

## FACTS Basics

Tuition for students from non-sponsoring units: \$240

### Course Description:

This course will provide students with a basic to intermediate understanding of how to enter data into the Forest Service Activity Tracking System (FACTS). It will take students thru the creation of NEPA documents, initiatives and timber sales; the creation of KV and BD plans; the updating of planned activities to accomplished/completed activities; and the integration of spatial features displaying activity location(s). Students will receive instruction on data entry for Fire and Fuels, Silviculture, and Trust Funds; spatial data entry; and business rules for each program area affecting date entry. This is a hands-on class in which students will perform data entry and use basic GIS skills.

**Target Group:** Personnel with a role in FACTS data management.
