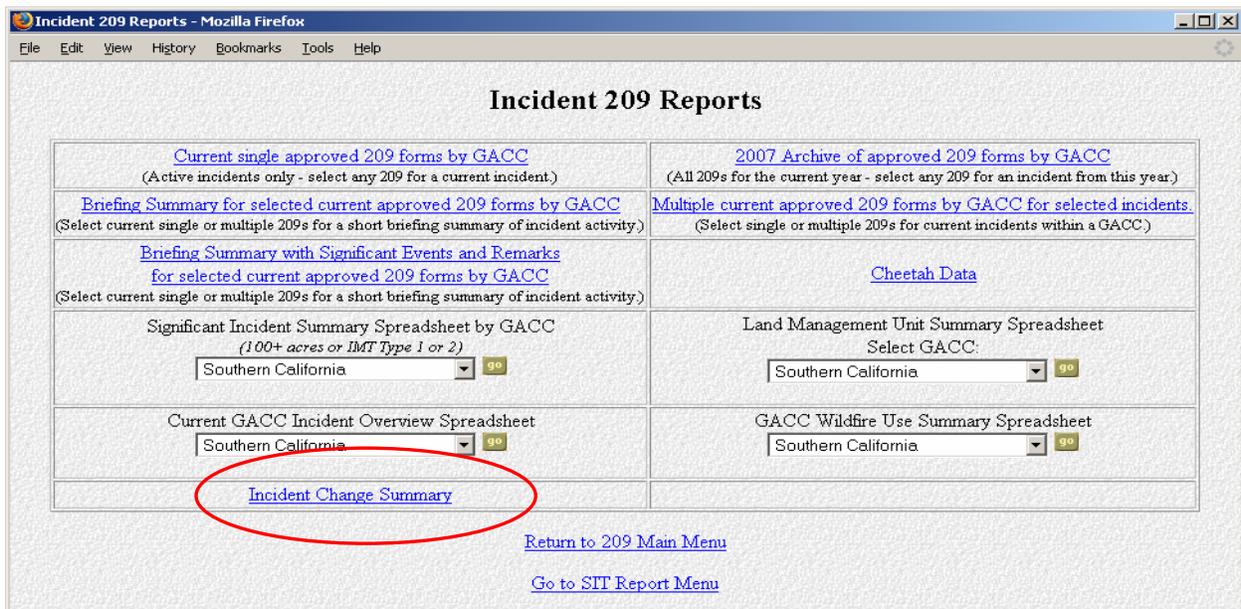

Click the **“Go”** button.

A spreadsheet will be produced summarizing incident information for **all** incidents for the unit selected.

The **“Return to 209 Reports Menu”** link at the bottom will return you to the “Incident 209 Reports” menu screen. Clicking the “Back” button on your browser will return you to the “Incident 209 Reports” menu screen as well.

Incident Change Summary

Click the **“Incident Change Summary”** link for activity change reports.

This link will take you to the “**Current Approved Incident 209 Reports by GACC for Activity Change**” screen shown below.

Current Approved Incident 209 Reports by GACC for Activity Change

Incidents with a status of Initial or Update
or Incidents marked as Final today.

Select desired incident number(s) assigned to the GACC.
To select multiple incidents press and hold the CTRL key and click the desired incident numbers.
Then click the corresponding GACC button to get the Activity Change form
for the selected incidents.

<p>Alaska</p> <p>-None-</p>	<p>Northwest</p> <p>OR-95S-5520020 1500 Road OR-ORS-953S027 Shelton OR-ORS-955S-0180 Crooked OR-RRF-008016 Slick Ear WA-OLF-000299 OLF Storm07</p>
<p>Northern California</p> <p>-None-</p>	<p>Southern California</p> <p>CA-INF-1271 O'HARREL CA-YNP-2397 BABCOCK CA-YNP-4801 Devil WFU CA-YNP-4850 Jack</p>

Select the desired incident number assigned to the GACC. Then click the corresponding GACC button to get the Brief Summary Report for the selected incident. To select multiple incidents press and hold the CTRL key and click the desired incident numbers, then click the GACC button.

The “**Return to 209 Reports Menu**” link at the bottom will return you to the “Incident 209 Reports” menu screen. Clicking the “Back” button on your browser will return you to the “Incident 209 Reports” menu screen as well.

The “**Go to SIT Report Menu**” link at the bottom will return you to the “Wildland Incident Situation Reports” menu screen.

SITE MANAGEMENT

User access for the SIT Program is managed via the “Table Maintenance” menu screen accessed via the SIT Welcome screen. Access is set up in levels, with different permissions set at each one.

National Level Access

NICC Intelligence and the Help Desk have access to all the screens within the “Table Maintenance” Screen. Responsibility for management of the Geographic Areas, Agencies and lookup tables (values for pull-down lists) rests with NICC Intelligence. Requests for additions such as resource type(s) specific to a Geographic Area will be placed to NICC Intelligence.

Geographic Area Level Access

GACC Intelligence Coordinators/Officers have management responsibility for the initial setup of units, Dispatch Offices and access/permissions for the offices within their areas. Additions, updates and deletions of reporting units and users may be done by either the GACC or the local Dispatch Office, according to the Geographic Area's preference. These functions are accomplished by using the links from the “Table Maintenance” screens.

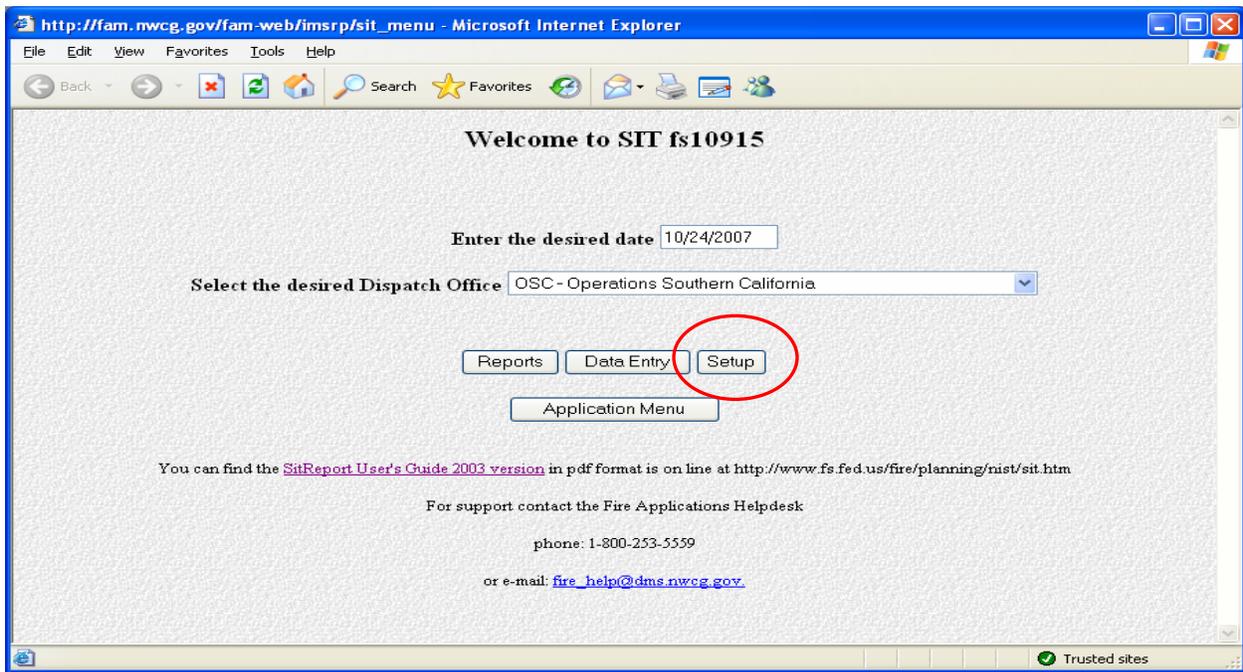

Local Dispatch Office Level Access

One person in each Dispatch Office will have responsibility for the management of KCLIDs/user access within the office. This person may also use the “Unit Add” and “Unit Update/Delete” screens to add and keep unit information current. They will also use the “Security Add” and “Security Update/Delete” screens to set user access to the KCLIDs for their office.

- Local level access to the system will be limited to adding, updating and deleting units, entering data and generating reports. You will not be able to edit anyone else's data, unless they have granted you access/authority to stand in for them (in the event of network problems, etc.).

If you are a manager, you will have a “**Setup**” button at the SIT Welcome screen.

Click the “**Setup**” button located on the SIT Welcome screen, shown on the next page.

This will take you to the “Table Maintenance” menu screen, shown below.

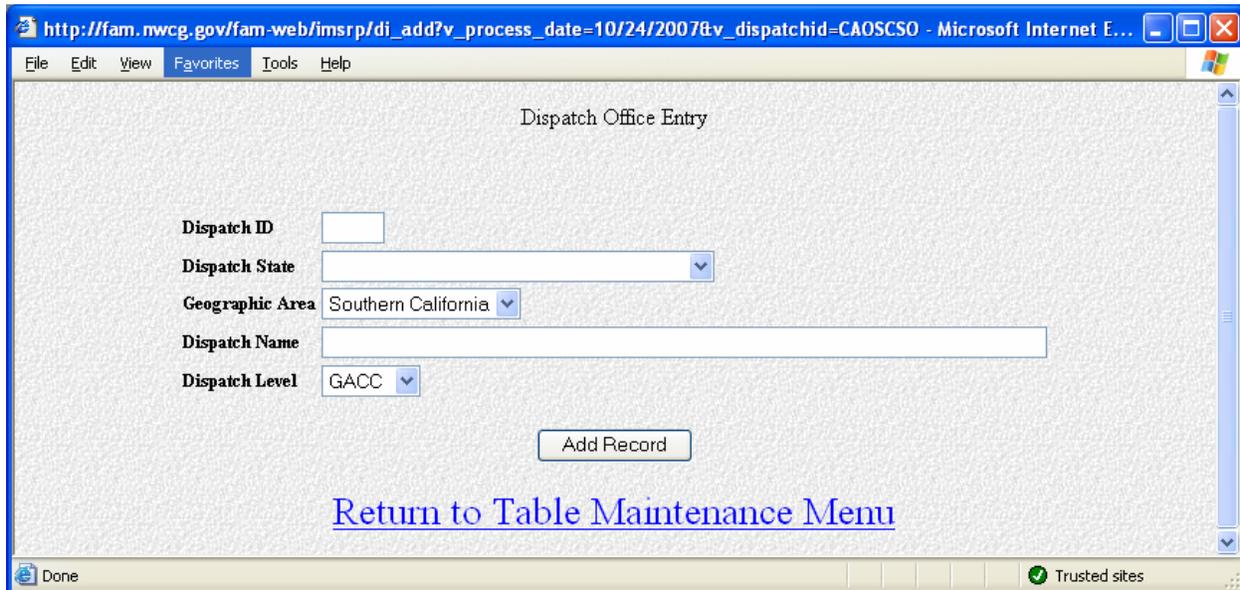

- The “**Return to 209 Menu**” link at the bottom of the screen will return you to the SIT Welcome screen.
- When you are done adding, updating, or deleting records within any of the screens under “Table Maintenance” (e.g., Dispatch Office Add, Unit Add, Security Add, etc.) it is important that you use the “**Return to Table Maintenance Menu**” link located on the bottom of each screen to return to the prior menu. **Do not use the “Back” button on your browser.**

Dispatch Office Add

To add new Dispatch Offices within the Area, click the **“Dispatch Office Add”** link located on the “Table Maintenance” menu screen. This will take you to the “Dispatch Office Entry” screen shown below.

- The **“Return to Table Maintenance Menu”** link at the bottom will return you to the “Table Maintenance” menu screen.

The screenshot shows a web browser window with the URL `http://fam.nwcg.gov/fam-web/imsrp/di_add?v_process_date=10/24/2007&v_dispatchid=CAOOSCO`. The page title is "Dispatch Office Entry". The form contains the following fields:

- Dispatch ID**: A text input field.
- Dispatch State**: A pull-down menu.
- Geographic Area**: A pull-down menu with "Southern California" selected.
- Dispatch Name**: A text input field.
- Dispatch Level**: A pull-down menu with "GACC" selected.

Below the form is an "Add Record" button and a blue link labeled "Return to Table Maintenance Menu". The browser's status bar at the bottom shows "Done" and "Trusted sites".

Dispatch ID

Enter the unit identifier for the office (e.g., BRC).

Dispatch State

From the pull down menu, choose the state for that dispatch office.

Geographic Area

Choose your Geographic Area from the pull down list.

Dispatch Name

Enter the name of the Dispatch Office (e.g., Bitterroot Dispatch Center).

Dispatch Level

Choose “Local” from the pull down list.

- **Only** GACCs and NICC have “GACC” level access.

Click the **“Add Record”** button.

Repeat this process until you have added all your Dispatch Offices.

Dispatch Office Update/Delete

Use the following steps to update or delete offices that are already set up in the program.

Click the “**Dispatch Office Update/Delete**” link located on the “Table Maintenance” menu screen.

This will take you to the “Dispatch Office Selection List” menu screen, shown below.

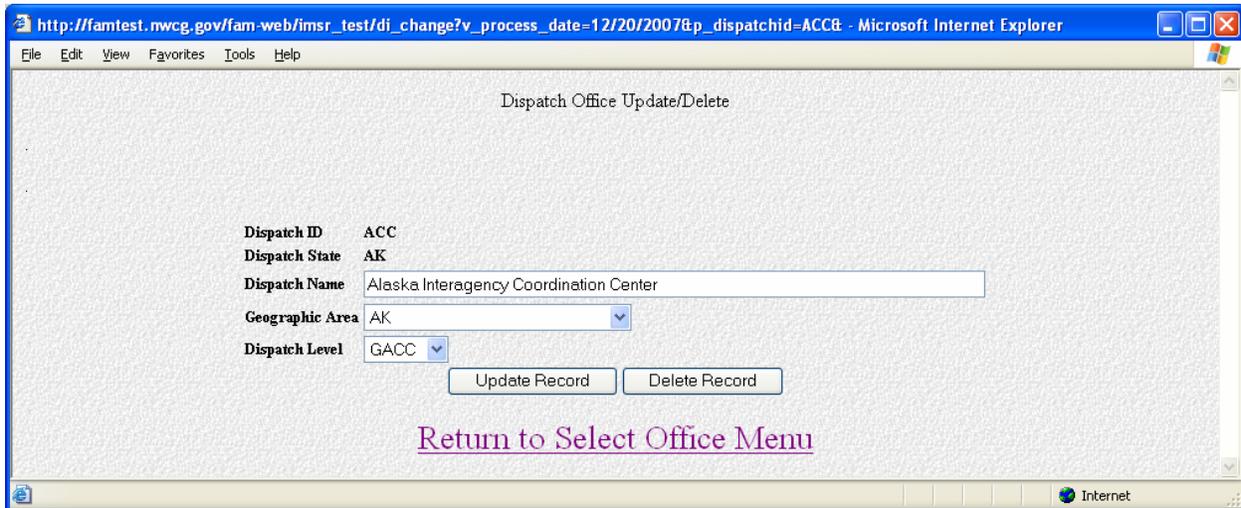

From the list of Dispatch Offices, **click the name of the Dispatch Office you want to update or delete.**

- The “**Return to Table Maintenance Menu**” will take you back to the main menu screen.

This will take you to the “**Dispatch Office Update/Delete**” screen, shown below.

The screenshot shows a web browser window with the URL http://famtest.mwgc.gov/fam-web/imsr_test/di_change?v_process_date=12/20/2007&p_dispatchid=ACC&. The page title is "Dispatch Office Update/Delete". The form contains the following fields:

- Dispatch ID: ACC
- Dispatch State: AK
- Dispatch Name: Alaska Interagency Coordination Center
- Geographic Area: AK
- Dispatch Level: GACC

At the bottom of the form are two buttons: "Update Record" and "Delete Record". Below the buttons is a link: [Return to Select Office Menu](#).

- The “**Return to Select Office Menu**” link at the bottom of the screen will return you to the “Dispatch Office Selection List” menu screen.

To update the record, make the necessary changes then click the “**Update Record**” button.

To delete the record, click the “**Delete Record**” button.

Unit Add

In order to report activity or resources for a unit, the unit must first be set up in the program. Use the following steps to build the list of units within each Dispatch Office.

Click the “**Unit Add**” button located on the “Table Maintenance” menu screen.

This will take you to the “Unit Entry” screen, shown on the next page.

- The “**Return to Table Maintenance Menu**” link at the bottom will return you to the “Table Maintenance” menu screen.

Unit Entry

Dispatch ID CA - BDU - San Bernardino Unit ECC - San Bernardino

Unit ID

Unit State

Unit Name

Agency Animal/Plant Health Insp. Serv

Daily Stats? (Yes/No) Yes

Add Record

[Return to Table Maintenance Menu](#)

Dispatch ID

From the pull down list, choose the name of the Dispatch Office to which this unit or resource belongs.

Unit ID

Enter the unit identifier (e.g., BEU, FKU, KNP).

- The unit IDs are listed in the Unit Identifiers booklet (PMS 931). **Do not make them up.**

Unit State

From the pull down list, choose the state for the unit.

Unit Name

Enter the full name of the unit. Acronyms can be used for “National Forest”, “National Park”, “Field/District Office”, etc. Proper acronyms would be: DO or FO (BLM), NF, NP, etc.

- **Examples are:** San Bernardino NF, Elko FO, Joshua Tree NP, and Kern NWR.

Agency

Choose the unit’s agency from the pull down list.

Daily Stats

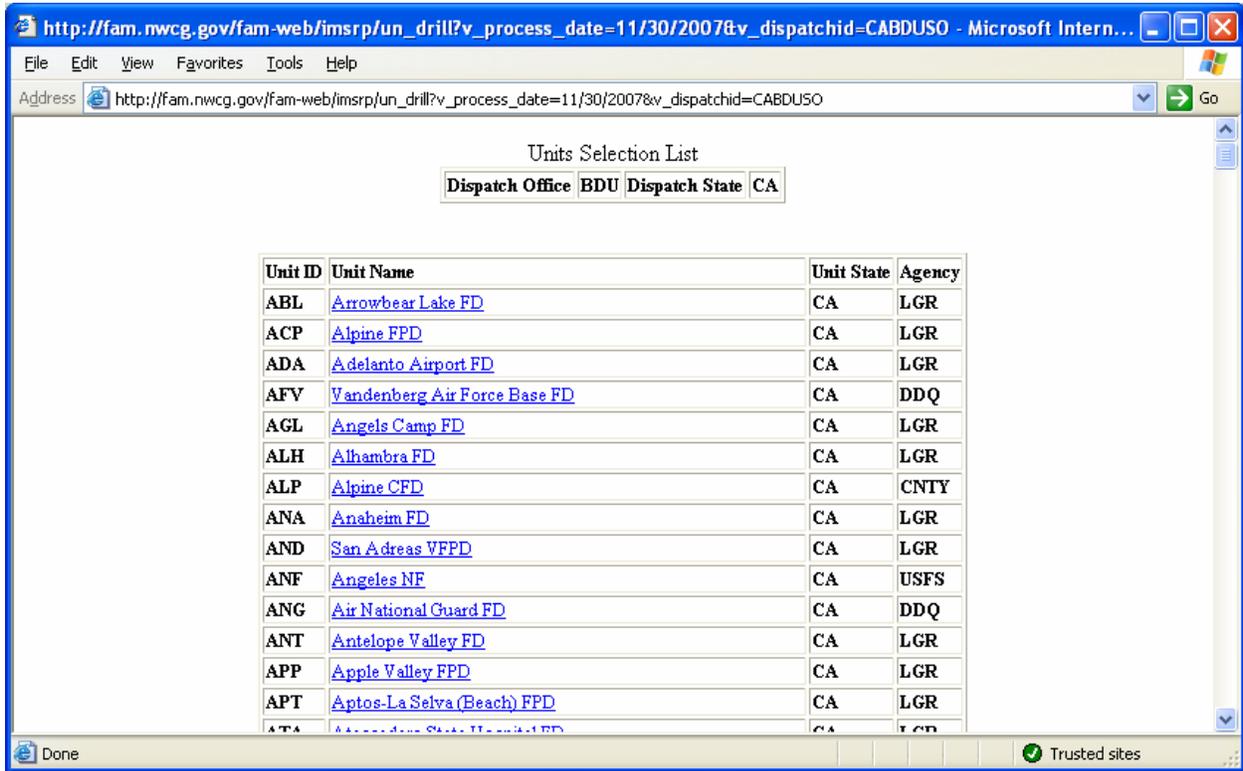

Choose “yes” or “no” to indicate whether or not you want to enter daily statistics for the unit.

Click the “**Add Record**” button.

Unit Update/Delete

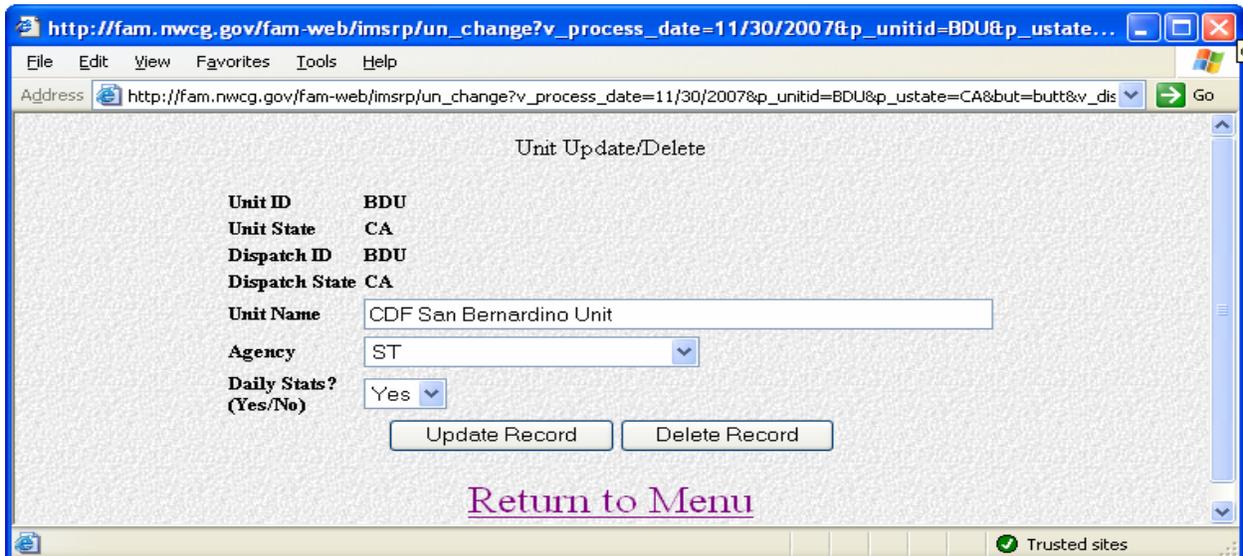

Click the “Unit Update/Delete” link on the “Table Maintenance” menu screen to update or delete units that are already set up in the program.

This will take you to the “Units Selection List” menu screen, shown below.

From the list of Units, **click on the name of the Unit you want to update or delete.**

This will take you to the “Unit Update/Delete” screen, shown below.

To update the record, make the necessary changes then click the “**Update Record**” button.

To delete the record, click the “**Delete Record**” button.

- The “**Return to Menu**” link will return you to the “Table Maintenance” menu screen.

Security Add

Click on the “**Security Add**” link located on the “Table Maintenance” menu screen to give Dispatch Offices and other users access (KCLIDs).

The “**Security Entry**” screen is shown below.

The screenshot shows a web browser window titled "Security Entry" with the following form fields:

- Dispatch ID:** CA - AEU - Amador-Eldorado Unit ECC - Camino
- KCLID:** (empty text box)
- Application:** 209
- Agency:** (empty dropdown menu)
- Scope:** Local
- Authority:** PIO

Below the form is an "Add Record" button and a purple link labeled "Return to Menu".

Dispatch ID

Choose the dispatch office from the pull down list.

KCLID

Enter the KCLID for that office (e.g., fs9999).

Application

Choose which application, “**SIT**” or “**209**”, you want to add that Dispatch Office/user.

Agency

Choose the agency from the pull down list.

Scope

Choose “**Local**” from the pull down list for your Dispatch Offices. Choose “**GACC**” if you're adding access to your GACC.

Authority

Use the pull down list to choose the level of access you want the KCLID to have.

- **“Report”** authority only allows the user (KCLID) to run reports.
- **“Entry”** authority gives the user data entry access.
- **“Manager”** authority allows that KCLID to add and update/delete levels of security/access, as well as dispatch offices and units.

➤ **NOTE: You must give Manager authority to at least one KCLID for each Dispatch Office.**

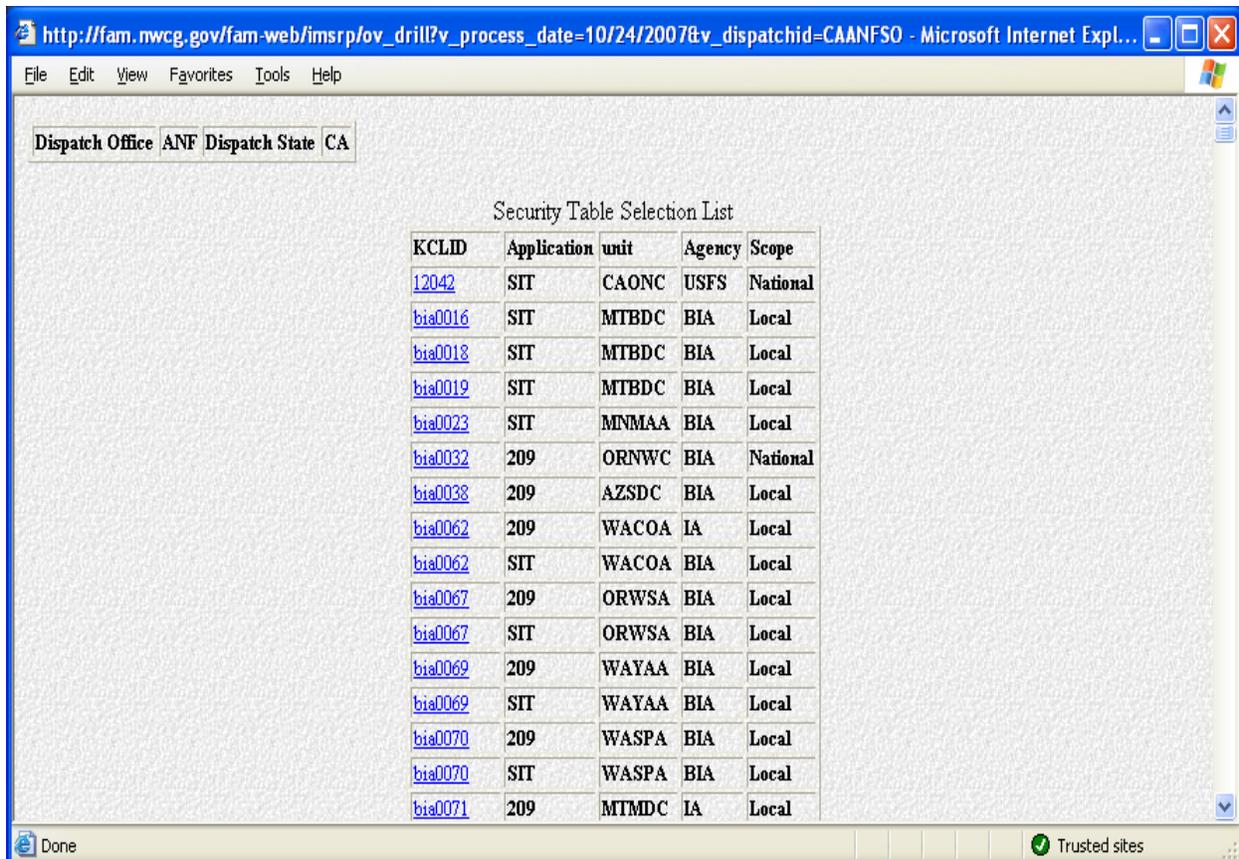

Click the **“Add Record”** button.

GACC Intelligence Coordinators/Officers manage user access for their area via the “Security Add” and “Security Update/Delete” screens. This allows them to set the level of access/authority for each office or unit. Each GACC has setup all of the Dispatch Offices within its area and identified a security manager at each dispatch center. The security managers at the Dispatch Offices can add, update or delete access for their users as needed.

Security Update/Delete

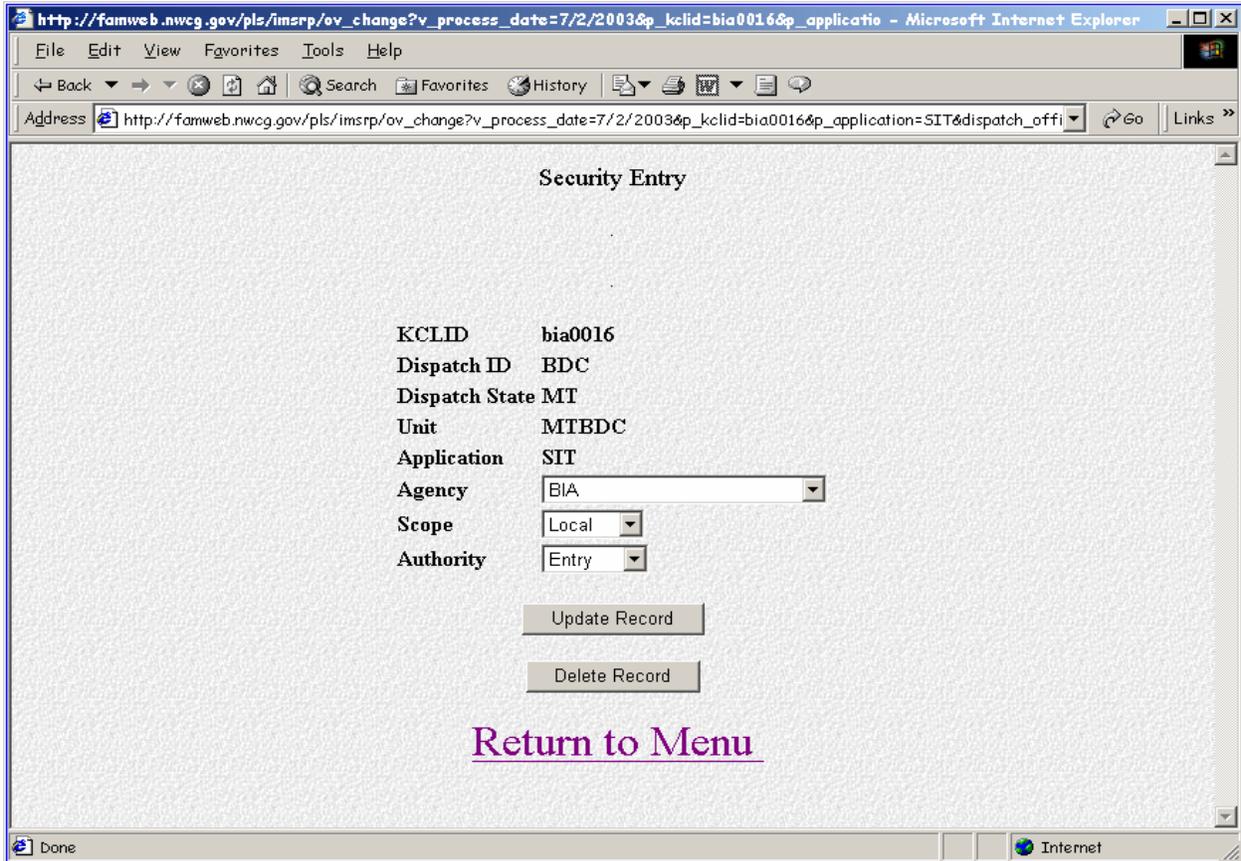

Click the **“Security Update/Delete”** link located on the “Table Maintenance” menu screen to change or delete a user’s access (KCLID).

This link will take you to the “Security Table Selection List” screen, shown below.

From the “Security Table Selection List” screen, click the **KCLID** name you want to update or delete.

- **Example:** bia0016 shown below was the KCLID selected.

The screenshot shows a Microsoft Internet Explorer browser window displaying a web page titled "Security Entry". The browser's address bar shows the URL: `http://famweb.nwcg.gov/pls/imsrp/ov_change?v_process_date=7/2/2003&p_kclid=bia0016&p_application=SIT&dispatch_offi`. The page content includes the following fields:

KCLID	bia0016
Dispatch ID	BDC
Dispatch State	MT
Unit	MTBDC
Application	SIT
Agency	BIA
Scope	Local
Authority	Entry

Below the form are two buttons: "Update Record" and "Delete Record". At the bottom of the page, there is a link labeled "Return to Menu".

To update the record, make the necessary changes then click the “Update Record” button.

To delete the record, click the “Delete Record” button.

APPENDIX

This page intentionally left blank

OFFICIAL ICS-209 FORM

Incident Status Summary (ICS-209)

1: Date	2: Time	3: Initial	Update	Final	4: Incident Number	5: Incident Name

Incident Status Summary (ICS-209) General Instructions (Version 02/01/08)

The Incident Status Summary should be completed according to the geographic area's mobilization guide. Accurate and timely completion of the Incident Status Summary is necessary to determine appropriate resource allocation during multiple incident occurrences. The information included on the form often determines the priority of a given incident, and thus its share of the resources available. In order to ensure that the information is as complete as possible, please follow the guidelines below when completing or reviewing the specific items on the form prior to transmittal. For examples and additional information, refer to the ICS-209 Program User's Guide.

Block Heading	Instructions
1. Date	Enter the date of this report in mm/dd/yyyy format, (e.g., 02/01/08)
2. Time	Enter the time of this report in military time (e.g., 1700).
3. Initial/Update/Final	<p>There is only ONE initial and ONE final report. Any other report is an update. The final report is the one on which the incident is declared controlled, joins a complex, or on which significant numbers of resources are no longer assigned.</p> <p>Note: Marking a 209 "final" deletes it from the active incident list for local unit, GACC and national screens in FAMWEB.</p>
4. Incident Number	Enter the unique incident number that has been assigned by the jurisdictional agency. This should start with the 2-letter state identifier, followed by the unit or agency identifier of the unit where the incident is occurring, and the fire or incident number. This is usually the incident project order number in block 3 of the Resource Order (e.g., AK-FAS-006, ID-BOF-P15562, UT-MLF1-035, CO-CRD-R236).
5. Incident Name	Enter the incident name, such as "Point," "Devil's Complex," "Clamulch Complex – Zone 2," "Angel Rocks Incident," or "END – South Coast". Once the incident name has been assigned, it should not be changed if at all possible. However, if a name change does occur, make a note of it in the Remarks section (block 42) of the report for operational period when the name change occurs. If the report is for a complex, put the name of the complex in this block and list the individual fires and acreages in the Remarks section (block 42) . When two or more separate incidents are combined into a complex, a final 209 report should be completed for each of the initial incidents except the one under which the complex will remain, noting the move to the complex on each separate final report. The 209 used to continue the complex should list the new incidents included within it in the Remarks section (block 42) .
6. Incident Kind/Strategy	Enter the incident or event kind from the pull down menu (e.g., wildfire, earthquake, etc.). Enter the suppression strategy (e.g., full suppression, point/zone protection) Refer to Attachment #1 for a list of incident and event kinds to enter in this block. For all wildfires a strategy type must be identified in the pull down menu.
7. Start Date/Time	Enter the date in mm/dd/yyyy format, e.g., 02/01/08 and military time (e.g., 0700) at which the incident began.
8. Cause	For Wildland fire incidents , use the pull down menu for the general cause (e.g., human, lightning, or under investigation).
9. Incident Commander	Enter both the first and last name of the Incident Commander. If the incident is under Unified Command, list all IC's by last name. (e.g., Wilcock, Conrad)

10. IMT Type	This block defaults to a blank. Select the appropriate type of Incident Management Organization assigned from the drop-down menu, if applicable. This block should be left blank unless a recognized Incident Management Organization is assigned.
11. State-Unit	Enter the 2-letter identifier for the state, followed by the unit identifier of the agency unit or municipality that has administrative jurisdiction over the land on which the incident is located, such as a city, county, State, BLM District, National Park, National Forest, etc. (e.g., MT-LNF, NV-NAFQ).
12. County	Enter the county in which the incident originated. If other counties are involved, enter them in the Remarks section (block 42) .
13. Latitude and Longitude	Required. Enter the latitude and longitude in degrees, minutes and seconds derived from the point of origin of the incident (e.g., Latitude: 35 degrees, 45 minutes, 01 seconds; Longitude: 111 degrees, 37 minutes, 10 seconds). "Ownership at Origin" identifies the ownership of the land the fire started on. For example, PRI for Private, BLM for Bureau of Land Management; this entry may include the unit identifier from Block 11 if both are the same.
14. Short Location Description	Give a general location (compass direction and number of miles) in reference to the nearest town or landmark. A legal location may also be included, such as Township, Range, Section, and Base Meridian. (e.g., 15 mi SW of Anchorage)
15. Size/Area Involved	For Wildland fire incidents, enter the acreage. If more than one land ownership is involved, click on "Enter Size/Area/By Unit and select the Land management units and enter acreage for each jurisdiction involved. This information will carry over to Block 42, Remarks. For Complexes, enter the total acreage in this block, and list each incident with acreage in Block 42, Remarks. For other incident kinds, enter the appropriate descriptive size. Additional information can also be entered in Block 42, Remarks. The total acreage will be automatically calculated at the end of the page. When finished, hit the submit button and this will return you to the 209 with the total acreage filled in.
16. % Contained or MMA	For wildfire incidents, enter the percent (e.g., 50) of the incident that is contained. For Wildland fire use incidents at Stage 3 enter the Maximum Manageable Area (MMA) as an acreage value. For non-fire incidents, leave blank unless appropriate. This is a number entry block only; do not enter the symbols or alpha characters. This block will be cleared out each day.
17. Expected Containment	For fire incidents, enter the date and military time in mm/dd/yyyy and military time format, e.g., Date: 08/17/2008 Time: 1500 at which full containment is expected.
18. Line to Build	For Wildland fire incidents , enter the number of chains, feet, meters, or miles of line still to be completed. For other incident kinds , such as hazardous materials or flood incidents, other measurements such as square miles may be appropriate and should be noted in Block 42, Remarks. This block will be cleared out each day.
19. Costs to Date	Enter the total incident costs to date in a whole dollar amount (e.g., 250000). This is a number only block; if symbols or alpha characters are entered the program will automatically clear them out of the entry screen, and will add them to the completed 209 and subsequent reports. If costs decrease, explain in Block 42, Remarks. This block will be cleared each day.

20. Declared Controlled	Enter the date and military time in mm/dd/yyyy and military time format at which the incident was declared controlled. This block is for current information and is not to be used as an outlook of when the incident is expected to be controlled. Once this block has been filled, the report is considered to be final. Remember to check the "final" button in Block 3.
21. Injuries this Reporting period	Report only serious injuries for this reporting period . Serious injuries are those in which the person injured is unable to continue to perform in their incident assignment. Explain or describe the nature of these injuries in the Remarks section (block 42)
22. Injuries to Date	Enter the total number of serious injuries for the duration of the incident. This is a cumulative total number that must be manually entered; the program does not do it automatically.
23. Fatalities	Enter the cumulative total of fatalities for the duration of the incident. Verify and clear any fatality information with the Incident Commander or Agency Administrator prior to submission. Only enter the # of personnel assigned to the incident.
24. Structure Information	Structure information is accounted for according to structure type. Types include: Residence, Commercial Property, and Outbuilding/Other. <u>Number Threatened:</u> Enter the number of structures threatened by type during this reporting period . <u>Number Damaged:</u> Enter the number of structures damaged by type for the duration of the incident . <u>Number Destroyed:</u> Enter number of structures destroyed by type for the duration of the incident . If necessary, detail additional structure information, such as structure type breakdowns, in the Remarks section (block 42) . Describe potential structure threats in the Projected incident movement section (block 26) . Describe structure threats in Block 27, Values at risk. The program will automatically tally the number of damaged and destroyed structures. If the number of structures damaged or destroyed goes down from one day to the next, the program will prompt with a message requiring the user to verify the drop in number.
25. Threat to Human Life/Safety	Check any or all boxes that are relevant for this reporting period. Due to the sensitivity of the information be accurate in your assessment. Provide explanation of these events in Blocks 27, 29, 33, or 42 as they apply.
26. Projected Incident movement/spread	Provide an estimate of the direction in which the incident is expected to spread, migrate, or expand in 12-, 48-, and 72- hour timeframes. Include an estimate of the acreage or area that will likely be affected.
27. Values at Risk:	Include communities/critical infrastructure natural and cultural resources threatened in terms of 12-, 24-, 48-, and 72-hour time frames. For example, a ranch house, barns and other outbuildings, located in Division C have the probability of being burned over in about 12 hours, a community of 300 homes and businesses northeast of the fire could be impacted by the fire-front in 48 hours, and the fire will directly threaten a water storage area in 72 hours. An example of a non-wildfire incident would be when flood waters are rising and a mobile home park will be inundated in 48 hours. Summarize significant threats to valuable resources. Such resources could include timber, wildlife, habitat, watershed, agricultural areas, endangered species, or infrastructure.

28. Critical Resource Needs	Amount, type, kind and number of operational periods in priority order in 12, 24, 48 and 72 hour time frames. List the specific types and numbers of critical resources needed, in order of priority. For example, 1) 10 strike teams of Type III Engines, 2) 3 strike teams of Type I Crews, 3) 4 Fireline EMT's. Be specific as to the need. Relate additional documentation in Blocks 26, 29, 33, 38, 40 and 42, as they apply, to support and justify the need for these resources. This block will be cleared each day.
29. Major problems and concerns	Describe safety concerns and control problems such as heavy fuels, steep terrain, difficult access, adverse weather conditions, and erratic or extreme fire behavior. Include social/political/economic concerns or impacts, and relate critical resource needs to plan actions in the Incident Action Plan. S
30. Observed Weather for current operational period.	For fire incidents , enter readings for wind direction, peak gusts, maximum temperature, and minimal relative humidity for that operational period. (worst case scenario) For non-fire incidents , complete only if relevant. For any incidents in which additional weather conditions are a factor, use the Remarks section (block 42) to describe specifics.
31. Fuels/Materials Involved	For Wildland fire incidents , enter the appropriate "primary fuel" involved in the predominant fuel type section of this block from the thirteen Fire Behavior Fuel Models in the pull down menu. Additional fuel information can be entered into the text block for any incident or event kind. For example, a structure fire may involve common combustible building materials. A hazardous materials incident might involve 120 gallons of diesel fuel. Additional information pertinent to fuels/materials involved can be entered in the text block as well, including additional detail on the types of fuels involved. Fire example, while the primary fuel for a wildfire may be light logging slash, a number of other fuel types may be involved, including grass and chaparral.
32. Today's Observed Fire Behavior	For Wildland fire incidents, describe the fire behavior observed for this reporting period in general terms. Leave this block blank for other kinds of incidents. This block will be cleared each day.
33. Significant Events Today	Describe significant events that occurred during the current reporting period. Include road closures, evacuations, progress made, accomplishments, team transition, re-occupation of formerly evacuated areas including where this occurred in relation to the incident. Specify information such as road numbers and duration of closures, how many people or homes are impacted by evacuations. A maximum of 2000 characters is allowed. This block will be cleared each day.
34. Forecasted weather for next operational period.	For all wildfire incidents, describe the forecasted weather for the next operational period. Enter readings for the maximum expected Wind Speed (mph), temperature, wind direction: and minimum relative humidity: For any incidents in which additional weather conditions are a factor, use the remarks section (block 42) to describe any specifics.
35. Estimated Control Date and Time	For fire incidents , give the date and time in mm/dd/yyyy and military time format, e.g., Date: 06/14/2008 Time: 1800 at which control is expected. For non-fire incidents , enter the date and time at which significant incident support will be discontinued.
36. Projected Final Size	Enter an estimate of the total area likely to be involved or affected over the course of the incident. Use acres, hectares, square miles, etc., as appropriate.
37. Estimated Final Cost	Enter an estimate of the total costs for the incident once all finance costs have been processed for each operational period. (e.g., \$250000).

38. Actions planned for next operational period	Provide a short summary of actions planned for the next operational period. For example, team transitions, line construction operations, structure protection, etc. Describe the actions and activities being carried out by the responders.
39. For fire incidents describe resistance to control.	For fire incidents, describe the fire's resistance to control in terms of growth potential and difficulty of terrain. Choose from low, medium, high or extreme.
40. How likely is it...	Give a short assessment of the likelihood of meeting the containment/control targets, given the current resources and management strategy. If containment is unlikely, explain why and/or adjust the containment/control targets accordingly in blocks 17 and 33.
43. Projected demob start date.	Enter the date and time at which significant demobilization is expected to begin in mm/dd/yyyy and military time format, e.g., Date: 06/14/2008 Time: 1800. Specific demobilization information can be included in the Remarks section (block 42) if desired.
42. Remarks	This block is used to expand on information that has been entered in previous blocks, or to include other pertinent information not previously addressed. For a Complex list all fires and their acreages included in the incident. Other information to include in this block would be: Incident Command Team transitions or transfer of command back to the local unit; reasons for acreage or cost reduction; serious injuries that have occurred; or more detailed weather descriptions affecting the incident. Please include incident Web Site address and Information Officer phone number(s) if available, or other relevant information for fire managers or mobilization efforts.
43. Committed Resources	This section is intended to track federal, state, local, military, and other general ownership of resources. Enter the number of resources committed by type and by agency or layer of government under the appropriate column for Single Resource (SR) or Strike Team (ST). Refer to Attachment #4 for choices of agency/government layer. State departments of forestry, natural resources, etc., that have direct suppression /mitigation responsibility should be entered under ST. Multiple county resources should be grouped under "County," (CNTY) and city, district, rural or volunteer assisting agencies should be grouped under "Local Government Resources" (LGR). Resources that came from state emergency management offices should be listed under OES. Any resources that do not fit into the specific agency/layer of government categories should be listed under "Other" (OT). Be sure to total the number of personnel by agency/layer of government and carry that over to the "Total Personnel" column at the right of the block. There are specific resource lists for hazardous materials, structure fire, multi-casualty, earthquake, search and rescue, and urban search and rescue incidents found on Attachments #6 through #11. Choose the appropriate "Resources Committed" sheet for the kind of incident, and complete it as described above. Each of these non-wildfire incident resource sheets contains a resource accountability block and a legend describing applicable mnemonics and their definitions. Attachments #4 and #5 are "Resources Committed" sheets for use by California and the Southern/Eastern Areas to account for specific supplemental resources utilized within those Geographic Areas.
44. Cooperating and Assisting Agencies Not Listed Above	Utilize this block to identify specific assisting or cooperating agencies providing support to the incident. These may include the Red Cross, Salvation Army, County Sheriff, Homeland Security, etc. Do not repeat the same agencies/layer of government entries already listed in the Committed Resources section (block 43).

45. Prepared By...	On a large incident, this would normally be the Situation Unit Leader or Planning Section Chief at the incident. On other incidents, it could be a dispatcher in the local communications center, or another staff person or manager.
46. Approved By...	On a large incident, this would normally be the Planning Section Chief or Incident Commander at the incident. On other incidents, it could be the local Dispatch Center Manager, Fire Management Officer, or Agency Administrator.
47. Sent to...	Enter the appropriate dispatch center, Geographic Area Coordination Center, Emergency Operations Center, etc.

Attachment #1, Incident Status Summary (ICS-209) General Instructions

Block 6. Incident Kind

- Wildfire
- Wildland Fire Used for Resource Benefit
- Prescribed Fire
- Burned Area Emergency Rehabilitation
- Earthquake
- Flood
- Hazardous Materials
- Hurricane
- Law Enforcement
- Mass Casualty
- Oil Spill
- Other
- Search and Rescue
- Structure Fire
- Tornado
- Urban Search and Rescue

Suppression Strategy

- ** Suppression Option WF Only**
- Full Suppression – Perimeter Control
- Point/Zone Protection – Limited perimeter control
- Point/Zone protection – limited perimeter control
- Confine/Contain - Monitor

Attachment #2, Incident Status Summary (ICS-209) General Instructions (Version 02/01/08)**Block 31. Fuels/Material Involved**

The Primary Fire Behavior Fuel Models include:

Fuel Model	Typical Fuel Complex
Grass and Grass Dominated	
1	Short Grass (1 Foot)
2	Timber (Grass and Understory)
3	Tall Grass (2.5 Feet)
Chaparral and Shrub Fields	
4	Chaparral (6 Feet)
5	Brush (2 Feet)
6	Dormant Brush, Hardwood Slash
7	Southern Rough
Timber Litter	
8	Closed Timber Litter
9	Hardwood Litter
10	Timber (Litter and Understory)
Slash	
11	Light Logging Slash
12	Medium Logging Slash
13	Heavy Logging Slash

• **Example:** Wildfire

1: Date 09/08/2008	2: Time 1800	3: Initial Update Final XX 	4: Incident Number CA-PNF-000671	5: Incident Name MOONLIGHT		
6: Incident Kind Wildland Fire (Full Suppression - Perimeter Control)	7: Start Date Time 09/03/2008 1425	8: Cause Under Investigation	9: Incident Commander Molumby/Waterman	10: Incident Command Organization Unified Command	11: State- Unit CA-PNF	
12: County Plumas	13: Latitude and Longitude Lat: 40° 12' 55" Long: 120° 51' 7" Ownership: CA-PNF	14: Short Location Description (in reference to nearest town): 6 mi. NE of Greenville				
15: Size/Area Involved 50,582 ACRES	16: % Contained or MMA 16 Percent	17: Expected Containment Date: 09/30/2008	18: Line to Build 32 Miles	19: Estimated Costs to Date \$7,700,000	20: Declared Controlled Date: Time:	
21: Injuries this Reporting Period:	22: Injuries to Date:	23: Fatalities	24: Structure Information			
4	9	0	Type of Structure	# Threatened	# Damaged	# Destroyed
25: Threat to Human Life/Safety: Evacuation(s) in progress ---- XX No evacuation(s) imminent -- Potential future threat ----- No likely threat -----			Residence	500		1
			Commercial Property			1
			Outbuilding/Other	100	1	1
26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames: 12 hours: Down canyon winds are predicted to spread the fire commensurate with the alignment of the canyons. Generally to the East. 24 hours: Northeast wind is forecasted with anticipated spread to the Southwest. 48 hours: A stronger Northeast influence and lower humidity is expected which could cause a significant spread to the Southwest. 72 hours: A Northeast influence and lower humidity is expected to continue, which could cause a significant spread to the Southwest.						
27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames: 12 hours: (North/East Spread) Historic Red Rock fire lookout, Brown's Cabin, Wilcox Valley, Antelope Lake campgrounds, and Boulder Creek Work Center. 24 hours: (South/West Spread) Communities of North Arm, Greenville Rancheria, Moonlight Valley. 48 hours: (South/West Spread) Communities of Genesee Valley, Williams Valley, Greenville, and Taylorsville. 72 hours: (North/East Spread) Communities of Janesville, Gold Run, and Susanville.						
28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames): 12 hours: Type I Crews - 10, DIVS - 10, DOZB - 10, Air Tankers - 5 24 hours: Type I Crews - 6, DIVS - 6, DOZB - 5, Air Tankers - 3 48 hours: Type I Crews - 3, DIVS - 3, DOZB - 2, Air Tankers - 2 72 hours: Type I Crews - 1, DIVS - 3, Air Tankers - 1						

29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.)
 Relate critical resources needs identified above to the Incident Action Plan.

Steep, rocky terrain, heavy fuel loading, long range spotting, erratic high winds, extremely low live and dead fuel moisture levels all are contributing to extreme fire behavior. An East wind event is predicted for Sunday. Open abandoned mine shafts, and associated hazardous materials, are a safety concern that is constantly being addressed.

30: Observed Weather for Current Operational Period
 Peak Gusts (mph): **5 G-15** Max. Temperature: **81**
 Wind Direction: **SW** Min. Relative Humidity: **15**

31: Fuels/Materials Involved: **10 Timber (litter and understory) Heavy timber and slash.**

32: Today's observed fire behavior (leave blank for non-fire events):
Branch I and IV - Active backing fire with short range spotting. Branch IV had an interior island display intense burning. Branch II - Isolated crown runs with mid range spotting. Branch III - Crown runs to the North/East with mid range spotting.

33: Significant events today (closures, evacuations, significant progress made, etc.):
Evacuation orders remain in effect in the North Arm of the Indian Valley and for small, isolated parcels to the East, including Taylor Lake, Wilcox Valley, and Franks Valley. Precautionary alerts have been delivered to residents of Taylorsville and Genesee Valley, and North Valley Road to Pecks Valley in Greenville. A Forest closure is in place to ensure safety in the vicinity of the fire. All major highways remain open, however most Forest roads are closed to access.

34: Forecasted Weather for next Operational Period
 Wind Speed (mph): **4** Temperature: **68**
 Wind Direction: **SW** Relative Humidity: **19**

35: Estimated Control Date and Time: **10/17/2008 2000**

36: Projected Final Size: **98,000**

37: Estimated Final Cost: **\$14,500,000**

38: Actions planned for next operational period:
Branch I and II - Continue to hold and mop up 100 feet from control lines. Branch III - Construct direct & indirect line and improve and hold established line. Provide for structure protection. Branch IV - Construct direct & indirect line and improve and hold established line. Provide structure protection in the Diamond Mountain, North Arm, Indian Valley, and Wilcox areas. Contingency Branch will be constructing and pre-planning future lines. Contingency Branch - Continue construction of fuel breaks in conjunction with resource advisors.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **Extreme**
2. Difficulty of Terrain - **Extreme**

40: Given the current constraints, when will the chosen management strategy succeed?
Indirect and direct attack is succeeding, but extreme fire behavior and changing weather patterns may prevent establishing a firm containment date.

41: Projected demobilization start date: **10/01/2008 0700**

42: Remarks: **Heavy smoke conditions precluded the use of Air Tankers today. There were four minor injuries today that met reportable criteria. Dozer Bosses are needed for contingency efforts and direct/indirect attack. Air tankers are critical to slow the advancing fire. With active fire behavior throughout the night time hours, air tankers are critical during the morning. Type 1 crews and Division Supervisors are critical for holding of established line, construction of direct line and burnout operations. The fire was very active in the Diamond Mountain area and pushing Northeast to the Red Rock Lookout.**

			Commercial Property			
			Outbuilding/Other			
26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames: 12 hours: 5-10 acres per day until significant rain event. 24 hours: see above 48 hours: see above 72 hours: see above						
27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames: 12 hours: 24 hours: 48 hours: 72 hours:						
28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames): 12 hours: 24 hours: 48 hours: 72 hours:						
29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan. None at this time.						

30: Observed Weather for Current Operational Period Peak Gusts (mph): 0-2 Max. Temperature: 43 Wind Direction: SW Min. Relative Humidity: 75	31: Fuels/Materials Involved: 10 Timber (litter and understory) Fire is burning between 6000 and 7400 feet in elevation in ponderosa pine & mixed conifer species that has burned once recently in 1986.
--	---

32: Today's observed fire behavior (leave blank for non-fire events):
Low to moderate fire behavior - creeping and smoldering in ponderosa pine/ white fir mixed conifer vegetation. Rates of spread are less than 1 chain per hour.

33: Significant events today (closures, evacuations, significant progress made, etc.):
Trail closed between Tamarack Flat Campground and the top of El Capitan along the Yosemite north valley rim trail. Rehabilitation started along south headline.

34: Forecasted Weather for next Operational Period Wind Speed (mph): Temperature: Wind Direction: Relative Humidity:	35: Estimated Control Date and Time: 12/11/2007 1800	36: Projected Final Size: 1000	37: Estimated Final Cost: \$160,000
--	--	--	---

38: Actions planned for next operational period:
Continue to hold along south (fire suppression/fire use zone boundary), conduct fireline rehab.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **Medium**
2. Difficulty of Terrain - **Medium**

40: Given the current constraints, when will the chosen management strategy succeed?
currently succeeding

41: Projected demobilization start date: **11/19/2007 0000**

42: Remarks:
Scaling down on resources until fire behavior and activity increase.

27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames: 12 hours: 24 hours: 48 hours: 72 hours:					
28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames): 12 hours: 3 ICS T2 Dozers (2 operational periods) 24 hours: 48 hours: 72 hours:					
29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan. Numerous residences damaged and destroyed. Rescue efforts will require earth-moving equipment. Interstate 15 through the Cajon Pass will be shut down for several days in order to conduct structural inspection of roadway.					

30: Observed Weather for Current Operational Period Peak Gusts (mph): 5 Max. Temperature: 51 Wind Direction: SW Min. Relative Humidity: 32	31: Fuels/Materials Involved:
--	-------------------------------

32: Today's observed fire behavior (leave blank for non-fire events):

33: Significant events today (closures, evacuations, significant progress made, etc.):
Walker's Type 2 Incident Management Team mobilized. Communities of Devore and Keenbrook under mandatory evacuation. I-15 and Old Cajon Road closed.

34: Forecasted Weather for next Operational Period Wind Speed (mph): 5-7 Temperature: 69 Wind Direction: SW Relative Humidity: 25	35: Estimated Control Date and Time:	36: Projected Final Size:	37: Estimated Final Cost: \$1,000,000
---	--------------------------------------	---------------------------	---

38: Actions planned for next operational period:
Search for trapped individuals to continue through the night. An evacuation center will be set up at the Orange Show grounds in San Bernardino.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential -
2. Difficulty of Terrain -

40: Given the current constraints, when will the chosen management strategy succeed?

41: Projected demobilization start date: **12/05/2007 1800**

42: Remarks:
Due to extent of damage and destruction, rescue and or recovery operation may take up to a week at minimum.

43: Committed Resources (Earthquake Incident)

26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames: 12 hours: Multiple areas in both eastern and western portions of the county, incl: Thousand Palms, Lake Elsinore City, Glen Eden, El Cerrito, Menifee, Winchester, Glen Valley. 24 hours: Problems expected in other low-lying areas if rain continues. 48 hours: 72 hours:					
27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames: 12 hours: Communities and individual properties and major transportation arteries. Historical site in Lake Elsinore City. 24 hours: Continued risk as above if rains persist. 48 hours: 72 hours:					
28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames): 12 hours: 10 Type 2 handcrews, 10,000 40# sandbags. 24 hours: 5 Type 4 dozer, 15 front-end loaders, and 6 tractors. 48 hours: 72 hours:					

29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.)
 Relate critical resources needs identified above to the Incident Action Plan.
Widespread flooding of numerous communities in eastern and western parts of the county. Significant loss of life possible where civilians try to cross water courses. A large, historical cemetery in Lake Elsinore City immediately threatened. Over 400 elderly residents in Thousand Palms are in danger of being isolated from their homes. Heavy rain currently falling throughout the entire county.

30: Observed Weather for Current Operational Period Peak Gusts (mph): 20 Max. Temperature: 48 Wind Direction: S Min. Relative Humidity: 100	31: Fuels/Materials Involved:
---	-------------------------------

32: Today's observed fire behavior (leave blank for non-fire events):

33: Significant events today (closures, evacuations, significant progress made, etc.):
A 20-foot channel was dug to divert storm runoff just feet from graves at the historic Lake Elsinore cemetery, one building was destroyed. OES has tasked Cal Fire to assist Riverside County Fire with 1 dozer and 6 fire crews. Ivy Ranch Estates in Thousand Palms in jeopardy, and debris flow still threatens the Tri Palms Estates. The Ortega Highway, Pala Road, and many smaller arteries are closed. Over 5,000 sandbags used already.

34: Forecasted Weather for next Operational Period Wind Speed (mph): 10 Temperature: 41 Wind Direction: SW Relative Humidity: 100	35: Estimated Control Date and Time:	36: Projected Final Size:	37: Estimated Final Cost: \$300,000
---	--------------------------------------	---------------------------	---

38: Actions planned for next operational period:
Continue using crews to fill and place sandbags. Debris removal to begin as weather permits earthmoving equipment to operate safely. Swift water rescue team in place.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential -
2. Difficulty of Terrain -

40: Given the current constraints, when will the chosen management strategy succeed?
Though largely dependent on weather, operation should wrap up in a few days.

41: Projected demobilization start date:

42: Remarks:
Ribar's (Alaska BLM) federal Area Command Team is in place. OES mission numbers have been requested and Cal Fire and USFS resources have been tasked. Heavy commitment of local government resources, specifically road, utility, and public works departments.

32: Today's observed fire behavior (leave blank for non-fire events):

33: Significant events today (closures, evacuations, significant progress made, etc.):
Cleanup has begun using a surfactant and solvent mixture called a dispersant. Application was performed by privately-owned contractor using helicopter and bucket. Wave activity insufficient to mix the dispersant into the oil has ended this type of application. A trial burn was conducted, in a region isolated from the rest by a fire-resistant boom. Although partially successful, unfavorable weather has stopped further burning. Mechanical cleanup using booms and skimmers has also commenced but there is a shortage of this equipment.

34: Forecasted Weather for next Operational Period Wind Speed (mph): 7 Temperature: 20 Wind Direction: SW Relative Humidity: 85	35: Estimated Control Date and Time:	36: Projected Final Size:	37: Estimated Final Cost:
---	--------------------------------------	---------------------------	---------------------------

38: Actions planned for next operational period:
Continue skimming operations. Set up dead animal disposal process.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential -
2. Difficulty of Terrain -

40: Given the current constraints, when will the chosen management strategy succeed?
In the short term the extent of the spill should be contained in two weeks. Cleanup will much longer.

41: Projected demobilization start date:

42: Remarks:
10.8 million gallons of oil spilled due to the Chevron Sound tanker incident. Cleanup could take years, even decades. The tanker originally carried over 50 million gallons, but the remaining, unspilled oil, has been transferred to another tanker.

26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames: 12 hours: 24 hours: 48 hours: 72 hours:						
27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames: 12 hours: 8 County area: Structures at risk of collapse, ice and water damage. Transportation system closures due to blowing snow with risk to human life and safety. Ranching industry risk of livestock losses. Structures and infrastructure are at risk of collapse, ice or water damage. Feed and water shortages affecting health of livestock not already lost. Present estimated loss of livestock is 30-65 million dollars. 24 hours: 48 hours: 72 hours:						
28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames): 12 hours: 24 hours: 48 hours: 72 hours:						

29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.)
 Relate critical resources needs identified above to the Incident Action Plan.

Snow removal from remote roads servicing rural population. Safety of individuals traveling for necessary life support. Identifying human and livestock needs. Difficult transportation with blowing and drifting snow reclosing roads and making reopening difficult. CDPHE has identified a critical need to pro-actively address waste disposal issues for residential home waste, commercial food and trash wastes, and medical biohazard wastes.

30: Observed Weather for Current Operational Period
 Peak Gusts (mph): **10** Max.
 Temperature: **15**
 Wind Direction: **S** Min.
 Relative Humidity: **n/a**

31: Fuels/Materials Involved:

32: Today's observed fire behavior (leave blank for non-fire events):

33: Significant events today (closures, evacuations, significant progress made, etc.):

Total missions of all types are declining. Ground missions for human life safety continue. Snow removal for widening and reopening of county roads continues. Gusty winds continue to blow back into roads, closing many that were previously open. Ground delivery of feed to stranded livestock also continues.

34: Forecasted Weather for next Operational Period
 Wind Speed (mph): **5-15** Temperature: **32**
 Wind Direction: **NNW** Relative Humidity: **n/a**

35: Estimated Control Date and Time:

36: Projected Final Size:

37: Estimated Final Cost:
\$10,000,000

38: Actions planned for next operational period:

Type III team transitioning tomorrow. All ground operations are planned to continue. Continue to open transportation routes and improve those that are single lane. Livestock assistance to continue.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential -

2. Difficulty of Terrain -

40: Given the current constraints, when will the chosen management strategy succeed?

41: Projected demobilization start date: **12/07/2007 0800**

42: Remarks:

This disaster is affecting 76,000 people that live in the area, major commercial transportation routes, and untold thousands of travelers. Power has been returned to all. There will be an unknown financial loss due to building damages and destruction. The estimated livestock loss is presently between 30 and 65 million dollars. There are many federal, state, county, city, and private persons assisting. Colorado National Guard is demobing. The estimated cost to date is preliminary and likely to be under accounted, due to lack of and under reporting in some areas. Of the approximate 15,200 miles of county roads approximately 25% (3800 miles) are still not open and many are single lane and/or require 4 wheel drive. Although previously untouched roads are being opened, many roads are being reclosed by blowing and drifting snow, hence this report shows no change. Propane deliveries continue to be difficult due to lack of access.
