Total I.A. fires and acreage:	28 fires for 239 acres	& Active Acreage:	1,357,028 acres
New Fires on Federal Protected Lands in:	3 fires for 86 acres OK	New Fires on State Protected Lands in:	21 fires for 77 acres NC
Other I.A. reported through non-FAMWEB Channels:	4 fires for 76 acres in AR		
Prescribed Fire Activity:	State and/or Federal Lands – 242 prescribed fires for 4,643 acres in AL, FL, GA, NC, & OK		

Significant Activity

03/06/2024

New Large ICS-209 Incidents**/Critical Updates:

TX-TXS Smokehouse Creek – Approximately 1,059,570 acres with 44% containment. Fire behavior is moderate with creeping and smoldering. Weather forecast for the next couple days provides light winds, cool temperatures, and an increasing chance of precipitation that will provide low to moderate potential fire behavior. Residual pockets of heat are present across the fire area that may become active with wind influence. Continued flare-ups along the perimeter are possible as woody fuels continue to smolder and contact grass fuels. The Southern Area Blue Team (CIMT-2) is in command of the fire and is also managing the Windy Deuce and Grape Vine Creek fires.

Large/Significant Activity:

Definitions:

Full Suppression/Perimeter Control: Implies a strategy to "put the fire out" as efficiently and effectively as possible, while providing for firefighter and public safety.

(p) Point or Zone Protection/Limited Perimeter Control: Involves protecting specific points from the fire while not actively trying to line the entire fire edge.

(c) Monitor/Confine: Management actions conforming to a monitoring strategy that periodically checks the fire to ensure it continues to meet objectives, and where no further action is taken.

For specific information on fire activity (new wildland and prescribed fires by agency/unit, year-to-date totals, and large incident specifics), please refer to the Southern Area or [Detailed](#) Situation Reports.

**** For the purposes of this report "Large ICS-209 Incidents" are defined as fires that exceeds 100 acres or larger in timber and slash (fuel models 8-13), 300 acres or larger in grass and brush (fuel models 1-7), or when a Type 1 or 2 Incident Management Team (IMT) is assigned. Incidents with structures destroyed are also included, regardless of size.**

Resources

The number of resources currently committed is obtained from Interagency Resource Ordering Capability (IROC). There may be slight discrepancies in the total number of resources reported. The Overhead column only reflects overhead positions, not the total number of personnel assigned.
