If you need a FireCode for an incident that is already in IRWIN, but cannot do it from WildCAD, please follow the steps below.

1. Login to FireCode and on the screen to create a new FireCode, click on the BLUE link below the “Create New FireCode” button.

2. Copy and paste the IrwinID from the incident in question and paste into the IRWIN ID box in FireCode. Click “Generate FireCode For IRWIN Incident”.

Note: If attempts to edit fields in FireCode are unsuccessful, edits may need to occur in WildCAD or 209, depending on the current ADS.

Example Scenario: If you do not have a CAD, and will need a FireCode for an Incident Complex parent record, follow the steps outlined above. The Incident Complex relationship must be created in 209.
