Significant Events: Fire continues to smolder in stump holes and creep in interior pockets of unburned fuel.

Remarks: Several remaining resources will time out on July 1, 2024.

Planned Actions: Limit fire growth on private jurisdiction and prevent the fire from crossing Hwy 53. Engage fire utilizing direct and indirect tactics that provide highest probability of success while limiting exposure to fire fighters. Implement plan to right size organization commensurate with operational needs and fire activity.

We will remain with a type 4 organization due to minimal fire behavior, strategic needs met, and moisture received with excellent RH recoveries.

Significant Events: Clear skies, warming temperatures, and decreasing humidity values created an environment favorable for the remaining isolated heat sources to dry out and increase combustion rates making them easier to detect and mitigate. Overnight I/R detected only 10 remaining hot spots, proving the effectiveness of firefighter suppression efforts as well as the benefits of the recent monsoonal weather pattern in decreasing the amount of remaining heat. This warming and drying trend is likely to allow hibernating heat sources to begin increasing combustion efficiency over the next several days so an increase in heat sources is expected but they will not be a danger to containment or result in increased acreage.

Remarks: The Upper Canyon "NO ENTRY/EXCLUSION ZONE" public access prohibition was rescinded today.

The Temporary Flight Restriction (TFR) over the fire area was reduced in size again today. Drone flights are also prohibited within this area. Visit https://www.tfr.faa.gov for more information.

A South Fork Fire Emergency Closure Order is in place for national forest lands within the Smokey Bear Ranger District. The identified areas, and roads and trails therein, are closed to public access to provide enhanced safety of firefighting personnel and the public. The Lincoln National Forest has also implemented forest-wide Stage II fire restrictions. For more information, visit https://www.fs.usda.gov/lincoln.

SWA Team 5 is also managing the Salt Fire.

Precipitation occurred over the fire area yesterday and today.

Planned Actions: Crews will emphasize constructing direct control lines to protect values at risk and increase containment. Mop up along established control lines is underway and will continue for the foreseeable future. Suppression repair work on constructed containment lines will begin where appropriate and where access is possible. Structure assessments will continue. Assigned personnel will provide initial attack response to any new starts within the TFR. Crews are also assisting utility cooperators in gaining access to damaged areas.

Significant Events: Clear skies, warming temperatures, and decreasing humidity values created an environment favorable for the remaining isolated heat sources to dry out and increase combustion rates making them easier to detect and mitigate. Overnight I/R detected less hot spots across the fire, proving the effectiveness of firefighter suppression efforts as well as the benefits of the recent monsoonal weather pattern in decreasing the amount of remaining heat. This warming and drying trend is likely to allow undetected heat sources to become more detectable but threats to the line are unlikely.

Remarks: Evacuations orders were lifted by Lincoln County emergency management personnel over the weekend. Visit www.lincolncountynm.gov for more information.

Evacuation orders were lifted in the Village of Ruidoso this early week. Visit www.ruidoso-nm.gov/south-fork-fire for more information.

The Temporary Flight Restriction (TFR) remains in effect but has been reduced.
Visit https://www.tfr.faa.gov for more information. Drone flights are also prohibited within this area.

A South Fork Fire Emergency Closure Order was issued on 6/20/2024 for national forest lands within the Smokey Bear Ranger District. The identified areas, and roads and trails therein, are closed to public access to provide enhanced safety of firefighting personnel and the public. The Lincoln National Forest has also implemented forestwide Stage II fire restrictions. For more information, visit https://www.fs.usda.gov/lincoln.

SWA Team 5 is managing the Salt Fire.

Planned Actions: Mop up operations, structure/damage assessments, and suppression repair activities are underway and will continue for the foreseeable future.

Assigned personnel will provide initial attack response to any new starts within the TFR.
