## Wildland Fire Risk and Complexity Assessment

### Part A: Firefighter Safety Assessment

Evaluate the following items, mitigate as necessary, and note any concerns, mitigations, or other information.

<b>Evaluate these Items</b>	<b>Concerns, Mitigations, notes</b>
LCES	
Fire Orders and Watch Out Situations	
Multiple operational periods have occurred without achieving initial objectives	
Incident personnel are overextended mentally and/or physically and are affected by cumulative fatigue	
Communication is ineffective with tactical resources and/or dispatch	
Operations are at the limit of span of control	
Aviation operations are complex and/or aviation oversight is lacking	
Logistical support for the incident is inadequate or difficult	
Additional Mitigations:	

Miscellaneous Information
