### 3. PREPAREDNESS

#### SWCC PREDICTIVE SERVICES - WEATHER DISCUSSION

- After a mild and uneventful start to the week - a major winter storm system will bear down on the region late on TUE into THU with sharply cooler/colder temperatures - areas of snow - and areas of breezy/windy conditions. Turning drier and slowly warming conditions (but likely generally remaining Below Normal) will arrive late week through the weekend. This will be the start of an up/down FEB with periods of sharp temperature swings and likely several significant storm passages.
