

## Southern Area Developmental Dispatcher Details and Incident Assignments

Southern Area Coordination Center, Atlanta, Georgia  
Office: 678-320-3000 Fax: 678-320-3036

The Southern Area Coordination Center (SACC) has the need of temporary detailed employees to assist with the mission of SACC during elevated levels of incident activity. These assignments can be filled by either trainee and/or qualified dispatchers. Positions are available for Aircraft, Intelligence, and all levels of expanded dispatch. These details will provide individuals with the skills and knowledge of working in a Geographic Coordination Center supporting response efforts under the national dispatch system locally, regionally, or nationally depending on center location. The SA fire season begins as early as mid-February and runs through December. Western fire support generally is July-September. There are also times that hurricanes or other all-hazard incidents require elevated staffing levels at SACC.

If you are interested in a detail during the year, complete the following questionnaire and fax to your state center who will in turn fax to SACC. \*\*Your application must be signed by your State Center Manager prior to sending to SACC.

Please email the signed form to:

- Your own **Host Dispatch Center** (Signature required from here)
- SACC: gasac@firenet.gov

The Southern Area Coordination Center will utilize these forms to schedule staffing during expanded dispatch operations. Depending on the needs at the time, we may seek qualified or trainee resources. Priority will generally be given to agency employees from within the Southern Area.

The SACC ensures staffing that reflects the workforce of the Southern Area and includes interagency representation.

There may be times due to the priority of an incident the requested resource for SACC may be diverted to a state center with higher priority.
