- D-4 Winn R.D./Larry Kile, Zone FMO
- D-6 Caney R.D./Jeff Bass

2. LOCATION OF STANDBY CREWS – KISATCHIE NATIONAL FOREST

Forest Service standby crews will be assigned as needed according to fire danger and risk(s) levels. Normally, a core standby crew will be assigned when the preparedness level reaches 3+ at Ranger District Work Centers. This may not be the case, however, depending upon the overall situation and how much "calculated risk" the District Ranger wants to take.

The Forest Service maintains permanently assigned "fire crews". Most fire suppression will be provided by these crews. A 2-person tractor plow crew will normally make up the standby crew. More personnel/militia and equipment will be added as fire danger, risk(s), and/or occurrence increases.

3. FIRE EQUIPMENT AND ITS LOCATION – KISATCHIE NATIONAL FOREST

Ranger District	Equipment Location	Number and Description of Equipment
Catahoula	Catahoula Work Center (3 miles east of Bentley, LA @ the Stuart Seed Orchard)	2 - Type 5 Dozer/Plow 1 - Type 6 Engine
Calcasieu (Evangeline Unit)	Evangeline Work Center Highway 488 - 13 miles west of Alexandria	1 - Type 5 Dozer/Plow 1 - Type 6 Engine
Kisatchie	Kisatchie Work Center Highway 117 & FS Road 337	1 - Type 5 Dozer/Plow 1 - Type 6 Engine
Winn	Winn Work Center Highway 84 @ Gum Springs	2 - Type 5 Tractor/Plow 1 - Type 6 Engine
Calcasieu (Vernon Unit)	Fort Polk	2 - Type 5 Tractor/Plow 1 - Type 6 Engine
Caney	Caney Work Center Homer, LA

Aerial Detection

Minimum Fixed Wing Requirements Cessna 182 or equivalent

Radio with the Kisatchie Forest Net

RX 169.9250 Tone 110.9

TX 169.9250 Tone 110.9

Air-to-ground Tactical

RX 168.3500

TX 168.3500

Pilot Requirements Annual Training Program with approved Department Check Airman. Pilot should maintain FAA currency and also should remain proficient.

Detection

The LDAF Regional Forester (area supervisor) is responsible to assure that operations provide adequate detection of fires with a minimum risk factor district wide. When a fire is detected on National Forest land within that district, the Pilot will immediately notify Pineville Dispatch on Frequency (168.6500). The plane will remain in area, unless it is determined the plane is needed elsewhere by LDAF. The pilot will communicate with the Incident Commander on the Air-to-ground tactical channel. If the aircraft cannot remain in the area, the state will make every attempt to send another detection plane if available.

Documentation The State will include documentation of days and hours flown on detection flights by LDAF Districts.

Exhibit L
SOP Guidelines for Wildfire Suppression

MASTER COOPERATIVE WILDLAND FIRE MANAGEMENT AND STAFFORD ACT RESPONSE AGREEMENT

GUIDELINES for WILDFIRE SUPPRESSION
on U.S. FOREST SERVICE PROPERTY (Entire or Partial)
by
LDAF WILDLAND FIRE CREWS

10/02/2014

NOTE: As per the Cooperative Fire Protection Agreement and the Annual Action Plan, entered into between the Louisiana Department of Agriculture and Forestry (LDAF) and the U.S. Forest Service, Kistachie National Forest (USFS, KNF)...

"Each agency arriving at an unstaffed wildfire within the areas agreed to at the Annual Cooperative meeting between the USFS, KNF and the LDAF will take prompt suppression action regardless of land ownerships. The most qualified individual arriving first on the incident will act as the Incident Commander (IC) until relieved by an Incident Commander of the Jurisdictional Agency."

GUIDELINES

When an "Unstaffed" Wildfire is Detected on USFS property, LDAF shall...

- 1) Dispatch LDAF personnel and equipment immediately to scene of wildfire.
- 2) Notify the Pineville Dispatch (318-473-7152) or the Forest Service Dispatcher (318-613-7271) as to the fire's location, estimated size, resources threatened, etc.
- Ask the USFS representative "if they would like for LDAF to begin suppression operations or any other type of assistance requested." Record the Date, Time and To Whom this notification was provided, along with any type of assistance requested.
- 3) When USFS personnel arrive on scene, the LDAF IC may either establish a "united command" or transfer command to the USFS IC. IC's will formulate, establish and notify all personnel to the command structure, operational tactics and communication plan for the incident. Each agency will be responsible for their personnel and equipment.
- 4) LDAF personnel may continue to assist with the suppression operation until relieved or released by the USFS IC.
- 5) If LDAF personnel are the only "on-scene" resource, following containment LDAF personnel will notify the appropriate USFS Dispatch Center as to the fire's containment time, the demobing of LDAF personnel, etc.
- 6) GPS the entire fire and complete an LDAF Fire Report (see below). A copy of the Fire Report and GPS shapelite shall be provided to the appropriate USFS, KNF district, in a timely manner.

WORKSHEET FOR

FS Non-Cash Contribution Cost Analysis, Column (a)

Use this worksheet to perform the cost analysis that supports the lump sum figures provided in the matrix. NOTE: This worksheet auto populates the relevant and applicable matrix cells.

Cost element sections may be deleted or lines may be hidden, if not applicable. Line items may be added or deleted as needed. The Standard Calculation sections provide a standardized formula for determining a line item's cost, e.g. cost/day x # of days=total, where the total is calculated automatically. The Non-Standard Calculation sections provide a write-in area for line items that require a calculation formula that is other than the standardized formulas, e.g. instead of salaries being calculated by cost/day x # of days, costs may be calculated simply by a contracted value that is not dependent on days worked, such as 1 employee x \$1,200/contract= \$1,200. Be sure to review your calculations when entering in a Non-Standard Calculation, and provide a brief explanation of units used to make calculation, e.g. '1 month contract,' on a line below the figures.
