Significant Events: **Fire behavior activity has picked up because of wind speed. The increase in wind has caused more single tree torching with occasional group torching.**

Remarks: **Firing may be implemented by aerial resources to ensure the fire edge aligns appropriately to the slope once the wind conditions allow.**

Planned Actions: **Continued preparation and defense of structures and infrastructure along the indirect control lines. Utilize firing operations when and where necessary to maintain low intensity fire conditions and prevent unwanted impacts to the values at risk including structures, infrastructure, recreation, wildlife and range allotments.**
